No. 6968.

From

H. B. GRIGG, ESQ., M.A.,
Director of Public Instruction,
Madras,

To

THE HONORABLE E. F. WEBSTER,
Chief Secretary to Government,
Fort St. George.

SIR,

I HAVE the honor to report on education in the Presidency for the official year 1884-85.

I.—GENERAL STATISTICS.

Education Commission.

2. The Education Commission appointed under the orders of the Governor-General in Council early in 1882 to institute a careful examination into the working of the principles laid down in the despatch of 1854 submitted their report in 1883, and the Government of India passed their final orders in October 1884. The recommendations of the Commission were generally approved by the Government of India and Her Majesty's Secretary of State, and the Local Governments were directed to give prompt effect to the views of the Supreme Government. Under the orders of Government, a committee composed of the lady and gentlemen named in the margin assembled early in the current year to revise the Grant-in-aid Code in order to remedy admitted defects, to simplify it, to adapt its provisions when thought expedient to the recommendations of the Commission, and to suggest any further changes which the peculiar educational necessities and administrative organization of the Presidency appeared to call for. The code having been sanctioned since the close of the year, its main features will be noticed in the next report. The question of organizing educational conferences has been referred for the opinion of managers of important institutions and leading educational committees, and proposals will be submitted in due course. The other points touched upon by the Government of India are receiving attention.

Mr. H. B. Grigg (President).

Right Rev. J. Colgan.	Rev. James Cooling.
Mr. S. Appa Sastri.	Mr. L. Garthwaite.
Mr. Abd-ur-Razzaq.	Rev. R. Handmann,
Dr. John Bradshaw.	Rev. Edward Sell.
Mrs. Isabel Brander.	Mr. P. Vijiaranga Mudaliyar.

Number of schools and scholars.

3. The number of institutions furnishing returns to the department fell from 16,139 on the 31st March 1884 to 15,587 on the corresponding date in 1885, showing a net decrease of 552 schools. Although there is so material a decrease in the number of schools connected with the department, it is satisfactory to find that in the past five years the number of schools, according to the present system of classification, has risen from 10,175, an increase of 5,412 schools, or by 53 per cent. The decrease is confined chiefly to vernacular lower secondary and primary schools for boys. There is also a slight fall in the number of English lower secondary schools. On the other hand there has been a satisfactory increase in the number of girls' schools of all grades and of normal schools for masters and mistresses. The diminution in the number of schools does not indicate any retrogression in the progress of education, as the schools that have disappeared are mostly petty schools which ceased to exist or to furnish proper returns on the refusal of Local Boards or this department to admit them for examination under the results system owing to their poor attendance or defective management. In fact, there can be no

GENERAL STATISTICS.

question that hitherto, and possibly still to some extent, schools which did not exist at all appeared in the returns, speculative managers not unfrequently sending in detailed applications for schools which they hoped to start, but which were never started. The increase of the agency of Deputy Inspectors has enabled the department to weed out to a great extent such fictitious entries as well as to reduce exaggerated attendance, those agents having been required to verify personally or by the help of the Inspecting Schoolmasters all applications and statistical returns. The straitened condition also of the funds available for grants-in-aid in nearly every district, and referred to at greater length in the chapter on Primary Education, has checked this speculative tendency. But the evil will probably continue to exist in the larger ranges, more especially those in which the population is scattered and in which travelling is difficult. The decrease, moreover, as will appear from the statement on page 4, was almost wholly confined to unaided institutions, whilst the number of aided institutions exhibits a very trifling difference. Besides the financial restrictions which existed almost everywhere, and the effect of the scrutiny above referred to, the introduction in the preceding year of the condition of a minimum attendance (8 boys or 4 girls in circles and 16 boys or 8 girls in municipalities) and the laying down by Government of an order of preference in selecting schools for aid, no doubt checked the inclusion of petty new schools in the list. A still more potent check was probably the distress of the population in several districts, either from the failure of the south-west monsoon or from the heavy floods in the north-east monsoon, also the prevalence of cholera and small-pox. Although endeavouring to promote the *extension* of education, yet, considering the financial difficulties to be surmounted, I am most decidedly of opinion that the State funds available are more wisely spent in the improvement of existing elementary schools than in increasing indefinitely the number of such schools, so that the children who pass through our schools should obtain at least a sound elementary knowledge of reading, writing and arithmetic, instead of, as at present, too often only a smattering of such knowledge. Even with the present number of schools, I fear that it will be impossible for the State to provide adequate funds to meet the growing demand of existing schools as their standard rises. The allotment for aid, whether provincial or local, has practically almost reached its limit, and yet with the improving provision of better qualified teachers, the existing schools must rapidly advance in standard if not in strength, and with this advance the demand for grants must grow proportionately. So, assuming the allotment available a fixed sum, the amount which in 1885 would suffice for (say) 200 schools, having only first and second standard classes, would not in 1888 probably suffice for 150 schools having third standard classes as well. So that unless the people will gradually pay more for the education of their children, so that increased income from fees may make good the loss arising from reduced grants, the Boards must of necessity each year reduce the number of schools which they can afford to aid. During the past two years District Boards have, in increasing numbers, exercised this check on the extension of education, and as regards Provincial funds a beginning, by reducing grants in three districts by 25 per cent., was made in the same direction. But the enormous increase in earnings of schools, under standards payable from Provincial funds, an increase of 70 per cent. on the budget provision, will render it absolutely necessary to extend the restriction to many districts, a measure which must seriously retard the progress of upper primary and lower secondary education among the population not residing in Municipalities.

Compared with the previous year, the attendance has fallen from 447,786 to 430,851, showing a fall of 16,935 pupils, of whom 14,693 appertained to unaided schools as shown in the statement printed in para. 5. During the past five years, however, the attendance has risen by 162,472 (60 per cent.), giving an average annual increase of 32,494 pupils. It will be observed from the statement appended that, notwithstanding the introduction of the term-fee system, the attendance in arts colleges and upper secondary schools rose from 2,175 and 6,027 to 2,515 and 6,659 respectively. I will in a later section trace in detail the effect of the changes of the fee system, both on the average attendance in various classes of institutions as well as on their financial prospects.

GENERAL STATISTICS.

The following table shows the totals under different classes of institutions, pupils being distinguished according to stages of instruction, irrespective of the institutions they attend. As regards the average strength of institutions, I note that that of colleges rose from 72 to 84, of high schools from 53 to 55, of lower secondary schools, English, for boys, from 44 to 49. This last increase is very satisfactory as indicating improvement in existing lower secondary schools and a check on the injudicious system of raising primary schools to the secondary standard while still quite unfit for such a change. The strength of primary schools for boys and girls remained stationary, whilst that of normal and industrial institutions shows marked advance. It is noteworthy that the classes of institutions especially affected by the new fee system have all improved, whilst primary institutions practically unaffected by its provisions remained stationary. I do not say that numerically the increase would not have been greater but for the new fee system; probably it would. But that system has clearly not thrown back education and is manifestly consistent with its fairly rapid advance.

Distribution of schools by districts and divisions.

4. The subjoined statement shows the distribution of schools by districts and divisions. Only 8 districts, viz., Godávari, Kistna, Salem, Madura, Trichinopoly, Coimbatore, Nílgiri and South Canara, show increase in the number of schools, while all the remaining districts show more or less decrease, the fall in Ganjam and Vizagapatam being very heavy. As regards attendance, 5 districts only show increase, viz., Kistna, Madras, Madura, Coimbatore and South Canara. Tanjore shows a falling off of 3,811 pupils, Malabar 2,834 pupils, and Tinnevelly 2,731 pupils.

Referring to divisions, as may be seen from the marginal statement, the sixth and seventh divisions only show increase in the number of schools, while, as regards attendance, the seventh division only, which consists of but one district, viz., South Canara, shows improvement.

Distribution of schools according to agency.

5. Schools and scholars are distinguished according to agency in the subjoined table :—

Classes of institutions.	1883-84.		1884-85.	
	Schools.	Scholars.	Schools.	Scholars.
Government or departmental institutions	158	10,297	141	8,574
Institutions under local bodies or committees, including District Board Tiruvadi Sanskrit school	1,280	48,225	1,318	48,877
Aided institutions	9,133	275,510	9,172	274,339
Unaided institutions, including private schools	5,568	113,754	4,956	99,061
Total ...	16,139	447,786	15,587	430,851

The transfer of Government Middle schools to Local Boards under G.O., dated 13th August 1884, No. 1869, Financial, the establishment of a few girls' schools and the classification of the Muhammadan Combined System schools in Madras as Government schools resulted in a net decrease against Government or departmental institutions of 17 schools with 1,723 pupils. There is an appreciable increase both in the number and attendance of institutions maintained by District Boards. The number of aided schools shows slight increase, but the attendance fell by over 1,000 pupils. Under unaided institutions there is a heavy fall, which is due to the closing of schools as already explained. The average strength of each class of schools however remained about the same.

Distribution of schools by districts and standards.

6. The annexed table shows in detail the distribution of schools by districts and standards :—

Districts.	Institutions.												Pupils.											
	Arts colleges.	Professional colleges.	High schools for boys.	Middle schools for boys.	Primary schools for boys.	High schools for girls.	Middle schools for girls.	Primary schools for girls. GENERAL STATISTICS.

Education in relation to population.

7. In the accompanying table, districts and divisions are arranged according to proportion of population to each pupil. The population per pupil ranged from 15 to 134 against 15 to 124 in 1883-84, Vizagapatam showing itself the least advanced in an educational point of view. Eleven districts maintained their position in the list, 1 district (Kistna) gained two places, 5 districts (Malabar, South Arcot, South Canara, Kurnool and Nellore) gained one place each, and 3 districts (Chingleput, Anantapur and Salem) lost one place each, while 2 districts, viz., North Arcot and Tanjore, lost two places each. Viewing the position occupied by the divisions, the population per pupil ranged from 49 to 97 against 48 to 96. Five out of 7 divisions retained their rank and the fourth and seventh divisions exchanged places owing to the fall in the number of pupils in the North Arcot, South Arcot and Salem districts.

Education in relation to male and female population.

8. The next statement exhibits the progress of education as regards male and female population by districts. The percentage under boys ranged from 8·8 to 63·9 and that in girls from ·4 to 25·4, the highest percentages under both boys and girls appertaining to Madras :—

Districts.	Population of school-going age.		Pupils.		Percentage.	
	Male.	Female.	Boys.	Girls.	Boys.	Girls.
Ganjam	130,420	132,021	25,223	1,252	19 3	9

Coimbatore	121,029	127,625	15,721	1,444	12·9	1·1
Malabar	176,141	178,614	34,161	5,093	19·3	2·9
Nílgiri	7,646	6,009	1,333	432	17 4	7·2
South Canara	70,835	73,091	9,336	1,212	13·1	1 6
Total ...	2,291,735	2,338,541	379,932	50,919	16 6	2·2

The proportion of the male population to one boy rose from 38 to 40, but that of the female population to one girl fell from 328 to 306. The number of girls rose from 47,550 to 50,919, or by 7 per cent., although only 2·2 per cent. of the girls of school-age are actually at school. The number of girls under instruction on the 31st March 1880 was 29,282, so that during the last quinquennium the number of girls attending schools connected with the department has risen by 74 per cent. It must be remembered here that the improvement in the standard and efficiency of girls' schools during this period was even greater than that in numbers. Madras heads the list as regards the percentage of girls; then follows the Nílgiri as in the previous year; next come Tinnevelly, Godávari, and Kistna. Five districts—Ganjam, Cuddapah, Kurnool, Bellary and Anantapur—show less than 1 per cent.

Educational condition of the great classes of the population.

9. The following is a summary of statement I in appendix to the report, giving particulars regarding the percentages of pupils under instruction to the total population of school-going age in each district and under each great class of the population :—

Classes.	Population of school-going age.		Pupils under instruction.		Percentage.	
	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.
Europeans and Eurasians	2,745	2,165	3,537	3,062	129	141
Native Christians	48,791	51,254	24,764	11,393	51	22
Muhammadans	142,249	146,444	28,046	1,908	·20	1·3
Hindus—Brahmans	82,667	84,243	61,222	7,289	74	9
Hindus—Vaisyas and Sudras	1,364,712	1,392,866	237,770	23,930	17	2
Hindus—Others	648,212	659,684	22,380	3,083	3	·5
Others	2,359	1,885	2,213	254	78	33
Total ...	2,291,735	2,338,541	379,932	50,919	16·6	2 2

The total number of boys decreased by ·9 per cent., while that of girls rose by ·2 per cent. The relative advance under girls is satisfactory. The remarks I made in my last report under this head apply equally to this year also, though there has been a fall of about 20,000 boys.

Regarding the educational condition of each section of the population, I would make the following remarks :—

Europeans and Eurasians.—This year again was marked by an improvement in the number of pupils under instruction. There was an increase of 96 boys and 164 girls, which raised the percentage under boys and girls from 125 and 134 to 129 and 141 respectively. In eleven districts the attendance advanced more or less, the largest increase appertaining to Madras.

The committee appointed to consider whether the Bengal Code relating to the education of European and Eurasian children could be adopted in this Presidency held several meetings, and concluded, after careful deliberation, that the existing Grant-in-aid Code was, with certain additions and alterations, suitable

GENERAL STATISTICS

for European and Eurasian schools. Their recommendations, accordingly, were incorporated with the Grant-in-aid Code. The revised Code was sanctioned by Government in October 1884 and came into effect from the 22nd idem. Provision was made for award of scholarships to enable pupils of promise to prosecute their studies to higher standards, for the aid of recognized boarding schools, orphanages, and homes for destitute children by means of grants for feeding and clothing, and for the encouragement of industrial schools by grants for work turned out in the trades of carpentry, printing, blacksmith's work, and such other trades as may from time to time be approved by Government. Separate standards of examination under the results system were prescribed, and the provisions of the Code, which could not well be applied to European schools, were slightly modified. My next report will show how far the introduction of the Code bids fair to benefit European schools.

Native Christians.—The number of Native Christian boys again shows a falling off, though that of girls shows an advance. The percentage of pupils to children of school age fell from 52 to 51 under boys and rose from 21 to 22 under girls.

Muhammadans.—There were on the 31st March last 28,046 boys and 1,908 girls under instruction against 29,456 boys and 1,939 girls at the close of 1883-84. The decrease under boys is heavy compared with that under Native Christians and Brahmans. The percentage of pupils to children of school-going age fell by 1 under boys. The number of girls shows a very small decrease. The decline in attendance is confined to the Malabar and ten other districts, whilst the remaining eleven districts show advance. The condition of Muhammadan education will be noticed in detail under Chapter V.

Hindus—Brahmans.—As under Native Christians, the number of Brahman boys slightly decreased and that of girls largely increased, the former from 61,901 to 61,222 and the latter from 6,207 to 7,289. Under boys there was a fall of 1 per cent., while under girls there has been an increase of nearly 2 per cent. The improvement in the percentage of girls under instruction is an encouraging feature, as it indicates that Brahman parents are beginning to appreciate the advantages of giving their daughters elementary instruction.

Hindus—Vaisyas and Sudras.—Under this head there was the heaviest fall in the number of boys, approximating 20,000. The number of girls, however, rose from 23,118 to 23,930. The percentage of pupils to population of school age fell from 19 to 17 under boys and rose from 1·66 to 1·71 under girls. The former percentage, it will be observed, is less than that under other classes, "Other Hindus" excepted.

Hindus—Others.—As remarked in my last report, the number of pupils under instruction is, for reasons therein stated, very low compared with the other classes of the population. The inclusion of Paraiyas and kindred castes under the special classes of pupils, to whom higher rates of grants are allowed, will effect a gradual improvement under this head. The number of boys and girls under instruction at the close of the year exceeded the figures of the previous year by about 1,700 and 800 respectively, indicating that the changes in the Code favourable to these classes had already begun to tell.

Others.—Under this head also slight improvement in the number of boys and girls may be noticed.

Distribution of pupils in colleges and schools for general education.

10. Statement No. II in appendix gives the distribution of pupils in colleges and schools for general education. The number of Europeans and Eurasians attending colleges and primary schools diminished slightly, but there was an increase in the attendance of the secondary schools. Under Native Christians, there was a decrease only in the number of *boys* attending secondary and primary schools, girls showing an increase. Forty-nine Muhammadan pupils were receiving collegiate instruction against 33 in the previous year, which is satisfactory and indicates a growing desire for superior education. The number of Muhammadan boys in secondary and primary schools both fell, but proportionately, the secondary schools suffered less than the primary schools. Increase will be noticed under Brahmans all round, except in the number of boys in secondary schools.

Distribution of pupils according to wealth

11. The next table gives a summary of pupils distributed according to wealth. The children of the richer classes rose from 3,457 to 3,531, but there was a fall under the middle and poorer classes, owing to the diminution in the total number of pupils attending schools. It is noticeable that while out of males 80·5 were of the poorer classes, 77·5 of female pupils were of these classes.

Pupils.	Richer classes.	Middle classes.	Poorer classes
Boys ...	2,931	71,066	305,935
Girls ..	600	10,993	39,326
Total ...	3,531	82,059	345,261

Distribution of pupils according to the occupation of parents or guardians.

12. The subjoined summary classifies pupils according to the chief occupation of their parents or guardians. Under officials, artizans, and coolies there is an increase on the whole, while under all the other heads there is a decrease. The increase under "artizans" is, however, slight, while that under "coolies" is encouraging.

Occupation.	Boys	Girls	Total	Total, 1883-84
Officials	19,445	5,898	25,343	21,821
Petty officials and menial servants	37,281	7,136	44,417	46,140
Traders	61,784	7,252	69,036	73,102
Landholders	166,180	14,543	180,723	196,350
Artizans	25,781	4,140	29,921	29,717
Coolies	46,895	6,383	53,278	50,758
Mendicants	5,181	1,055	6,236	6,776
Others	17,385	4,512	21,897	23,122

Race and sex of pupils.

13. The next table compares the race and sex of pupils for the last two years. The proportion of population per pupil remained stationary under "Native Christians" and "Europeans and Eurasians," increased under "Hindus" and "Muhammadans," and decreased under "Others." There were, on the whole, 72 persons to each pupil in 1884-85 against 69 in 1882-83 and 1883-84 and 116 in 1879-80; and thus in five years there has been an improvement of 61 per cent.

Race.	1883-84			1884-85.			Population.	Proportion of population to one pupil.

GENERAL STATISTICS

General improvement is noticeable both under boys and girls. The chief decreases are confined to the Tamil, Telugu and Malayalam languages. The increase in the number of Sanskrit pupils is satisfactory. The statement in the margin compares the number of pupils studying the chief vernaculars with the number of persons whose mother tongue is one of these languages, reckoning them in thousands. The Tamils head the list as in the previous year in the percentage of pupils to persons. They are closely followed by the Malayalies. The Uriyas stand third, the Canarese come next, and these are followed by the Telugus. Only about 1 in 100 of the Hindustani people is studying Hindustani at school, although there are two in every 100 Muhammadans at school.

Language.	Persons (in thousands).	Pupils (in thousands)	Percentage.
Tamil	12,091	208	1·7
Telugu	11,745	134	1·1
Malayalam	2,366	39	1·6
Canarese	1,296	18	1 4
Hindustani	694	7	1·0
Uriya	1,020	15	1·5

15. The summary in the margin compares the number of male and female pupils that remained unprotected from small-pox on the 31st March 1884 and 1885. The percentage of unprotected boys fell from 16 to 14 and that of girls from 19 to 8. The improvement recorded in the case of vaccination of girls is satisfactory, considering that vaccination is optional in the case of most girls' schools. The aggregate percentage of unprotected pupils was 13 against 16 in the previous year. Mr. Fortey makes the following remarks on the vaccination of pupils :—

Vaccination

Institutions.	Unprotected boys.		Unprotected girls	
	1883-84	1884-85.	1883-84.	1884-85.
Colleges ..	49	23		
Secondary schools	4,265	3,471	1,005	121
Primary schools	59,456	48,751	8,212	3,805
Special schools ...	25	13	2	
Total	63,795	52,258	9,219	3,926

The measures taken in connection with this department to enforce vaccination are to be found in the new Grant-in-aid Code, Chapter II, Article 5, and Chapter III, Article 30. The former article provides that all applications for salary grants on behalf of schools for boys and for European and Native Christian girls shall be accompanied by a declaration by the Manager that he will not admit any unprotected child as a pupil. The latter article, referring to "results" schools, runs thus:—"No male pupil unprotected from small-pox is eligible for a grant payable from Local or Provincial funds in a Circle or Municipality which has declared protection from small-pox a condition of aid." The rule affecting Salary Grant schools would be quite satisfactory if it included schools for Native girls who are not Christians. As it stands, it leaves them unprotected and at the mercy of their parents. But the rule applicable to Results schools is altogether unsatisfactory. In the first place it applies to male pupils only. Secondly, it applies to them only in Circles or Municipalities, the Boards of which have declared protection to be a condition of aid. Thirdly, what is prohibited is not the admission of an unprotected child, but the grant of money on his behalf. With regard to this last objection, I may say that instances have come to my knowledge where the masters of Results schools have actually waited until their schools have been examined by the Deputy Inspector and they have ascertained what boys had passed, and then begged him to delay the issue of the certifying memoranda until they could get those boys vaccinated who, although they had passed, were ineligible for a grant because unprotected.

I am of course aware that the inefficiency of the measures adopted arises from a fear that stronger action would defeat its own object by checking education without increasing protection, but in my opinion this fear is groundless, and I cannot help feeling that a great opportunity of saving life and limiting the spread of disease is not being fully utilized.

I am, however, not disposed to think that the schools of the country should be made the means of enforcing sanitary measures. Education is already sufficiently weighted by various impediments, and I would certainly not add to those already existing in connection with vaccination. Education is preparing the way for the vaccinator by increasing the general intelligence, and there its service to the cause should end.

GENERAL STATISTICS.

16. The number of schools and scholars in Municipalities and Local Fund circles is distinguished in the margin. In Municipalities the number of schools rose by 74, but the attendance slightly declined. The average strength of each school fell from 59 to 57. There was a decrease of 623 schools and 16,796 scholars in rural tracts, but the average attendance (24) remained almost stationary. While nearly one-eighth of the schools connected with the department were in Municipalities, one-fourth of the pupils in such schools were studying in schools located in Municipalities; but it must be remembered that the superior schools in towns draw a good number of their pupils from the rural villages around, while the reverse seldom occurs.

Schools and scholars in Municipalities and Local Fund Circles.

Municipalities and Circles.	Schools.		Scholars.	
	1883-84.	1884-85.	1883-84.	1884-85.
Municipalities	1,785	1,859	105,801	105 662
Local Fund Circles.	14,351	13,728	341,985	325,189

Statement III in appendix gives the number of schools and scholars in each Municipality. The total number of male pupils fell from 85,241 to 83,712, but that of girls rose from 20,560 to 21,950. While 22 per cent. of the entire male pupils appertains to schools in Municipalities, the proportion of girls in such schools was as high as 43 per cent. The rapid development of female education in towns will no doubt soon cause the tide to set in the same direction among the rural community. The number of Municipalities in which there were more than 1,000 pupils fell from 36 to 35, owing to the diminished number of pupils in the Cuddapah Municipality. The percentage of boys to the population of school-going age fell from 66·9 to 65·7, but that of girls rose from 15·6 to 16·6. In 12 against 11 Municipalities more than 25 per cent. of girls of school age were under instruction, while in 15 towns less than 10 per cent. of such girls were at school.

School fees.

17. The annexed summary gives for ten years the income derived from school fees. In my last report I recorded an increase of Rs. 1,14,016 in the fee revenue. During the year under report again there was an increase of Rs. 1,25,512 over the figure of 1883-84, though there was a decrease of nearly 17,000 pupils. Thus the estimate which I made in my last report that in the year the fee income would approximate 13 lakhs, or nearly double that of 1879-80, has been realized. But for the decrease in aided and unaided primary schools, *i.e.*, schools almost absolutely unaffected, unless beneficially, by the School-fee Notification, as pupils left the primary classes of superior institutions to join primary schools proper, in which low fees or no fees at all are levied, that estimate could have been fully reached. The average fee per pupil was Rs. 2-15-0 against Rs. 2-9-0 in the previous year. In 1879-80 the average also was Rs. 2-9-0 only, but in 1882-83 it was under Rs. 2-6-0, and it is with this year comparison must be made to arrive at accurate results as regards the effects of the School-fee Notification. The advance is marked and is due to the raising of the fee rate in colleges, in upper secondary and in lower secondary schools, and to some small extent to the gradual levying of fees in primary schools maintained by Boards. The increase in colleges approximated Rs. 23,000, in upper secondary schools Rs. 63,000, and in lower secondary schools Rs. 41,000.

GENERAL STATISTICS.

Under Government institutions—in which it is to be remembered the new rates were at once (1883-84) introduced in their entirety, whilst in private schools they have been introduced gradually, the rules applying to fresh entrances to a department only—there is a decrease of about Rs. 25,000, which is due to the transfer of schools or departments of schools to Municipal and District Boards or their abolition. Under Board schools there is an increase of about Rs. 46,000, of which nearly one half is due to the introduction of the new rates into existing schools, the balance appertaining to Government schools transferred; but more than a lakh of the increased income from school fees appertained to colleges and secondary schools under private management,—an increase due in very great measure to the introduction of the new Fee Code during the year. In many institutions, it will be remembered, the new scheme was not introduced until after the close of 1883-84, the managers concerned having preferred appeals against the new code and delayed observance of the rules pending the final decision of Government. The consequence was that the new rates did not have effect in many cases until July 1884, and in some cases not till January 1885. This fact unquestionably reduced the total receipts of the year, which, but for these and other causes already referred to, might have reached thirteen-and-a-half lakhs.

The next table gives the particulars of the fee income as derived from the different classes of institutions for the last three years :—

The Government arts colleges show an increase, which is, however, small compared with the increase in the aided and unaided colleges, amounting to about Rs. 20,800 and Rs. 1,500 respectively. The yield from the Government upper secondary schools, including lower departments, fell by Rs. 26,008, but this is due to the transfer of certain institutions and to the abolition of certain departments, viz., the middle departments of the second-grade colleges and of the Presidency high school. If the high schools, which do not appear in the lists of both the years, be excluded, it will be observed that the fee revenue in the high schools appearing in both years' lists was Rs. 42,162 against Rs. 46,655 in 1883-84. The decrease in the fee income of Government lower secondary schools is nominal, as the fee for 1884-85 does not take into account the amount collected from 1st October last in the 35 Government schools handed over to the District Boards. Under Board schools there is a general improvement, as already noted. Under this head I believe there will be very rapid increase as the Boards learn to carry out more fully the school fee system. Primary schools for girls excepted, all classes of aided institu-

tions show improvement. Nearly three-quarters of a lakh of rupees of the total increase belonged to upper secondary schools, including departments. If the institutions which do not find place in both the years' lists be eliminated, the fees in the remaining schools will be found to amount to Rs. 2,64,772 against Rs. 2,13,753, which shows an increase of more than half-a-lakh of rupees. The new Fee Notification, to which the most part of the above increase is to be attributed, has thus placed the managers in receipt of a much larger income, which will not only enable them to employ superior teachers as vacancies occur, but will also enable Government to reduce the grants in the case of such schools as have become self-supporting. Decrease is noticeable against certain items under unaided institutions, but, if the schools which do not appear in the lists of the two years be excluded, it will be seen that in upper secondary schools alone there is an increase from Rs. 35,833 to Rs. 45,970. There is a diminution of about Rs. 15,000 against unaided primary schools, which do not fall under the School-fee Notification, but this is due to the large fall in the number and strength of unaided schools already explained in the beginning of this chapter. Under aided primary schools, also unaffected by the notification, there is but a slight increase; but if the decrease in pupils is allowed for, viz., twelve thousand, and taking the average yearly fee of each pupil at Rs. 5, there is really an enhanced payment by the pupils of Rs. 62,000.

The following table gives the total attendance for the same period in each of the above classes of institutions :—

—	1882-83.	1883-84.	1884-85.
Arts colleges	2,112	2,175	2,515
Professional colleges ..	217	237	262
Upper secondary schools for boys... ...	20,904	24,305	24,370
Lower do. do. do.	21,347	37,304	30,514
Secondary schools for girls	6,400	9,699	11,731
Primary do. for boys .. .	372,326	353,116	338,921
Do. do. for girls	21,246	18,896	20,210
Special schools	1,772	2,054	2,328
Total .	446,324	447,786	430,851

As the new scheme of fees was, however, introduced partly in 1883-84, th attendance and fee income of 1884-85 should be compared with those of 1882-83 to arrive at an exact idea of the increased amount of fees obtained under the new notification. In Arts Colleges the attendance rose from 2,112 to 2,515 or by 20 per cent., but there was an increase of nearly 80 per cent. in the fee receipts. The attendance and fees of the upper secondary schools for boys show an increase of 16 and 40 per cent., and those of lower secondary schools for boys of 43 and 73 per cent., respectively. In the figures of 1882-83, the primary departments of certain secondary results schools were not included, as the attendance and fees of the departments were not distinguished from those of results schools proper in the returns of that year. But the percentage of increase in the fee income is not appreciably affected by this omission, as the amount of fees derived from such schools is generally below the average in salary schools. The primary schools for boys show a decrease of 10 per cent. in attendance and of 8 per cent. in fees. It will thus be seen that the new scheme of fees did not affect the total attendance, nor the fee revenue of schools in which it was introduced; while the primary schools, unaffected by the scheme, suffered from various other causes in numbers as well as in the fee income.

Another noteworthy effect of the new scheme was the improvement in the daily attendance at schools. The percentage of average daily attendance to average number on rolls rose from 88·5 to 89·2 in Arts Colleges and from 84·2 to 84·6 in secondary schools, while in primary schools proper, the percentage remained almost stationary.

Average fees.

18. The average fee in the different classes of institutions in the first and last years of the decade is shown in the annexed statement, the attendance in the free institutions and the fees in closed schools being omitted as usual.

The percentage of fees to total cost in Government colleges fell from 29·1 to 28·0 in the college departments, and from 58·6 to 57·3 in the school departments, or from 36·2 to 32·9 on the whole. The aggregate amount of fees in colleges having actually risen, the decrease in the percentage, it will be noticed from the statement, was due to the enhanced cost of the colleges during the year as well as to the fact that the fee revenue was abnormally increased by the collection in the preceding year of the first term fee in addition to 9 months' monthly fees. The decrease in the school departments of colleges was the result of the abolition of the middle departments attached to second-grade colleges from 1st January 1884. These middle departments were mostly self-supporting, and their abolition consequently tended to reduce the fee income of the whole school much more than its net proportionate cost to Government. The cost to Government of educating each pupil fell in the college department, but rose in the school department for the above reason. Aided colleges show marked improvement all round. The percentage of fees in the college and school departments rose from 24·3 and 56·4 to 33·6 and 72·3 respectively, and the cost to Government fell in both the departments. While in Government colleges 32·9 per cent. of the entire cost was met from fees, 51·3 per cent. was so met in aided colleges.

As in the case of Government colleges, the percentage of fees to total cost fell, and the cost of educating each pupil rose in Government upper secondary as well as lower secondary schools, which is due to the transfer of Government institutions to the Municipal and District Boards. In the Board and aided upper and lower secondary schools, on the other hand, the percentages of fees to total

cost have risen. Comparing the Aided with the Board schools, it will be observed that the latter were more self-supporting and less costly to Government than the former. This is due partly to the levy of fees at Government rates in some of the schools transferred to them recently, and partly also to some of the aided schools not having adopted the new fee scheme till late in the year. GENERAL STATISTICS.

As regards primary schools, the percentage of fees in Board schools rose from 17·3 to 19·2, which is the result of the introduction of fees in Board schools. The percentage of fees in aided schools of this description was 35·9 against 37·0 in the previous year. The cost to Government per pupil was 4 annas 4 pies in aided against 8 annas 1 pie in Board schools. The primary schools under the direct management of the department, consisting of the Muhammadan combined schools in Madras and the practising branches of the Russellkonda, Vizagapatam and Tellicherry normal schools, were less self-supporting than either Board or aided schools of the same class owing to the small fees therein levied.

Percentage of fees to cost in colleges.

20. The percentage of fees to total cost in Government and aided colleges is shown in the annexed statement, the institutions being arranged according to the total percentage if the college and school departments be taken together.

Colleges.	Percentage of fees to total cost, 1884-85.			Percentage of fees to total cost, 1883-84.

Negapatam Wesleyan Mission college	33·4	56·6	47·7	48·9
Tinnevelly C.M.S. college	30·3	47·5	41·8	39·1
Doveton Protestant college	11·5	59·5	34·3	23·8
Masulipatam Noble college	22·1	42·1	33·003	29·3
Tuticorin Caldwell college	12·5	35·07	23·5	14·0
Mangalore St. Aloysius' college	18·2	24·8	22·4	32·6

All the three Government first-grade colleges show diminished percentage, the Kumbakónam college owing to a decline in its attendance, and the Presidency and Rajahmundry colleges mainly owing to the abolition of the lower classes as well as to the abnormally enhanced fees of the preceding year. The percentages of fees in the college department of these two colleges rose from 21·3 and 16·9 to 24·5 and 18·02. The Madura college headed the list of second-grade colleges, though

GENERAL STATISTICS.

with a reduced percentage, and it is followed by Mangalore and Cuddalore, which show an improved percentage. Salem and Bellary were the least self-supporting of this class of Government colleges.

Unlike the Government colleges into which the new fee system was introduced at once in its entirety, all the first-grade aided colleges, 4 in number, show great advance as regards the percentage of fee revenue, the increase extending to the college and school departments. In not a few of these the new rates had virtually not been introduced at the close of 1883-84. The school departments of the Trichinopoly and Tanjore S.P.G. colleges yielded a profit. Of the 14 second-grade aided colleges, only 4 declined in the percentage of fee income, while the remaining 10 institutions made more or less improvement in this respect, and the fees covered more than 50 per cent. of the cost in the case of 8 colleges.

Percentage of fees to cost in upper secondary schools.

21. The next table gives the percentage of fees to total cost in 8 Government, 10 Board, and 61 aided high schools. All the Government institutions, Cannanore excepted, show a nominal decline in the percentage of fee revenue. Cuddapah and Kurnool yielded the least percentage of fees among Government schools owing to the abnormal enhancement of fee revenue in the preceding year. The percentages in the Board schools ranged from 55·0 to 138·9, but it must be remembered that, save in Tellicherry and Palghát, the cost of the institutions is comparatively small owing to the employment of less expensive teaching agency. It is noteworthy that out of 61 aided high schools, no less than 45 were more than half self-supporting, and in 20 schools three-fourths of the entire cost was borne by fees. Three institutions actually yielded a surplus—the Triplicane Hindu School, the Kumbakónam Town School, and the Rajahmundry Innespeta School.

Kapistalam middle school	315	856	1,171	1,122	49	43

The excess or profits ranged from Rs. 49 to Rs. 4,586 against Rs. 43 to Rs. 2,410 in the previous year. The improvement is the result of the introduction of the new fee rules. The net excess grant was nearly Rs. 20,000; this cannot recur, as under the new code excess grants are carried to the credit of Government in the succeeding year.

Progress of the Grant-in-aid system.

24. The expenditure on grants-in-aid to institutions under private management during the last ten years is summarized in the subjoined abstract, Provincial, Local and Municipal Funds being distinguished.

Years.	Payments made from			Total.	Years.	Payments made from			Total.
	Provincial Funds.	Local Funds.	Municipal Funds.			Provincial Funds.	Local Funds.	Municipal Funds.	
	RS.	RS.	RS.	RS.		RS.	RS.	RS.	RS.
1875-76 ...	2,64,818	1,70,469	33,009	4,68,296	1880-81 ...	2,32,950	1,78,467	34,899	4,46,316
1876-77 ...	2,78,682	2,04,743	33,294	5,16,719	1881-82 ...	2,51,204	2,53,819	43,768	5,48,791
1877-78 ..	2,81,895	1,78,184	34,427	4,94,506	1882-83 ...	3,11,285	3,01,099	59,115	6,71,499
1878-79 ..	2,68,986	1,39,026	25,005	4,33,017	1883-84 ...	3,17,258	2,83,095	74,926	6,75,279
1879-80 ...	2,61,292	1,10,741	24,057	3,96,090	1884-85 ...	3,65,801	2,76,938	1,01,677	7,44,416

The total expenditure rose by Rs. 69,137. While the outlay from Provincial funds rose by about Rs. 48,000 and that from Municipal funds by about Rs. 27,000, the grants from Local funds fell by about Rs. 6,000. The increase in the amount of grant from Provincial funds will be explained in the next paragraph. The decrease in the outlay from Local funds is due to the reduction in the rate of results grants adopted by certain Boards on account of the straitened condition of their finances, while the outlay from Municipal funds rose on account of the transfer of middle education charges for boys in the mofussil Municipalities to the Municipalities concerned. The aggregate amount of grants-in-aid was Rs. 7,44,416, which is the highest figure recorded.

GENERAL STATISTICS.

Classification of the grant-in-aid expenditure from Provincial funds.

25. The particulars of the grant-in-aid expenditure from Provincial funds are given below :—

Grants.	1883-84.	1884-85
I—Grants for salaries to schools under private management.	RS.	RS.
Grants for salaries and house rent and fees for poor European and Eurasian children	1,67,697	1,71,781
Furniture, book, and apparatus grants	1,235	7,922
Scholarship grants	8,224	11,555
Building grants	3,358	19,067
Results grants	1,36,744	1,55,476
Total	3,17,258	3,65,801
II—Other grants.		
Salary, scholarship and results grants to Local Fund schools	21,336	35,291
Do. do. to Municipal schools	7,497	7,779
Grants to eleemosynary schools not under inspection	1,822	1,569
Total	30,655	44,639
Grand Total	3,47,913	4,10,440

The expenditure on salary and rent grants, including grants on account of fees for poor European and Eurasian children, amounted to Rs. 1,71,781 against Rs. 1,67,697, showing an increase of Rs. 4,000 approximately over the actuals of the preceding year. Special grants for furniture and apparatus show an increase of about Rs. 6,700, which is due to several institutions having availed themselves of the benefits offered by the Code more largely during the year under report than in 1883-84. The outlay on scholarship and building grants also increased, the large advance in the latter item being due to the grant of Rs. 7,220 sanctioned for the Madras Christian College, and the grant of Rs. 5,958 sanctioned for the Cocanada Hindu College some years back having been availed of during the year. The enhanced outlay on results grants and on grants to Local Fund schools was the result of the rapid progress which the schools receiving aid under the results system are making, as will be explained in a subsequent chapter. This rapid extension will receive a check unless the finances at the disposal of the department are so adjusted as to leave a wider margin to meet the growing demands for grants-in-aid.

Schools under private management aided on the salary grant system.

26. The particulars regarding attendance in and grants drawn by salary-grant schools under private management are given in statement No. IV in appendix. The number of boys' schools was 100 against 86 and that of girls' schools 101 against 94. The attendance in the boys' and girls' schools was 18,466 and 7,108 against 18,882 and 7,145 respectively in 1883-84. The grant to girls' schools rose from Rs. 43,141 to Rs. 54,153, an increase of 25 per cent.

The Grant-in-aid Code.

27. As elsewhere remarked, a revised Grant-in-aid Code was sanctioned in October 1884, embodying the recommendations made by the committee appointed by Government to consider measures for the encouragement of European education and also incorporating the amendments in the Code sanctioned by Government from time to time since the promulgation of the Code in 1880. The whole Code again underwent a thorough revision, towards the close of the official year, with reference to the recommendations of the Education Commission, and has since been sanctioned by Government with effect from the 1st July last.

Changes in the Grant-in-aid Code.

28. I proceed to notice briefly the important changes in the Grant-in-aid Code sanctioned during the year.

(1) *European education.*—A reference has already been made to the modifications and additions made in the Code in connection with the education of European and Eurasian children. I consider it unnecessary to go here into the details of the changes.

(2) *Attendance at industrial schools.*—In the case of ordinary day schools, an attendance of three hours per diem was required of each pupil. This rule was found to bear hardly on industrial schools, in which the children are employed on industrial work for a considerable part of the year during the hours usually allotted to schooling. The duration of daily attendance was accordingly reduced to two hours as in the case of night schools (Government Order, Educational, dated 22nd April 1884, No. 199).

(3) *Zenana education.*—The rule tentatively sanctioned in 1882 for encouraging zenana education was found inconvenient in several ways. It was found impracticable to have so high a minimum as fifteen pupils. The restriction regarding the maximum age and the household minimum also appeared unnecessary, and the whole rule was amended as follows (Government Order, Educational, dated 16th May 1884, No. 254) :—

"Grants in aid of the salaries of qualified female teachers of Hindu and Muhammadan girls pursuing their studies in private houses may be sanctioned by the Director of Public Instruction according to the scale laid down in Rule 43, provided (1) that the teacher is employed by the manager of a girls' school or by a regularly-constituted committee, society, or association ; (2) that the current accounts, the list of establishment, each household class, together with the time-table, the scheme of studies, and register of attendance, so far as secular instruction is concerned, are subject to Government inspection ; (3) that each pupil receives instruction according to the standard in which she may be studying in one or more languages, in arithmetic, in history and geography, and in hygiene ; (4) that such monthly fees as may be from time to time prescribed are levied, provided that in no case shall the monthly fee for each pupil be less than Rupee 1 ; (5) that the total number of pupils under instruction shall not be less than 10 ; (6) that the pupils under instruction be not less than ten years of age ; (7) that the teacher devote in the aggregate to all the classes not less than 20 hours weekly."

(4) The Code provided that a school receiving aid under the salary-grant system could not claim assistance in the same official year under the results system and *vice versâ.* A change was considered necessary in this restriction on the transfer of middle and primary education charges in Municipalities to the Commissioners concerned, as these departments of institutions might be aided by the Municipalities either on the salary or on the results system. The following addition was, therefore, made to the article in question (Government Order, Educational, dated 28th May 1884, No. 297) :—

"Colleges and high schools receiving aid from Municipal funds on the results grant system for their middle or primary departments may receive grant on the salary system from Provincial funds for teachers wholly employed in the college and high school departments."

(5) *Aid on the combined system.*—Municipalities and Local Fund Boards have aided schools on a combination of fixed stipends and results grants, but practically only that portion of the grant, which falls within the results system, was admitted by the Code. With the view of bringing the combined system within the operation of the Code and of checking the tendency of local bodies to grant unduly high fixed stipends to unqualified teachers in combined system schools, the following addition to article 57 of the Code (old) was sanctioned (Government Order, Educational, dated 28th May 1884, No. 297) :—

"But schools aided on the results grant system may receive aid for the fixed monthly stipends of teachers at one-half of the rates fixed, and on the conditions laid down, in Chapter II, provided that ordinarily the results grant earnable by the school shall not exceed 50 per cent. of the rates fixed in article 76."

(6) *Minimum attendance in Muhammadan girls' schools.*—To qualify a girls' school for admission to the list of results schools to be examined for grant, an average minimum attendance of eight pupils in Municipalities during the three months preceding the application for grant was required by the Code. With a view to encourage the establishment of private schools for Muhammadan girls on the results system, the average minimum attendance required in Municipalities was reduced to four (G.O., Educational, 20th June 1884, No. 331).

(7) *Needle-work tests.*—Certain defects having been brought to my notice after the public examinations of 1883-84, in regard to the standards prescribed for tests in needle-work, I appointed a committee of ladies to consider the subject. The committee, of which Mrs. Brander and Misses Carr, Keely, Eddes and Gordon

GENERAL STATISTICS

were members, recommended the following standards, and these were sanctioned by Government in their Order, dated 10th July 1884, No. 383, Educational.

RESULT SCHOOLS.

First Standard.

Hemming or back-stitching.
The hem may be fixed by the teacher.

Second Standard.

Top-sewing and either hemming or back-stitching.
The work to be fixed by the pupils.

Third Standard.

Felling, gathering, back-stitching and darning.

Fourth Standard.

For Europeans and Eurasians.

Cutting out from a pattern and making a chemise, showing gathering, back-stitching, felling, button-hole and band.
Darning on old cloth or stocking-web.

For Native Candidates.

Cutting out from a pattern and making a native woman's jacket and petticoat, showing gathering, back-stitching, button-hole and band.
Darning on old cloth.

Fifth Standard.

Plain—For Europeans and Eurasians.

Cutting out from a pattern and making a simply-shaped night dress.
Neat patching of old cloth.

Plain—For Native Candidates.

Cutting out from a pattern and making a native boy's cap and jacket, showing back-stitching, felling, button-hole and band.
Neat patching of old cloth.

Fancy—For all Candidates.

Ability to work a simple pattern in any one kind of fancy work, and
Ability to mark the English *or* Vernacular letters on canvas or cloth.

Sixth Standard.

Plain—For Europeans and Eurasians.

Cutting out from a pattern and making a European child's frock, showing the same kinds of work as in the fourth standard with the addition of tucks.
Neat patching and darning.

Plain—For Native Candidates.

Cutting out from a pattern and making a native man's short jacket, showing improved work of the kinds mentioned in the fifth standard.
Neat patching and darning.

Fancy—For all Candidates.

Ability to work two or more patterns in one or two kinds of fancy work, and
Ability to mark letters finely on fine cloth.

Seventh Standard.

Plain—For Europeans and Eurasians.

Cutting out from a pattern and making a night dress with a yoke and tucked fronts.
Improved darning and patching.

Plain—For Native Candidates.

Cutting out from a pattern and making a native man's under-jacket.
Improved patching and darning.

Fancy—For all Candidates.

Ability to make finely and neatly, of fancy work, a finished article, such as a bag, sock or scarf, and

Ability in marking as in the previous standard.

Proviso.—No grant will be paid for fancy work to a pupil who has failed to get half marks in plain work.

PUBLIC EXAMINATIONS.

Special Upper Primary Examination.

For Europeans and Eurasians.

Cutting out from a pattern and making a simply-shaped night dress.
Neat patching of old cloth.

For Native Candidates.

Cutting out from a pattern and making a native boy's cap and jacket, showing back-stitching, felling, button-hole and band.
Neat patching of old cloth.

Middle School Examination.

For Europeans and Eurasians.

Cutting out from a pattern and making a night dress with a yoke and tucked fronts.
Improved darning and patching.

For Native Candidates.

Cutting out from a pattern and making a native man's under-jacket.
Improved darning and patching.

The Higher Examination for Women.

For Europeans and Eurasians.

Cutting out from a pattern and making a European shirt.

For Native Candidates.

Cutting out from a pattern and making a native man's long coat.

(8) *Revision of rule regarding grants for furniture.*—The rule regarding the grant for furniture was not sufficiently clear or stringent, as it was found that in certain cases furniture was ordered or supplied in anticipation of the approval of the department and was of inferior design or quality. Rule 94 of the Code was revised as follows to make the matter clear (G.O., Educational, dated 27th August 1884, No. 523):—

"All applications for furniture grants must be accompanied by an estimate in the form given in appendix H and should be submitted to the office of the Director of Public Instruction through the Inspector of Schools of the division. The manufacture of the furniture should not be begun, or any arrangements for purchase completed, in anticipation of the Director's approval. Grants will not be allowed for school benches made without backs. In the event of the estimate being approved and of a grant being sanctioned, the amount of the grant will be paid on the manager's producing satisfactory proof that the work has been duly executed in accordance with the approved estimate. Applications for grants for apparatus, maps, books, diagrams, and examples must be accompanied by a detailed list showing number, description, and price of each article which it is proposed to purchase. If the list be approved and a grant sanctioned, the amount of the grant will be paid on submission of the necessary vouchers that the articles have been supplied. Grants are limited to one-half of the total cost."

(9) *History in the Third and Fourth Results Standards.*—The quantity required by the Code was found unduly great, and the portion was accordingly reduced (G.O., Educational, dated 12th August 1884, No. 467).

(10) *Rewards to wives and widows of Hindu and Muhammadan Masters who have obtained Normal Certificates.*—The code allowed honoraria amounting to Rs.

GENERAL STATISTICS.

60, Rs. 120 and Rs. 240 to the wife or widow of a Hindu or Muhammadan master on her passing for an ordinary certificate of the third, second or first grade. With a view to induce such persons to enter normal schools, the following addition was made to Article 22 of the Code (G.O., Educational, dated 30th October 1884, No. 678).

"The same rewards will be given to students of the same classes who have obtained Normal certificates, provided they have, after passing, been engaged continuously in school-teaching, for two years in the case of third-grade mistresses and for three years in the case of second and first grade mistresses and have worked to the satisfaction of the Inspector."

(11) *Change of the Madras Municipal Year.*—The year of the Madras Municipality having been altered so as to correspond with the official year, the dates prescribed for the submission of applications for results grants and for the preparation and publication of results schools lists were altered so as to be in harmony with the change in the year.

Instruction in Sanitation.

29. In the last Special Upper Primary Examination 1,688 pupils appeared in Hygiene and 1.010 passed. The figures of the previous year were 1,701 examinees and 1,449 passes. The number of pupils who passed in Hygiene under the third and fourth results standards rose from 8 and 1,123 to 134 and 1,433 respectively. The increase under the former head is due to the introduction of Hygiene as an alternative subject for girls as noticed in my last report.

Instruction in Agriculture.

30. No measures were taken during the year to establish any schools or class in the mofussil to impart instruction in agriculture. But the sanctioned scheme for the development of technical and scientific education makes special provision for the encouragement of the subject.

Supply of library and prize books and apparatus

31. Messrs. Baker and Co. continued to be the chief agents for the supply of library and prize books and apparatus.

School libraries.

32. The school libraries which are gradually increasing in size were maintained in good order. The three Government first-grade colleges have now each a consulting library. Certain arrangements were also made in the year for the establishment of a reading-room in each of these colleges to be supplied with copies of all the best scientific and literary journals. The students are required to pay Re. 1 per term for the use of the reading-room. Old students are admitted on payment of double rates.

Museum and exhibitions.

33. The needle-work exhibition held at Pachaiyappa's Hall by the Madras Branch of the National Indian Association was well attended. Government were pleased to sanction a grant of Rs. 50, and this sum was spent in the award of three silver medals. With the progress of technical education, it is to be hoped that in the course of a few years exhibitions of an industrial character will be held in several centres in the provinces. The department should afford substantial encouragement for the holding of such.

Physical training.

34. The progress which is being made in promoting among pupils a love for gymnastic and other physical exercises is satisfactory. Many schools under private management with the help of a Government grant, opened gymnasia during the year; and Forrest's Hand-book of gymnastics is being translated into the vernacular with a view to its introduction into the elementary schools. Almost all the town schools give instruction in gymnastics, and the teachers therein trained will, I trust, create among their pupils a desire for athletic exercises.

Cost of the University.

35. From the annexed balance sheet of the University, taken from the Syndicate's report, it will be observed that there was a closing credit balance of Rs. 23,226-8-1 on the 31st March 1885, against an opening credit balance of Rs. 11,179-10-5. This increase is very encouraging, and there is reason to hope that the University will gradually accumulate a

moderate endowment. Only six years have elapsed since a portion of the cost of maintaining the University was borne by the State.

An Assistant Registrar was appointed during the year to relieve the Registrar of part of his work which had increased considerably.

Receipts.	RS. A. P.	Charges.	RS. A. P.
Opening balance on the 1st April 1885.	11,179 10 5	Salaries of office establishment	6,860 0 0

Books and certificates	5,582 8 4	Contingent expenses	22,403 10 8
			1,00,809 10 8
		Balance on the 31st March 1885 ...	23,226 8 1
Total ...	1,24,036 2 9	Total ...	1,24,036 2 9

Cost of the Departmental Examinations.

36. The fees realized from the candidates for the school management examination amounted to Rs. 290. The expenditure incurred on contingencies aggregated Rs. 30.

Repair of Government Buildings.

37. The Educational Building Fund having become extinct as explained in my last report, the cost of improving and repairing Government school-houses devolved on Provincial funds. This charge, however, does not, except in the case of petty repairs, appear in the accounts of this department, but in those of the Department of Public Works.

Expenditure on Government School-houses.

38. The expenditure incurred on Government school-houses is given below :—

	RS.	A.	P.
Original works and improvements above Rs. 1,000 ...	39,419	4	6
Minor new works	1,322	9	2
Repairs costing above Rs. 1,000	5,885	2	9
Minor repairs	5,119	1	5
Total ...	51,746	1	10

The important original works and repairs carried out during the year were :—

	RS.	A.	P.
Original works—			
School-house at Tekkali Raghunáthapuram	1,084	7	8
Additions to Rajahmundry College	1,750	5	11
Do. to Cuddapah High School	1,423	12	4
School-house at Chittoor	14,266	6	4
Do. at Tiruválúr	3,931	2	1
Additions to the School of Arts buildings	16,963	2	2
	39,419	4	6
Repairs—

Do. Madura College	1,022	3	9
Do. School of Arts	1,539	6	6
Do. Presidency College	1,982	0	9
	5,885	2	9

The Chittoor school-house had been nearly completed at the close of the year.

Building Grants.

39. The building grants paid during the year amounted to Rs. 19,833-12-5 as particularized below. In the budget estimate for 1884-85 a sum of Rs. 25,000 was assigned for such grants, but, owing to

GENERAL STATISTICS.

the sanctioned grants for certain schools not having been taken up, the full provision was not utilized :—

	RS.	A.	P.
Madras Christian College	7,220	0	0
Cocanada Pithápuram Rajah's College	5,958	0	0
Bellary Convent Girls' school	1,200	0	0

Narsápur Taylor High School	94	14	7
Kodavasal Wesleyan Mission School	71	8	6
	19,833	12	5

Local Fund operations.

40. The number of schools maintained by the District Boards at the close of the year was 1,193 with 39,868 pupils against 1,144 schools with 38,662 pupils at the close of the preceding year, and the net cost to the Boards of their schools was Rs. 2,17,967 against Rs. 2,28,225. The diminution in the net cost, viewed in relation to the increase in schools and scholars, indicates that these institutions are becoming gradually self-supporting. The fee revenue rose from Rs. 46,081 to Rs. 71,742. The Local Fund Boards spent, besides the outlay on their schools, Rs. 27,403 on institutions maintained by the department, Rs. 2,76,938 on aided schools in the shape of salary and results grants, and Rs. 1,13,793 on inspection, buildings, and miscellaneous items. The entire net expenditure from Local Funds rose from Rs. 6,30,204 to Rs. 6,36,064, whilst the funds, exclusive of balance, available for education may be set at Rs. 7,71,000, viz., Rs. 6,47,000, one-sixth land-cess, Rs. 71,000 school fees, Rs. 53,000 endowments and other sources.

The receipts and disbursements appertaining to each Board are summarized in Statement VI in appendix. The total receipts amounted to Rs. 10,04,288 including an opening balance of Rs. 2,33,109. The decrease, compared with the receipts of 1884-85 (Rs. 11,22,392), was due to a reduction of about Rs. 94,000 in the amount of the opening balance appertaining to education and also to a diminution in the land-cess receipts. The gross charges aggregated Rs. 6,97,523 against Rs. 6,95,458 in the preceding year. This is, however, exclusive of outlay on medical schools and the contribution to the Medical College.

Municipal operations.

41. The number of institutions directly maintained by Municipalities fell from 134 with 9,185 pupils to 122 with 8,577 pupils. This is the result of the closing of certain elementary schools by certain Municipalities on the transfer of Government middle schools to them, they preferring to aid schools rather than maintain schools directly. The net expenditure of Municipal funds on account of these schools was Rs. 38,563 against Rs. 39,100. The fee-revenue amounted to Rs. 59,568 or Rs. 20,558 more than in 1883-84. The Municipalities spent, besides the above sum, Rs. 12,205 on the departmental schools, Rs. 1,899 on Local Fund schools, and Rs. 11,875 on inspectional and building charges.

Statement No. VII in the appendix gives particulars of the receipts and charges of the different Municipalities, Madras excepted. The total receipts aggregated Rs. 15,12,691, excluding opening balance, Imperial license-tax and debt accounts. The charges amounted to Rs. 2,14,503 or 14 per cent. of the receipts, and if the fees be deducted from both sides, the average percentage of expenditure was 10·6 against 9 in 1883-84.

Total expenditure on education from Provincial and Building funds

42. The entire expenditure on education from Provincial funds is compared in the annexed statement. The figures of 1883-84 include the outlay from the Educational Building Fund.

Expenditure from all sources.

43. General tables II and IV appended to the report give an abstract of expenditure on education from all sources. The percentages of expenditure under the important heads are compared in the following table. There was a slight reduction in the outlay on primary and special schools which is to be regretted. Under 'Direction' and 'Inspection' taken together, there was a slight diminution in the percentage of expenditure. Scholarships and Buildings cost proportionately a larger sum than in the preceding year.

II.—CONTROLLING AGENCIES.

Direction.

47. I was unable to make any tour during the year owing to the pressure of office work, chiefly in connection with the Education Commission report, the scheme for the encouragement of European and Eurasian education, and the revision of the Grant-in-Aid Code. On the abolition of the Government Central Book Depôt, a special branch was constituted in my office with a special assistant and two clerks. My office establishment also was re-organized.

Changes among Inspectors of Schools.

48. There were several changes among Inspectors of Schools. Mr. James Moss was in charge of the first division till September 1884, when he was compelled to proceed to Europe on furlough from illness. The division was temporarily in charge of Mr. Metcalfe, Principal of the Rajahmundry College, till the 6th November 1884, when Mr. George Bickle, who was permanently appointed to the division, assumed charge. Mr. H. Fortey returned from furlough on the 6th August 1884 and assumed charge of the second division from Mr. Bickle. The third division continued to be under Mr. Garthwaite till 8th November 1884, when Mr. Fowler, the permanent Inspector, returned from Europe and assumed charge. Dr. John Bradshaw of the fourth division was on privilege leave for one month and Mr. George Bickle acted for him. Mr. Marden, Inspector of Schools, fifth division, retired on the 2nd May 1884 and Mr. Monro was posted to the division, but acted for Mr. Garthwaite in the sixth division. Mr. T. T. Logan, Head Master of the Bellary College, was in charge of the fifth division. The seventh division continued to be in charge of Mr. E. Marsden.

Work done by Inspectors of Schools.

49. A statement of work done by the Inspectors of Schools is subjoined.

CONTROLLING AGENCIES.

Inspectress of Girls' Schools.

50. During the year there was no change in the range of the Inspectress of Girls' Schools. She examined 130 schools with 4,893 pupils, spent 59 days in examining schools, and was for 24 days on circuit. The number of miles travelled by her was 660. Her charge has been much extended since the close of the year, and a third deputy was given her.

Deputy Inspectors of Schools.

51. There were 64 provincial deputies at the close of 1883-84. During the year under review the Local Fund Deputy Inspector, Vellore, East, was brought on the provincial list, and a fourth deputy was employed in the Tanjore District, the then Negapatam Board having agreed to make the usual contribution of Rs. 1,500 per annum, thus raising the number of deputies at the close of the year to 66.

Work done by Deputy Inspectors of Schools.

52. The annexed statement gives particulars regarding the work done by the deputies. Each deputy examined on an average 269 schools having 5,326 pupils, spent 190 days on circuit, and travelled 1,646 miles. In my last report, I alluded to the unduly heavy charges of certain deputies, and, since the close of the year, Tinnevelly and Godávari have had an additional deputy sanctioned for them, and the Inspectress of Girls' Schools had a third deputy given her. I trust that ere long Ganjam and Vizagapatam will each have a fourth deputy. In some other districts also this agency needs strengthening.

Name.	Range.	Number of schools examined.	Number of pupils examined.	Number of days spent in		Number of Sundays and holidays and days of absence on leave.	Number of days spent on circuit.	Number of miles travelled.

Deputies to the Inspectress of Girls' Schools.

53. There was no change in the number of deputies under the Inspectress of Girls' Schools. P. Venkataramayya, who was acting in the southern circle, reverted to his place, and R. Swaminatha Aiyar was appointed in his stead.

Work done by the deputies to the Inspectress of Girls' Schools.

54. The work done by the two deputies of the Inspectress of Girls' Schools is given in the following statement:—

Name.	Range.	Number of schools examined.	Number of pupils examined.	Number of days spent in		Number of Sundays and holidays and days of absence on leave.	Number of days spent on circuit.	Number of miles travelled.
				Examining schools.	Other work			
Miss S. Govindarajulu ..	Third division and South Arcot.	147	6,414	74	159	61	76	1,988

	Total	405	13,393	261	286	111	369	5,957

Inspecting Schoolmasters.

55. The annexed statement shows the number of Inspecting Schoolmasters by districts:—

District.	1883-84.	1884-85.	District.	1883-84.	1884-85.
Ganjam	6	7	North Arcot	2	1
Vizagapatam	6	6	Salem	10	9
Godávari	10	10	Tanjore	14	14
Kistna	12	12	Madura	11	10
Bellary	6	6	Tinnevelly	3	3
Anantapur	4	1	Trichinopoly	6	6
Cuddapah	5	5	Coimbatore	10	10
Kurnool	4	4	Nílgirí	1	1
Nellore	7	6	Malabar	17	16
Madras	3	3	South Canara	3	3
Chingleput	6	6			
South Arcot	7	4	Total ...	153	143

The total number fell from 153 to 143. Of these, one was paid from Provincial funds, 29 from Municipal funds, and the rest from Local funds.

Superintendents of Hill Schools.

56. There were two Superintendents of Hill Schools—one in Ganjam and the other in Vizagapatam. These officers are of similar standing as Inspecting Schoolmasters, and they work under the direct supervision of the Special Assistants in charge of the Hill tracts.

Superintendents of schools and groups of schools.

57. The Ganjam Board employed a Superintendent to look after the progress of the Tekkali primary school, and the Kimedi estate authorities employed a similar officer to supervise estate schools. Ten municipalities employed teachers in Government or private schools to supervise the schools in those municipalities on payment of honoraria. As the employment of this class of officers is less costly than the employment of Inspecting Schoolmasters, it is probable that other municipalities will gradually prefer the former to the latter agency.

III.—UNIVERSITY EDUCATION.

Changes in bye-laws.

58. Several additions to and modifications of bye-laws and regulations were made during the year. The fees for the Matriculation, F.A., and B.A. Examinations were raised from Rs. 10, Rs. 20, Rs. 30 to Rs. 12, Rs. 24, Rs. 36, respectively, early in the official year, and the appointment of an Assistant Registrar, which was one of the objects contemplated in raising the fees, was carried out in the autumn, the necessary changes of and additions to

UNIVERSITY EDUCATION.

the bye-laws receiving the sanction of Government. In place of the committees annually appointed to select text-books for the various examinations, there have been instituted Boards of Studies, consisting solely of Fellows of the University possessing special qualifications in the respective branches of knowledge and with a settled organization and defined duties and responsibilities. The bye-laws regarding these Boards were approved by Government in February 1885. The Boards, it is believed, will be of great help not only in the selection of text-books, but also in assisting the Syndicate to dispose of questions demanding the special knowledge of experts. The revision of the bye-laws and regulations relating to the examinations in Medicine, which has been under consideration since the middle of the year 1882, was concluded after full and lengthy discussion by the Senate of the original and supplemental reports of the Faculty of Medicine, and received the sanction of Government towards the close of the official year. At the request of a large number of gentlemen connected with higher education, the Senate resolved to institute a Degree in Teaching and to consider in committee the very elaborate scheme submitted to them. The Senate also had under consideration certain proposals with regard to the B.A. Examination originally brought forward by me with a view to secure the following ends:—(1) The entire separation of the Language Examination from the examination in the Optional Branches; (2) the extension of study in the Optional Branches by permitting candidates to appear for examination in more than one branch; (3) the creation of a modified form of Pass Examination by providing that candidates passing in the third class shall be arranged in alphabetical order. The changes in the bye-laws required to carry out these objects have been adopted by the Senate in committee and awaited at the close of the official year merely the final confirmation of the Senate. The scheme of studies and examinations for the proposed Bachelor of Science Degree remains where it was at the close of the previous year. The Faculty of Law has not yet completed the revision of regulations for the Law examinations, which was begun about the middle of 1881.

Convocation of graduates.

59. The proposal to constitute a convocation of graduates, which was adverted to in the last annual report, has failed to commend itself to the Government of India, who have suggested that the objects in view might to a certain extent be attained if a larger number of graduates of standing were appointed Fellows of the University.

Affiliated institutions.

60. The number of affiliated institutions remained at 43, the same as in the previous year, there being no additions and no withdrawals.

University Fee Fund.

61. The balance in favor of the University at the close of the year was Rs. 23,633, or more than double the amount of the balance on the 31st March 1884. The fees from candidates amounted to Rs. 1,07,274, and books and certificates yielded Rs. 5,582. The charges aggregated Rs. 1,00,810, of which Rs. 5,249 represent remuneration paid for the first time to the Superintendents of Examinations. This was another of the objects in view in raising the fees for the Matriculation, F.A., and B.A. Examinations.

University examinations.

62. The number of candidates registered for the different examinations fell from 6,966 to 6,855, the number of examinees from 6,848 to 6,737, the number of passes from 2,460 to 2,226, and the percentage of passes from 35·9 to 33·05. The decrease in the number of candidates appertained chiefly to the Matriculation and F.A. Examinations, and is to be explained mainly by the circumstance that the examinations of the previous year, being the last held under the old curricula, attracted an unusually large number of candidates.

University endowments.

63. The Hon. Mr. Justice Muttuswami Aiyar, B.L., C.I.E., contributed Rs. 1,000 for the annual award of a prize under the designation of "the Carmichael Prize." The endowments of the University since its foundation aggregated Rs. 51,600, which gives an annual average of Rs. 1,843. All the prizes and endowments were awarded, with the exception of Rajah Sir T. Madhava Rau's F.A. and Matriculation prizes,

(a) ARTS.

M.A. Degree.

64. Sixteen candidates were registered for the M.A. Examination of January 1885. Of these 13 appeared—3 in Branch I, 1 in Branch II, 3 in Branch III, 2 in Branch IV, and 4 in Branch V. Nine candidates were successful—1 in the first class, 3 in the second, and 5 in the third. These results compare very favorably with those of past years.

B.A. Degree.

65. The general results of the B.A. Degree Examination are summarized below. The number of examinees as well as that of passes rose by 6 per cent. and the percentage of passes from 47·6 to 47·7. The increase in examinees and passes chiefly appertains to institutions under private management.

General results.		Public institutions under the Madras Government.	Public institutions in Native States.	Public institutions under private management.	Private study.	Total.
Examined ...	1883-84	149	38	134	13	334
	1884-85	123	39	174	18	354
Passed—						
First class .	1883-84	..	...	1	...	1
	1884-85	1		1	...	2
Second class.	1883-84	40	9	25	1	75
	1884-85	30	8	26	1	65
Third class ...	1883-84	38	11	32	2	83
	1884-85	37	7	54	4	102
Total ...	1883-84	78	20	58	3	159
	1884-85	68	15	81	5	169

It will be observed that the number of entrances for and passes in the last B.A. Degree Examination was greater than in any preceding year, though the percentage of passes to examinees was not so high as in some previous years.

An analysis of passes during the last three years is given below :—

Analysis of passes.	1882-83.	1883-84.	1884-85.
Number examined	221	334	354
Number passed in—			
English	166	235	237
Optional language	211	324	344
Optional subject	167	240	292
Mental Philosophy	177	268	249
History	182	237	270

There was improvement except under English (proportionately) and Mental Philosophy. Only 10 out of 354 candidates failed in the optional language. The proportion of success in the optional subject is satisfactory, being over 80 per cent.

The results of the examination in the several optional subjects are given in the annexed table :—

Years.	Logic and Morals.		Mathematics.		Physical Science.	
	Examined.	Passed.	Examined.	Passed.	Examined.	Passed.
1879-80 ...	107	46	50	24	18	15
1880-81 ...	115	62	65	41	15	10
1881-82 ..	148	102	77	71	36	34
1882-83 ...	125	96	43	25	53	45
1883-84 .	165	123	59	48	110	69
1884-85	152	128	62	40	140	126

A glance at the figures of the last two years in the above table points to the conclusion that the standards adopted in the optional subjects are not uniform from year to year. In 1884-85, 64 per cent. of the candidates in Mathematics were

UNIVERSITY EDUCATION

successful, 84 per cent. of those in Logic and Morals, and 90 per cent. of those in Science. In 1883-84 the percentages were respectively 81, 75 and 63, that is, the results of 1883-84 and 1884-85 are in an inverse order. In the case of Logic and Morals a considerable variation is ordinarily expected on account of the less definite nature of those subjects. But here we have the remarkable fact that the exact sciences and their near allies vary much more from year to year in their standards than do Logic and Morals. The steady and rapid increase in the number of students taking up Physical Science is a pleasing feature, and it would be all the more so were it accompanied by an increase in the number of those taking up Mathematics. It must never be forgotten that the mathematical sciences are indispensable to Physics and Chemistry, and a system of education which pushes the latter rapidly forward without securing a corresponding advance in the former may be compared to a house built on the sand instead of on a rock. I set the very highest value on Mathematics as an educational agent in disciplining the mind; but it is not on that ground alone or mainly that I deplore the present neglect of this branch of knowledge, accounts of which reach us from all quarters, from the middle school up to the first-grade college. I deplore this neglect because I foresee the time when it will be impossible to get teachers for our schools with a sufficient knowledge of Mathematics, or qualified assistants for those branches of the public service where considerable mathematical attainments are absolutely essential. But, above all, do I deplore the neglect of Mathematics in the interests of the Physical and Natural Sciences themselves. We are on the eve of an important movement for the development of technical instruction throughout the Presidency, and I feel sure that however rapid may be the progress for a time, the movement will speedily languish unless accompanied *pari passu* by thoroughly sound instruction in Mathematics.

The permission now accorded to students for the B.A. degree to appear in more than one optional branch will probably tend to encourage Physical Science students to qualify in mathematics also.

The results of the examination in the various optional languages are summarized below :—

Languages.	Examined			Passed.			Percentage of Passes.		
	1883	1884	1885	1883	1884	1885.	1883.	1884	1885
Sanskrit	33	53	52	28	50	51	85	94	98
Latin	10	8	12	10	7	10	100	88	83
Greek	.	1	...	.	1	...	...	100	..
Persian	2	3	3	2	3	3	100	100	100
Tamil	97	166	181	93	164	179	96	99	99
Telugu	32	33	34	32	31	29	100	94	85
Canarese	14	22	26	14	20	26	100	91	100
Malayalam	31	45	42	30	45	42	97	100	100
Hindustani	2	3	3	2	3	3	100	100	100
Uriya	..	.	1	...	..	1	...	...	100
Total ...	221	334	354	211	324	344	95	97	97

Latin and Telugu excepted, the percentages either remained stationary or improved. Of the 10 failures, 1 was in Sanskrit, 2 were in Latin, 2 in Tamil, and 5 in Telugu. One Uriya candidate graduated during the year. He is the first Uriya graduate in the University. No candidate brought up Greek.

A detailed list of the institutions from which the candidates appeared is appended:—

Institutions.	1883-84.					1884-85.

About a-third of the candidates and passes belonged to the Madras Christian College. The Presidency College comes next and with a slightly higher percentage of passes. The Kumbakónam College passed two-thirds of the candidates it sent up, and a pupil from this institution headed the list. The Trivandrum Maharajah's College did not do as well as usual. The Trichinopoly S. P. G. and the Vizianagrum Maharajah's Colleges sent up pupils for the first time for the Degree examination, the former institution passing seven out of thirteen pupils, while the latter passed but one pupil.

F.A. Examination.

66. The results of the First Examination in Arts are summarized in the annexed statement. The number of examinees and passes fell from 1,110 and 501 to 1,011 and 368 respectively, or by 9 and 27 per cent. The decrease in examinees extends to all classes of institutions, those in Native States excepted, while the decrease in passes extends all round, the largest numerical decrease appearing under "Public Institutions under the Madras Government."

General results.		Public institutions under the Madras Government.	Public institutions in Native States.	Public institutions receiving aid.	Public institutions not receiving aid.	Private study.	Total.
Examined ...	1883-84	363	164	458	76	49	1,110
	1884-85	302	174	449	59	27	1,011
Passed—							
First class ...	1883-84	8	6	13	...	...	27
	1884-85	30	17	37	3	1	88

UNIVERSITY EDUCATION.

1879-80	51
1880-81	35
1881-82	58
1882-83	36
1883-84	45
1884-85	36

The percentage of passes during the last six years is given in the margin, from which, it will be observed, that the percentage fell to the level of 1882-83 and 1880-81, bearing out what was said in the two preceding reports about the alternation of a year of failure with a year of success.

An analysis of passes is given below. The number of passes in English rose from 728 to 764 in spite of the fall in the number of examinees from 1,110 to 1,011. This fact probably points not to greater care bestowed in the teaching of English but to the easier standard of the examination, just as the smaller percentage of passes in the optional languages is probably the result of the adoption of a higher standard. Under "History" and "Mathematics" there was a heavy fall. Logic was introduced into the examination for the first time as a compulsory subject. The number of passes in the new subject was the highest, and is very creditable.

Analysis of passes.	1882-83.	1883-84.	1884-85.
Number examined	783	1,110	1,011
Number passed in—			
English	433	728	764
Optional language	728	1,025	866
History	597	805	601
Mathematics	458	784	556
Physiology	686	982	863
Logic		...	880

The results of the examination in the various optional languages are summarized below :—

Languages.	Examined.			Passed.			Percentage of Passes.		
	1882.	1883.	1884.	1882.	1883.	1884.	1882.	1883.	1884.
Sanskrit	117	175	165	102	124	100	87	71	61
Latin	17	26	40	16	20	24	94	77	60
Persian	5	5	7	5	4	7	100	80	100
Tamil	358	510	440	341	501	407	.95	98	92
Telugu	104	155	142	101	142	115	97	92	81
Canarese	67	84	93	65	80	91	97	95	99
Malayalam	112	150	118	96	149	116	86	99	98
Hindustani (Urdu)	2	4	5	1	4	5	50	100	100.
Uriya	1	1	1	1	1	1	100	100	100
Total ...	783	1,110	1,011	728	1,025	866	93	92	86

All the candidates that appeared in Persian, Hindustani and Uriya were successful, and in Canarese there was an improvement in the proportion of passes. There was more or less decrease in the percentage of passes under all other languages. If the standards were not materially raised, the decrease in the percentage of passes under Sanskrit and Latin is to be regretted. A detailed list of the institutions from which candidates came up is appended. The Kumbakónam College heads the list of Government institutions with 34 passes. The Presidency College comes next with 22 passes. These results, however, compare unfavorably with those of the previous year. The Salem College passed but 3 pupils though 8 were sent up, and the Berhampore College did very much worse, having passed 1 pupil only out of 10 sent up. Of the colleges in Native States, the Hyderabad College did the worst, having passed but 1 pupil out of 15. The Shimoga School sent up 7 pupils and passed 1. The Madras Christian College sent up the highest number of students (136), but passed only 51, giving a percentage of 37·5. The St. Mary's Seminary presented 6 pupils for the first time, but all of them failed.

Europeans	1	·7		...	4	·8	7	1·9
Total .	159	...	169	...	501	...	368	...

UNIVERSITY EDUCATION.

In the B.A. Degree Examination, the proportion of Brahmans to the total number of passes fell from 75·4 to 60·9, while in the F.A. Examination the proportion remained almost stationary. Two Muhammadans passed the B.A. Examination against none in the previous year, but in the F.A. Examination only 2 passed against 5 in 1883-84. The proportion of Native Christians improved in both the examinations.

Attendance in Colleges for general education.

68. The attendance in English Arts Colleges during the last five years is compared in the subjoined statement :—

Total English Colleges ...	...	296	1,225	399	1,295	454	1,606	526	1,649	569	1,946

The number of first-grade colleges, though remaining nominally the same, really fell from 9 to 8, owing to the non-existence of B.A. classes in the Doveton Protestant College on the 31st March last. If this institution be added to the list of second-grade colleges their number will be 22 as against 21 in the previous year.

The strength of the B.A. classes rose from 526 to 569, or by 8 per cent., and that of the F.A. classes from 1,649 to 1,946, or by 18 per cent. The increase under the former head would have been much greater had it not been for the comparatively poor results of the last F.A. Examination as noticed elsewhere. The

improvement in the strength of the F.A. classes, the number of collegiate institutions remaining unchanged, tends to show that the introduction of the new system of fees has not had the deterring effect on pupils which it has been supposed to have. A glance at the list will show that the increase in attendance extends to all institutions with some five or six exceptions, and even here the decrease is very slight. The advantages of the term-fee system are manifold, and as people get accustomed to it the difficulties which now seem to beset it will disappear, and those parents and managers who hitherto have looked upon it with more or less of disfavour will come to regard it with approval.

Classes of the community to which the college pupils belonged.

69. The table annexed exhibits in detail the classes of the community to which the college pupils on the 31st March belonged as contrasted with the total figures for 1879-80:—

Colleges.	Europeans and Eurasians.	Native Christians.	Muhammadans.	Brahmins.	Vaisyas.	Sudras.	Other Hindus.	Others.	Total.
Government	6	17	20	660	17	169	1	5	895
Aided	27	149	29	952	48	266	14	3	1,488
Unaided	...	...	...	82	1	42		7	132
Total ...	33	166	49	1,694	66	477	15	15	2,515
1879-80	33	72	23	1,038					1,166

As in last year, two-thirds of the students attending colleges are Brahmans. The percentages of Sudras and Native Christians show a slight falling off, while the increase under Muhammadans and other classes of the community, Europeans and Eurasians excepted, is encouraging. It will be seen that in the five years the most notable advance is that of Native Christians, and it is also satisfactory to find that the progress of Muhammadans has been as rapid as that of Hindus.

Distribution of college pupils according to wealth.

70. The subjoined table gives the distribution of college pupils according to wealth:—

Colleges.	Richer classes.	Middle classes.	Poorer classes.	Total.
Government	41	467	387	895
Aided	31	993	464	1,488
Unaided	3	81	48	132
Total ...	75	1,541	899	2,515

The percentage of pupils belonging to the middle classes (defined as in last year's report as comprizing all whose parents or guardians have an annual income ranging between Rs. 200 and Rs. 5,000) rose from 60 to 64, while that under poorer classes has remained nearly stationary. There is a decrease in the representation of the richer class. Only one pupil in thirty-four is returned as belonging to the class represented by incomes of Rs. 5,000 and upwards. This proportion seems much too low.

Classification of college pupils according to the occupation of parents or guardians.

71. The following table gives the classification of pupils according to the chief occupation of their parents or guardians:—

Colleges.	Officials.	Petty officials and menial servants.	Traders.	Landholders.	Artizans.	Coolies.	Mendicants.	Others.	Total.
Government	247	132	36	410	5	4	10	51	895
Aided	486	118	151	587	6	...	7	133	1,488
Unaided	39	18	10	65	...	...	...	...	132
Total ...	772	268	197	1,062	11	4	17	184	2,515

UNIVERSITY EDUCATION.

The largest proportion of pupils consisted, as in the preceding year, of the sons of landholders, being 42·2 against 39 per cent., while next to them come the sons of officials, petty officials, and menial servants, whose percentage was 41·1 against 40. The lamentably low figures under the heads "Traders" and "Artizans," which formed the subject of some remarks last year, have decidedly improved, while those under "Mendicants" and "Others" have fallen. The sons of coolies number 4 against 1. Comparing the pupils in Government and aided colleges, 42·3 per cent. of the sons of officials, petty officials and menial servants were reading in the former, while 40·6 per cent. of the same classes were reading in the latter. The percentages of last year were 40·8 and 39·4.

First-grade Colleges.

Presidency College.

72. The strength of the College on the 31st March 1884 was 295 against 265 on the same date in the year preceding. The increase, it is satisfactory to note, was not confined as in 1883-84 to the B.A. classes, but included the F.A. classes also. The policy noticed in the last year's report of limiting the work of the institution to the University arts course was given full effect to at the close of the year.

The re-organization scheme was approved and, so far as their financial powers permitted, sanctioned by Government in January 1885. The portion of the scheme relating to the creation of a Natural Science Professorship and of a staff of senior Assistant Professors now awaits the final sanction of the Secretary of State, to whom it has been submitted by the Government of India. The College will thus be enabled to educate students for each of the five optional branches of the B.A. examination. No provision has as yet been made for giving instruction to students for the M.A. degree, but it is hoped that in course of time, without great additions to the present staff, this defect in the educational system of the Presidency may in part be supplied by this institution.

The following extract from my letter to Government gives information regarding the scheme, which it may be well to record in this form:—

In G.O., dated 11th January 1884, No. 10, Educational, the Government sanctioned the abolition of the lower secondary classes in the Presidency College. In paragraph 3 of the letter read in that order, I stated that, in reorganizing the institution in view of rendering the departments of the college thoroughly efficient and capable of dealing satisfactorily with the revised arts curriculum, I contemplated the entire abolition of the school department, *i.e.*, the upper secondary as well as the lower secondary classes, in order to provide funds for the purpose. I also noted (paragraph 5) that this proposal was in accord with the policy of the State.

Accordingly, in July last, in anticipation of the sanction of Government, on the application of the Principal, I approved the closing of the fifth class, and now request sanction for the abolition of the remaining class (sixth) from the 31st December.

The abolition of the two secondary departments sets free Rs. 748-12-0 according to the scale sanctioned in G.O., Educational, dated 3rd July 1880, No. 255, and Rs. 736, according to the present actual cost including the temporary appointment of Assistant to the Professor of Physical Science.

I have now the honor to request the sanction of Government to the following proposals:—

(*a*) In place of the present establishment of (1) an Assistant Professor of English and Mathematics, (2) a Superintendent of Vernaculars, (3) a temporary Assistant to the Professor of Physical Science, (4) six English schoolmasters, and (5) nine pandits, to appoint (1) three senior Assistant Professors, (2) four junior Assistant Professors, and (3) seven pandits.

(*b*) To grade the assistants according to scale hereafter noted and to arrange the pandits, clerks, &c., in two classes.

(*c*) To give to the three senior assistants the rank of gazetted officers, a rank at present enjoyed by the Assistant Professor of English and Mathematics only.

(*d*) To change the designation of the Professor of Sanskrit to that of "Professor of Sanskrit and of Comparative Philology."

(*e*) To create a chair of Natural Science and Biology.

(*f*) To permit the Principal to form special classes as the demand arises for teaching Latin, French, German, Drawing or any other subject approved by the Director of Public Instruction, the teacher being remunerated by fees paid by the pupils to be collected and paid over by the College authorities supplemented by an allowance from Government not exceeding the income derived from fees each month.

(*g*) To constitute the Professors of the College a Council under the presidency of the Principal.

UNIVERSITY EDUCATION.

The necessity for assistance required by the Professors is fully explained by Dr. Duncan in the enclosed letter (23rd April 1883), and I need not recapitulate what he has there stated. Since, however, he wrote that letter the college has risen in strength from 254 to 275, and in a subsequent communication he has pointed out to me the absolute need of a second assistant in English. If English, which is the subject demanding the greatest labor and time on the part of both Professors and students, is to be taught as satisfactorily as it should be to such a large body of students, it is clear that it cannot be done by two teachers; for it is in this subject that the students require the most constant exercise in literary work and tutorial supervision. I have accordingly assigned one extra junior assistant for the work. The principle on which Dr. Duncan desires to work is to afford the Professor time for original research and extended study and not to burthen him, as now, unduly with mere tuitional functions, these tuitional functions being performed by the assistant, who will also be required to lecture to the junior classes. It is, I take it, a grave defect in our educational system, in a country where original work and research are so necessary for the advancement and welfare of the people, that we reduce our Professors to mere tutors or class masters. I do not wish to relieve them of a fair amount of actual teaching, and a reference to Dr. Duncan's figures will show that this is not intended; but I desire to lighten that burthen so far as is reasonable, so that their minds may be free and elastic and their enthusiasm not quenched by the never ending routine of class work. This freshness of intellect is all the more necessary now that the University has determined to encourage excellence in a few subjects rather than an average standard of knowledge in many. No appreciable extra expense is involved, whilst the immediate financial effect will be a slight saving. In proposing this staff of assistants to aid the Professors I think it undesirable that each assistant should have the special subject or subjects in which he will afford instruction attached to his office, as I conceive it better to leave the Principal free to utilize each assistant in teaching the branch or branches of knowledge in which he is most proficient. In such subordinate offices the attachment of special function to each office often creates obstruction and leads to anomalous positions.

It will be observed that I propose to include in this group the Superintendent of Vernaculars. The duties of this officer are to aid in the teaching of the vernaculars and also to supervise the work of the pandits. In the reorganization of the college I propose to place the oriental languages generally under the control of the Professor of Sanskrit, whose designation I propose to alter, and to afford him in that work like other Professors a superior assistant to aid him in the advanced language and philological work as well as in the supervision of the pandits. The financial position of the officer will be benefited by the change as now his appointment is separate, whilst under the arrangements proposed, he will fall into a graded list. I recommend the employment of seven pandits. In Dr. Duncan's letter he omitted the Sanskrit pandit, but in a communication recently received he has reconsidered that recommendation and in his final opinion I concur in view of the rapidly increasing number of students taking up Sanskrit and of the philological work Dr. Oppert will have to perform.

The existing staff, school and college, stands thus compared with that I propose :—

—	Existing actuals.			Sanctioned average estimate.			—	Proposed salary.		Average.		
	Rs.	A.	P.	Rs.	A	P.			Rs. Rs.	Rs.	A.	P
1 Assistant Professor .	350	0	0	350	0	0	3 Senior Assistant Professors.	1 on	300 to 400	362	8	0
1 Superintendent of Vernaculars	240	0	0	262	8	0		2 on	200 to 300	525	0	0
1 Assistant to Professor of Physical Science.	100	0	0	100	0	0	4 Junior Assistant Professors.		Rs. A. P.			
								1 on	175 0 0	550	0	0
								1 on	150 0 0			
								1 on	125 0 0			
								1 on	100 0 0			
1 Master	200	0	0	156	4	0						
1 Do.	150	0	0	156	4	0						
1 Do. .. .	96	0	0	108	12	0	7 Pandits ...					
1 Do.	90	0	0	108	12	0	1 Librarian ...					
1 Do.	60	0	0	72	8	0	1 Clerk		Rs. Rs.			
1 Do ...	40	0	0	46	4	0	1 Gymnastic Instructor.	4 1st class ...	60 to 80	290	0	0
1 Pandit	70	0	0	72	8	0		6 2nd class ...	40 to 60	315	0	0
1 Clerk	70	0	0	60	0	0						
1 Pandit .	64	0	0	72	8	0			Total ...	2,042	8	0
1 Do .	55	0	0	60	0	0						
3 Pandits, at Rs. 50 ...	150	0	0	180	0	0						
2 Do. at Rs. 42 ...	84	0	0	92	8	0						
1 Pandit ...	35	0	0	33	2	0						
1 Librarian and Writing master.	30	0	0	72	8	0						
1 Gymnastic Instructor.	20	0	0	30	0	0						
Total ...	1,914	0	0	2,034	6	0						

Thus the average cost of the proposed subordinate staff is Rs. 128 above the present actuals, but only Rs. 8-2-0 in excess of the sanctioned scale including the temporary appointment in the Science branch. In classifying these assistants as well as the pandits and clerk, I have adopted scales of pay which will be incorporated in the general scheme of grading the

UNIVERSITY EDUCATION.

subordinate education service now in preparation, so that the adoption of the scheme now proposed will fall naturally into the larger measure. Its adoption will necessitate provision being otherwise made for two masters and two pandits only. Possibly the services of two pandits may have temporarily to be dispensed with.

I propose to make the senior assistants gazetted officers, because I think it desirable to give as high a status as possible to educational officers doing superior literary work. Moreover, the only officer of the class now in the college enjoys this rank.

As regards the proposal to change the designation of the Professorship of Sanskrit to that of "Professor of Sanskrit and of Comparative Philology," I beg to refer to the Proceedings of Government, 8th September 1865, No. 245, Educational, in which are recorded the papers connected with the creation of the Sanskrit chair. It will be observed that prior to the creation of the chair there was a chair of Sanskrit and of Vernacular literature. The chairs were then divided and subsequently in 1878 the chair of Vernacular literature was reduced to the office of Superintendent of Vernaculars. The arrangement seems to me anomalous as a South Indian vernacular may still be brought up as a second language for the B.A. degree examination. Whilst in the new scheme of the M.A. degree examination, the Dravidian languages constitute a group in which a candidate may appear alone in the VI branch language. I would sooner, were funds available, raise the office to a professorship, but this is not at present practicable. I think therefore the best course is to place the oriental languages taught in the college under the Professor of the great Indian classical language with which the Dravidian literature is so intimately connected and to replace the office by an Assistant Professorship. These languages to be taught satisfactorily in an advanced stage must be taught in their relation to the Sanskrit language and literature which is the most efficient means of enriching and developing them. Moreover in the present scheme, Arabic and Persian are left simply to munshis, although these languages deserve a special superior teacher. But, as this is not practicable at present, I think the best arrangement is to place those munshis under the supervision of the Professor whose work is most intimately connected with the study of eastern languages in use in India. In suggesting the change in the designation of the Sanskrit chair, I have not only these considerations in view, but also the fact that Ethnology and Comparative Philology in their historical bearings form the first subject of the History branch (V) of the new B.A. course, and that it will be necessary to entrust to the Sanskrit Professor the conduct of the instruction therein. The proposed extension of his designation will, I think, suffice to cover the duties he will have to perform, viz., to teach Sanskrit and Comparative Philology and to direct the study of the South Indian Vernaculars and of Arabic and Persian.

The next proposal, which I submit for the favorable consideration of Government, is the creation of a chair of Natural Science and Biology. This proposal was made in my letter, No. 6397, of 3rd September 1884, the proposals made in which have received the general approval of Government. The Presidency College has now the means of teaching Branch II of the new B.A. course, *i.e.*, Physical Science, but it has no means of teaching Branch III, Natural Science, which includes general Biology and one of the following sciences at the option of the candidate, Botany, Animal Physiology, Zoology, Geology. It is, I think, unnecessary for me to enlarge on the fact that unless this branch of the arts course is efficiently taught in this Presidency, no adequate development of scientific and technical education can take place, for men must be educated to teach these subjects before the knowledge can spread through the country. The indirect benefits which may accrue therefrom to the welfare and happiness of the people seem to me so vastly to outweigh the small expense involved, that I hope the proposal may be at once approved by Government and recommended for the sanction of the Secretary of State, and that along with the application for sanction may be forwarded a requisition for a suitable Professor so that the course may be begun early in 1885. For the office I propose that an additional fourth class graded appointment be created. The average cost is Rs. 666. But this figure could not be reached for three years. I can name no saving to meet the new charge, but I believe that the Government may rely on an average increase in the fee revenue of the Presidency College which will suffice to meet half the charge and possibly the whole. An increase of 50 students would suffice to meet half the first charge at present fee rates which are still, in my opinion, unduly low in Arts College classes.

In making the proposal regarding special classes, I have in view the expediency of encouraging young men possessing marked ability to extend the range of their studies beyond the usual groove and also to provide for certain students, *e.g.*, Eurasians, facilities for learning languages which may be necessary for their future life, *e.g.*, Latin, French or German, all which languages are now recognised by the local University. Moreover, I think that the time is not far distant when resort to European universities during the final stage of the Arts course will be more frequent than now. The proposal involves no present outlay, and when acted on, the expenditure will for a considerable time be but small, but I think it prudent whilst the college is being reorganized to provide for such a development. Such provision will probably hasten the consummation of the end desired.

The final proposal for which I solicit the sanction of Government is the constitution of a College Council similar to that existing in the Medical College where it has worked with success. The creation of such a body will, I believe, be acceptable to both Principal and Professors. Dr. Duncan already to some extent is practically working the College adminis-

tration in this way, but it will be well to give such an institution a recognised position in the College scheme. Such a body will, I believe, tend to create the idea of a "Collegium" in the minds of the people, an idea which can hardly be said to exist as yet in connexion with institutions for Western education in India. In making this proposal I do not in the least wish to weaken, but rather to strengthen, the position of the Principal, and accordingly would continue to hold him absolutely responsible in all matter of discipline and of executive administration, and would leave it with him to assemble the Council for counsel and advice when he thinks right, and to refer to it only such matters as he considers desirable, except when ordered by the head of the department to refer questions for consideration. This is the practice in the Medical College. The creation of such a body will, I hope, have the double advantage of giving the Professors a deeper interest in the welfare of the College and of familiarizing them with matters of general administrative importance.

The usual statement showing the distribution of pupils on the 31st March in the Presidency and Madras Christian Colleges, as also the number of students studying in colleges in the districts and Native States from which students appear for the University examinations in arts, is given below. It will be observed that there were 330 Madras students in its colleges against 284. This number was however exceeded by Tanjore, which takes the lead by having 463 students in its colleges. And as in the preceding year Trichinopoly follows Tanjore. The number of Malabar students was 212. All the other districts, with the exception of Vizagapatam, the Native State of Pudukóta and Ceylon, show an increase of students. One student came from Belgaum.

The attendance in the colleges at Madras including mofussil students is 984, showing an increase of no less than 174 students against an increase of 197 in mofussil colleges. The growing tendency of mofussil students to join the superior Madras colleges is very satisfactory, and goes to prove what I have frequently stated that the development of district colleges must indirectly benefit the Madras colleges; these colleges have thus extended sources of supply for their B.A. classes. The Tanjore district shows advance in the number of students in its colleges, and, with the exception of Vizagapatam, no district shows a falling off, and in only one or two are the numbers stationary. The districts which have no colleges, Anantapur excepted, show a marked improvement in the number of their students in the Presidency College.

UNIVERSITY EDUCATION.

Of the students in local colleges only 168 against 183 in the preceding year were in the senior or B.A. department, whilst in the Presidency and Christian Colleges the numbers were 183 and 218, showing an aggregate increase of 58 students. In view of the heavy cost of living at the Presidency this advance is especially noteworthy, as indicating that the people will not practise economy at the expense of educational advantages. I would add that the equalizing of fees throughout the Presidency has, as was expected, to some extent told in favor of the Madras colleges, which at present are only weighted by the heavy cost of living at the Presidency town.

To these causes may be added the establishment of the Students' Home attached to the Christian College, and there is no doubt students will be further attracted if a boarding house in connexion with the Presidency College be established as has been proposed.

The College appears to have worked very satisfactorily during the year under report. The following extracts are taken from my review of the Principal's report on the working of the College :—

The year was marked by the re-organization of the college and by the abolition of the remaining classes of the school department. The college in future will have to depend solely upon the high schools of Southern India for its students. Not long ago such a radical change might have imperilled the efficiency, if not the very existence of the institution, but with the great advance that has recently taken place in the character of secondary instruction and in the number of schools teaching to this standard, the Director believes that the institution will not only be able to stand without the support of a school department, but that its efficiency will be increased and its importance in the country enhanced by the new departure.

As regards the Assistant Professors, the Director trusts that the principle of the re-organization will ever be borne carefully in mind, that, whilst the privilege of giving instruction independently may be accorded to them, their most important office is that of assisting the Professors in tutorial and class work. The instruction of the F.A. classes must on no account be delegated farther than is absolutely necessary to the Assistant Professors, for every student should have, during the whole of his University course, the full benefit of superior professorial teaching.

It is hoped that arrangements for constituting the council have been perfected ere this.

The attendance in each branch has improved, but the improvement in the B.A. classes is very marked. This is partly due to the cause mentioned by Dr. Duncan, but the chief reason is probably the increasing desire to obtain the Arts Degree. If this is so, the change is satisfactory, as the practice hitherto prevailing of exalting the F.A. certificate into a minor Arts diploma is very objectionable.

The success obtained in the University Examination was on the whole very creditable, but the practice of including in the figures old pupils renders the comparison of results with those of former years uncertain, as the proportionate number of such pupils probably varies each year. In future, the Principal is requested to exhibit the results as regards present pupils separately from those relating to old pupils. It is observed with pleasure that a student of the College obtained the Sri Goday Vari Sanskrit prize.

The additions to the library are noted with pleasure, also the good use made of the consulting library. It is hoped that the arrangements for the new reading room will prove successful.

The progress made by the students in gymnastics, in other athletic exercises and in field games is very encouraging. The cricket field had been levelled and otherwise improved.

The history of the year generally is marked with many encouraging and satisfactory features, and the Director expresses an earnest hope that in each succeeding year the College will more adequately fulfil the object for which it is maintained by Government, namely, to serve as a model in all its departments to the other collegiate institutions of the country.

As regards the abolition of the High School classes Dr. Duncan says :—

"At the close of the year 1884 the High School classes were abolished, not however without misgivings on the part of many well-wishers as to the effect this would have on the future of the college. But the abolition of the school department can hardly be regarded either as revolutionary or as retrograde by any one acquainted with the history of this institution and the present condition of education throughout the Presidency. For it merely puts in force a principle laid down when the old High school was founded, and since then frequently reaffirmed, that as soon as the progress of education would permit this college should withdraw from middle and secondary instruction. That time, it is believed, has now come; and few things can better exemplify the remarkable development of education since this college was opened in 1841 than the fact that it feels strong enough to stand alone without the support of Middle and High School classes."

The following remarks are made by Dr. Duncan regarding the term fee system :—

"Persons not engaged in educational work can have no idea of the mean artifices which some pupils resort to at the beginning of the scholastic year. They formally join the college, having their names entered in the general register as well as in my own private book, and after attending classes for periods varying from a few days to six or eight weeks, go away and join another institution, without paying their fees and without giving the least notice to me or to any one else. As by the rules regulating Government and aided institutions the Headmaster or Principal is bound to make enquiries as to the previous conduct of candidates for admission, and is forbidden to admit them unless satisfied that they have paid their fees in the college they have left, I am reluctantly compelled to conclude that those who close their short careers in this institution by an act of dishonourable meanness, begin them in the institutions they join by untruthfulness. The number of those who behave in this way is, it is true, not large: not more than twelve coming under this category this year. But the smallness of the number does not make it the less desirable to adopt measures to prevent young men of this character from connecting themselves with this college for however short a time. For if I interpret aright your own views and those of Government, it is a settled principle that this college *must* strive to set as high an example of moral excellence as of intellectual acquirements.

"The state of things I have described is due partly to the eagerness of Heads of institutions to increase their attendance roll. Boys and their parents are in consequence often led to fancy that they are conferring a favour on the institution on whom they propose to bestow their patronage; and as a further consequence they try to play off one Headmaster or Principal against another, with a view to find out which will offer the better terms. This is known to the Head of every college or school which happens to have other institutions in its neighbourhood; but the bad moral effect it has on the rising generation is not sufficiently realized or grappled with. Yet the evil must be faced if teachers are to be true to their mission; and I know of no institutions which are in a better position to make a decided stand against such practices and the erroneous ideas which lie at the root of them, than those maintained by Government, and none on which the duty is more incumbent than on the Presidency College."

Kumbakónam College.

73. The attendance is the same as in the preceding year, viz., 209, notwithstanding the institution of an entrance examination referred to below. The B.A. department, however, shows a slight increase, while the F.A. classes show a corresponding decrease.

The progress of the institution is very creditable to Mr. Stuart and his assistants, as will appear from the following extracts from Dr. Duncan's review of the report of the College :—

"The holding of an entrance examination of Matriculates for admission into the Junior F.A. class was a step in the right direction. The examination being a novelty, was purposely rather of an easy character and only four or five of the examinees were rejected. Such an examination must tend to raise the character of the college in the eyes of the public, and by excluding pupils who are not fit to benefit by the course of instruction, must enable the teachers to carry on their work more efficiently.

"The Acting Director is glad to find that there was no difficulty in collecting fees, and he approves of Mr. Stuart's action in insisting on the fee being paid before the student is allowed to attend lectures. During the first term of 1885 a further fee of Re. 1 was levied to defray the cost of periodicals for the reading room. It is to be regretted that there is no separate room which can be set apart for a reading room, as without this the benefits of such an institution cannot be fully enjoyed.

"The results of the B.A. examination may be regarded as highly creditable, the percentage being 66·7, while the average for the Presidency was 47·7. Of the examinees, seventeen belonged to the senior class of 1884, and fourteen, or 82·4 per cent., passed. T. Rangaswami is to be congratulated on having obtained the Miller and Rama Rau Gold Medals, and Rajagopalachari the second of the two prizes given by His Highness the Maharajah of Vizianagrum for proficiency in Sanskrit. Physical science was for the first time taken up at the examination, and it is creditable that, while one student was a very good second, the other members of the class did well.

"The results of the F.A. examination were not so good as those of the B.A. examination, but still they were fair. Thirty-four out of 77, or 44·2 per cent. passed, the average for the Presidency being 36·4. Sixty-three of the candidates belonged to the Senior F.A. class, and 33, or 52·4 per cent. succeeded, with nine in the first class."

The improvements made in the college grounds and the mode of carrying out an entrance examination, which the Director believes has now for the first time been tried in this Presidency, are detailed in the following paragraphs taken from Mr. Stuart's report :—

"An entrance examination was held in February 1885 to decide what students should be admitted to the first or junior F.A. class. The subjects of examination were Elementary

UNIVERSITY EDUCATION.

Mathematics and English, including translation from English into the Vernacular and *vice versâ*. Hitherto it has been customary to admit all matriculates as a matter of course, with the result that about 20 per cent. of the first class has been refused promotion at the end of the first year's work. It has been thought kinder to the students and likely to promote a higher standard if the worst of the candidates for admission are rejected at the very beginning instead of after they have paid a year's fees.

"As but short notice had been given, this first entrance examination was made rather an easy one, so that only four or five of the applicants for admission were rejected.

"In the review of last year's report, information was called for with regard to the improvements in the college grounds carried out in the year 1883-84. This information is now supplied. The college tank was considerably deepened and the banks cleared, so that instead of being an untidy pond covered with weeds, it is now a fine open sheet of water. Round it were planted two rows of cocoanut palms. Altogether 591 trees were planted in the compound, viz., 290 cocoanuts, 194 mangoes, 20 banyans and 87 others of various kinds. These trees are all doing well, and their produce will in time form a considerable source of revenue. A road twelve feet wide was made all round the compound. The earth taken from the tank was used to fill up several unsightly pits which existed in various parts of the grounds."

A necessary scheme for the re-organization of this college, so as to enable it to teach all the subjects of the arts curricula, was approved by this Government, but has not yet received the sanction of the Government of India.

Rajahmundry College.

74. The strength of the college has improved, there having been 103 pupils against 78. The increase was chiefly confined to the F.A. classes. The following review on the report of the college shows the progress during the year:—

"The institution was placed somewhat at a disadvantage owing to changes in the staff, but the Acting Director trusts that the same causes will not operate during the present year.

"The measures taken to meet the requirements of the new scheme of studies for the B.A. examination seem to be judicious.

"The Acting Director is glad to note that the strength of the college shows a marked increase, there being 26 in the B.A. against 23 and 77 against 55 in the F.A. classes, making a total of 103. The results of the examination of the Junior B.A. and F.A. classes conducted by Mr. Metcalfe and his assistants were satisfactory. The Acting Director regrets to learn that many absented themselves from the examination for reasons of very doubtful validity. It is reported that eight boys of last year's Junior F.A. class having been considered unfit for promotion left the college rather than rejoin the new Junior class, seeking elsewhere the promotion denied them at Rajahmundry. The Acting Director approves of the strictness adopted by the Principal, as being in the best interests of the college. Government colleges ought to set an example to other colleges in this as well as in other respects.

"The results of the Degree examination were very creditable, but those of the F.A. examination were only fair, a result attributed by Mr. Metcalfe to the unusual severity of the papers in Algebra and History. The Matriculation results, like those for the degree, were very creditable, and promise well for the success of the present Junior F.A. class. Mr. Visvanadha Sastri is to be congratulated on the marked success of his division.

"It is satisfactory to find that the library, consisting of 1,311 volumes, continues to be extensively used by both masters and students. The librarian deserves credit for the preparation of a new catalogue. With a view to partially relieve the librarian, who is also the clerk, two students have been granted free scholarships, on condition of their assisting the librarian. The library can thus be kept open at all hours of the day. The Acting Director is not over-sanguine as to the success of this experiment, and would request Mr. Metcalfe to remark on the working of it in the next annual report.

"The Acting Director is glad to note that a fair amount of interest is taken in gymnastic instruction, that the public performances of the pupils on prize-distribution day won the approval of Mr. Kelsall and the other visitors to whom thanks are due for their kind contributions towards the Prize fund.

"From the statement showing the districts to which the students belong, it is evident that the institution is gradually meeting the requirements of the Northern Circars."

Madras Christian College.

75. It is satisfactory to note that the attendance in the college rose from 424 to 537, the B.A. and F.A. classes showing marked improvement with 35 in the former and 78 in the latter. The pupils who passed the B.A. and F.A. examinations number 58 and 51 respectively against 49 and 67 in the preceding year. The working of the institution is summarized in the following extracts:—

"The Acting Director of Public Instruction has read the report with interest and congratulates the College Council, the Principal, and his staff on the highly flourishing condition of the institution.

"*New Buildings.*—In regard to the new buildings, which will be a noble addition to the educational structures of the city, the Acting Director must express his great satisfaction that it was found possible to carry out the design in its entirety, liberal aid having come in both from Europe and India. The estimate for the original and complete design ranges between Rs. 1,05,000 and Rs. 1,06,000, and something more than Rs. 15,000 is said to be wanting still. Considering the generous response already made, it is highly probable that there will be no difficulty in obtaining so comparatively small an additional sum. The sanction of Government for the issue of a further grant of Rs. 9,148 has already been communicated. When this sum is made available and all subscriptions are paid up, the amount needed will be only a little over Rs. 5,000. The Acting Director hopes that when the new buildings have been brought to a successful termination, they will be entirely free from debt.

"*Staff.*—The Acting Director cannot help sympathizing with the institution in the loss of such well-known educationists as the Reverend Messrs. Stevenson, Rae and Alexander; but he congratulates the College Council on having been able to secure the services of gentlemen of high academic distinction to take their places. In reviewing last year's report, the Director expressed his pleasure on learning the decision of the Council to establish a separate Professorship of Mathematics. The Acting Director would similarly put on record his satisfaction with the decision recently arrived at to establish a Professorship of Biology.

"The employment of tutors having become indispensable in large colleges like this, provision has been made in the revised code for grants in aid of this form of expenditure.

"*Finance.*—In 1884 the expenditure had reached Rs. 68,000 and the Government grant Rs. 12,376. The increase in the grant is regarded as not proportionate to the increase in the expenditure, though it is acknowledged at the same time that the action of the State has during recent years been more liberal and sympathetic. The Acting Director has only to remark in the words of the report under review that, as far as financial conditions will permit, an institution like the Christian College may rely upon 'receiving from public funds an adequate share of the increasing expense which the steady development of education necessitates.' At the same time, no efforts should be relaxed which tend to make schools and colleges self-supporting or as nearly so as the circumstances will permit.

"The Acting Director observes that fees have risen to Rs. 37,300 and that from the point of view of the year's accounts the increase was more than sufficient to cover increased expenditure. The latter, however, has to be qualified by the fact that certain expenditure had accidentally not been incurred. As this expenditure will have to be thrown on 1885, it is obvious that the increase in the fees will not show so favorably when the accounts of the current year come to be made up. An additional cause of expenditure will be the increased salaries to deserving teachers. This last point is undoubtedly a step in the right direction, and the principle of devoting additional funds not to the lightening of burdens but to increased efficiency is one which has the Acting Director's warmest approval. The Acting Director notes that the change to a system of term fees has proved one of complete indifference to the institution and that it has done neither good nor evil. With reference to its effect on other institutions, it is yet premature to draw conclusions.

"With 1,040 in the school and 438 in the college, the popularity of the institution is abundantly manifest. The report expresses the desire that the number in the school should not rise above 1,000 nor that in the college above 400 or 420. To limit the number admitted is to limit the income from fees, but there can be no question as to the soundness of the policy which would keep the size of the classes strictly within the limits dictated by considerations of efficient class instruction and proper general supervision.

"The small average of absentees (7·2) in so large an institution is worthy of notice.

"The Acting Director is glad to find that gymnastic training was made a part of the regular work of the fifth class.

"As regards the results of the public examinations, those of the Middle School and the B.A. degree may be regarded as good, those of the Matriculation and F.A. examinations fair. One of the students distinguished himself by gaining the Arni Gold Medal, and four former students obtained the degree of Master of Arts, two of them enjoying the further distinction of being the first to obtain that degree in Physical Science.

"In conclusion, the Acting Director thinks that the thanks of all interested in the welfare of the rising generation are due to the Rev. Dr. Miller for his liberality in building at his own cost a handsome and comfortable boarding-house for Brahman students. It is earnestly to be hoped that Dr. Miller's generosity will be so amply rewarded by the success of this institution that the Council may see their way to extending the same privileges to other classes of students, and that the enlightened liberality of native gentlemen may be stimulated by his example to do the same for other colleges frequented by pupils from distant parts of the country."

With reference to the remark of the Principal that the change in the fee system has proved a matter of complete indifference to the institution I observe that the fee income of the College department rose from 15,000 to 21,000 rupees or by 40 per cent. against an increased strength of 26 per cent. and that the average attendance shows an improvement equal to 14 per cent.

I cordially endorse the remarks made by Dr. Duncan, Acting Director of Public

UNIVERSITY EDUCATION

Instruction, in his concluding paragraph "that the thanks of all interested in the welfare of the rising generation are due to the Rev. Dr. Miller for his liberality in building the Students' Home for Brahman students."

Tanjore S. P. G. College.

76. The attendance rose from 89 to 106, the B.A. and F.A. classes showing increase, notably the latter. The fee income was Rs. 5,149 against Rs. 3,971. In the B.A. examination 5 passed against the same number in 1883-84, and in the F.A. 11 passed against 28.

Trichinopoly St. Joseph's College.

77. The strength on the 31st March was 199 against 173. The B.A. department shows a falling off of 10 pupils, while the F.A. classes show an increase of 36 students. Eight out of 26 passed the B.A. examination, and 22 out of 49 the F.A. The fee income was Rs. 8,606 against Rs. 2,824.

Trichinopoly S P G. College.

78. In contrast with the preceding year, the attendance has fallen from 136 to 110, both the B.A. and F.A. classes showing decline. The decrease may in some small measure be due to changes in the fee system, but it is noteworthy that, notwithstanding the reduced strength, the fees rose from Rs. 2,771 to Rs. 4,836. Of the 13 candidates who appeared for the B.A. examination 7 passed. In the F.A. examination, however, only 15 passed out of 45 examined.

His Highness the Maharajah's College, Vizianagrum.

79. The attendance fell from 57 to 49. The decrease pertained to the F.A. classes, where the attendance was 42 against 51. The B.A. classes however show an increase of 1 student. In the B.A. examination 1 passed out of 3 examined, while in the F.A., 6 passed out of 24.

Second-grade Colleges.

Berhampore College.

80. The attendance rose from 16 to 23, but the results of the F.A. examination were very discreditable to the Headmaster, only 1 having passed out of 10 examined.

Bellary College.

81. There has been some improvement in the attendance, the number being 24 against 19 in the F.A. class. Of the 9 pupils who went up for the F.A. examination 5 were successful. It has been decided by Government that the college shall be abolished at the end of the current year unless taken over by the Municipality.

Cuddalore College.

82. The institution has again declined in numbers. On the 31st March 1884 there were only 28 pupils against 30 on the same date in the preceding year. In the F.A. examination, 6 were successful out of 14 examined, 2 having secured places in the first class.

Salem College.

83. The attendance rose from 15 to 24. Three out of 8 passed the F.A. examination. The Government have decided to abolish this college during the current year, should it not be taken over by the Municipal Council.

Madura College.

84. There has been an increase of 5 pupils over the attendance of the preceding year, the strength on the 31st March having been 73 against 68. For the F.A. examination, 26 appeared and 8 came out successful, 3 in the first class.

Calicut College.

85. There was an increase in the attendance, 68 pupils having been on the rolls on the 31st March against 61 in 1883-84. In the F.A. examination, 17 passed out of 37 examined, 5 being in the first class. The results compare favorably with those of the preceding year when only 13 passed out of 42 sent up, and are very creditable to Mr. Sconce, the Headmaster.

Mangalore College.

86. The attendance (48) was stationary. The results in the F.A. examination were satisfactory, 11 having passed out of 22 examined. Of those successful, 2 secured places in the first class.

Vizagapatam Hindu College.

The strength has risen from 19 to 24, and in the F.A. examination 2 passed out of 7 examined.

Cocanada Pithapuram Rajah's College.

87. There is improvement in strength, 23 in place of 19. No pupils appear to have been sent up for the F.A. examination. The condition of this school is not very satisfactory, and changes in the staff seem called for.

Masulipatam Noble College.

88. The attendance (31) was stationary. Only 4 passed the F.A. examination —1 in the first class—out of 22 examined. The results are very disappointing, considering the staff employed in this important institution.

Pachayappa's College.

89. There has been a rise of 44 per cent. in attendance, to 127 from 88. The results of the F.A. examination are not satisfactory, only 6 having passed out of 36 examined. The college bids fair to improve rapidly under its new Principal, Mr. Adam.

Doveton College.

90. This institution, which was ranked among the first-grade colleges last year, has been placed this year among second-grade colleges, there having been no B.A. classes. The attendance in the F.A. classes was 19 against 18, and in the last F.A. examination 13 appeared but 4 only passed, 1 of them in the first class.

St. Mary's College.

91. The strength has fallen from 10 to 6. None of the 6 pupils who appeared for the last F.A. examination passed.

Cuddalore St. Joseph's College

92. The attendance has risen from 10 to 18. The institution has not yet begun to send in pupils for the F.A. examination.

Negapatam Wesleyan Mission College.

93. The attendance has improved, having risen from 29 to 49. The results of the F.A. examination were very good, 7 having passed out of 13 examined, 1 in the first class. The progress of this institution is very creditable to its Principal, Mr. Findlay.

Tranquebar Lutheran Mission College.

94. The strength has fallen from 7 to 6. Of the 6 pupils who appeared for the F.A. examination 4 passed, 2 in the first class.

Tinnevelly C M S. College

95. The institution shows a decline in attendance this year also, there having been only 25 pupils against 30. Five out of 14 passed the F.A. examination.

Tuticorin Caldwell College

96. The attendance (29) was stationary. The results of the F.A. examination were, as in the preceding year, creditable, 7 having passed out of 11 examined.

Tinnevelly Hindu College

97. The attendance has risen from 48 to 54. Out of 23 examined, 12 were successful, 3 in the first class.

Coimbatore College

98. There is improvement in strength, 85 in place of 62. In the F.A. examination 11 out of 29 were successful, with 2 in the first class.

Mangalore St. Aloysius' College

99. This institution is steadily increasing in numbers. Forty students having been on the rolls against 28 and 17 in the two preceding years. The results of the F.A. examination were highly satisfactory, 3 having passed out of 4 examined, 2 in the first class.

Calicut Kerala Vidyasala.

100. The strength has risen from 56 to 83. In the F.A examination 7 passed out of 20 examined, of whom 3 were in the first class.

(*b*) LAW.

101. Two candidates were registered and examined for the M.L. degree and 1 passed in the third class. The results of the B.L. Degree examination are shown in the margin. They are not as favorable as those of the preceding year, only 42·1 per cent. having passed against 53·3 per cent. The radical changes brought about early in 1884 in the working of the Law class will, it is hoped, produce substantial results by raising the general legal knowledge

Faculty of Law.

UNIVERSITY EDUCATION.

throughout the Presidency. The strength of the Law class attached to the Presidency College was 127 against 115. As regards this class the Principal says:—"The Law classes are steadily advancing in numbers and efficiency. Of the 44 students forming the junior class who went up for examination in December, all except 3 succeeded in passing and became thereby qualified for promotion to the senior class. The classes are more than self-supporting, and I trust that the surplus funds will be available for adding to, and improving the, law section of the library as well as for defraying the expenses of lighting, &c." Seventeen students went up direct from the Law class for the B.L. Degree Examination against 15 students in 1883-84.

(c) MEDICINE.

Faculty of Medicine.

102. The results of the several University examinations in medicine are summarized below. Excepting the Preliminary Scientific examination the results are highly creditable.

Examinations.		1882-83.	1883-84.	1884-85

Medical College, Madras.

103. The following extracts from my review of the Medical College report show the working of the institution:—

The academical year 1884-85 closed on the 10th ultimo and it is noteworthy that on that day the institution completed the first half century of its existence.

Changes in staff.—These were numerous, the chief of them being the retirement of Professor Cockerill after an honorable connection with the college of sixteen years; the appointment of Surgeon-Major Ratton as Professor of Surgery, of Surgeon Dymott as Professor of Pathology, of Dr. Allison as Professor of Hygiene, and of Mrs. Scharlieb as lecturer on Midwifery to the Female class. The year also saw the return of Surgeons-Major Branfoot and Drake-Brockman from furlough and the appointment of Mr. Hollingsworth as Assistant to the Professor of Materia Medica.

Strength of the institution.—It is very gratifying to note that the year under review opened with a further increase in numbers. In the previous year the number was 182 including 10 female students; this year began with 215, twelve of whom were female students. It is worth noting that one of the female students was in the Chemist and Druggist class. The different sections of the community were represented as follows:—

		Previous year.
Europeans and Eurasians	82	79
Native Christians	40	26
Muhammadans	8	3
Brahmans	33	25
Sudras	49	47
Parsees	3	2
Total ...	215	182

which shows an advance in each class. Of the total number of students, three unfortunately died, six resigned, while four proceeded to Europe to continue their studies. The year closed with 202, or an advance of twenty.

First or Senior Department.—This department contained 120 male and four female students; and, judging from the Professors' reports, they on the whole made fair progress.

University Examinations.—At the University examinations of July 1884, fifteen failed out of fifty-nine who appeared, fifty-two having been given in the report as the number about to appear. The result, 74·57 per cent., is creditable. Messrs. N. Jesudasen, M.B., M.A., and

D. Thummonsing obtained the degree of M.D. of the Madras University, the former by election and the latter by examination. That about ninety-six students are to appear for the University examinations of 1885 in place of the fifty-nine of the previous year is a very decided indication of progress. It is gratifying that a large number of Civil Hospital Apprentices have come forward to seek a higher medical distinction. The fact that three students of the college succeeded in passing the Master of Arts Degree examination—two in Biology and one in Physical Science—is a further proof, if proof were needed, of the soundness of the instruction imparted in this institution. UNIVERSITY EDUCATION.

Lady Students.—Eleven are under training. Four are in the First or Senior or University department. The others are qualifying for the Medical Practitioner's certificate. The progress made by these students has in almost all cases entitled them to some college distinction. Mrs. VanIngen secures the Bharati Lakshmi Gold Medal for Midwifery. It must be highly gratifying to the friends of the Medical education of women to watch the steady progress made from year to year by the Madras Medical College in this important work.

Meetings, Lectures and Examinations.—The meetings ranged from 16 to 144 and the lectures from 9 to 96, while the proportion of examinations to meetings ranged from 1 in 3½ to 1 in 2.

Medicine and Clinical Medicine.—The plan of Clinical instruction followed in the previous year was continued, and microscopic examinations were more frequent, as Surgeon-General Furnell had sanctioned the issue of two microscopes for use in the General Hospital.

Midwifery and Diseases of Women and Children.—These subjects were taught by Mrs. Scharlieb, and the suggestions made by her for improving the mode of instruction will doubtless receive careful consideration.

Bharati Lakshmi Scholarship.—The Acting Director notes the interesting fact that Miss Graham, the first holder of this scholarship, which was founded by His Highness the Maharajah of Travancore, is the grand-daughter of an officer who was Captain of the Nayar Brigade.

Chemist and Druggist Class.—It is to be regretted that the four students—three male and one female—failed to satisfy the Examiners.

College Buildings.—Improved dissecting sheds are in course of erection in place of those accidentally burnt down.

Gymnastics.—It is hoped that the gymnasium will soon be in complete working order.

Medals and Special Prizes.—These were awarded as follow :—

The Johnstone Gold Medal to Mr. M. Ailsworth of the M.B. and C.M. class, the most deserving student completing his studies. The Blacklock Gold Medal to Civil Hospital Apprentice J. C. D. Bartley for Clinical Surgery. The Chipperfield Gold Medal was adjudged by the College Council to Mr. J. Lychlander of the L.M. and S. class for Clinical Medicine on completing his studies. The Bharati Lakshmi Gold Medal to Mrs. VanIngen for Midwifery. Lady Hobart's prize, a set of Midwifery instruments, value £6, to Miss Yerbury. Surgeon-General M. C. Furnell's prize of Rs. 100 to Mr. Lychlander for excellence in Clinical work.

Museum.—The Acting Director is glad to find that valuable additions were made to the Museum, the additional specimens numbering thirty-four.

Library.—Two hundred and sixty-one volumes were lent to the students. A good catalogue was prepared by the Librarian.

Students' Club.—This is reported to be working satisfactorily.

Professors and Assistant Professors.—The Principal cordially acknowledges the assistance given him by the Professors and Assistant Professors. The Acting Director similarly endorses Brigade-Surgeon Koess' remarks on Honorary Surgeon Wilkins, F.R.C.S., who was about to retire after a connection of twenty-nine years with the institution.

(*d*) CIVIL ENGINEERING.

Faculty of Civil Engineering.

104. Eleven candidates were registered and examined for the B.C.E. Degree examination, of whom 7 passed, 1 in the first class, 1 in the second, and 5 in the third.

Civil Engineering College.

105. The following extracts from the review of the college report describe the work of the institution :—

The average numbers on the rolls show a fall of 2 in the First department, but a rise of 5 in the Second and of 30 in the Special department. The figures are—

	1884-85.	1883-84.
First department	19	21
Second do.	51	46
Special do.	55	25
Total ...	125	92

SECONDARY EDUCATION.

The numbers for the same two years, according to the classes of the community, are—

	1884-85.	1883 84.		1884-85	1883-84.
Europeans and Eurasians ...	29	20	Muhammadans	1	1
Brahmans	49	41	Others	2	2
Hindus other than Brahmans	33	19			
Native Christians	11	9	Total ...	125	92

The increase indicates a satisfactory state of things, but the Muhammadan element seems still to be much in the background.

The results of the examination of the senior division of the First department were an improvement even on those of the previous year. There were 10 students, and all were successful in gaining diplomas as Assistant Engineers. S. A. Subrahmanya Aiyar, B.A., took the first place with honours, and 4 more students passed with credit, while of the remaining number none obtained less than 56·1 per cent. of marks. An independent candidate, formerly a student of the college, appeared for the examination and obtained a diploma. The same 10 students appeared for the B.C.E. examination and 7 passed almost, it is satisfactory to note, in the same order as that in which they stood at the Engineer examination. That the First department is in a high state of efficiency is manifest from the fact that the B.C.E. degree has been taken by a larger number of students than at any time previous, and from the circumstance that for the third time since the institution of the degree one of them has been placed in the first class.

The department is again under obligation to the gentlemen who conducted the College examination.

The present senior division consists of 8 students and the junior of 10, which shows that the First department has no difficulty in keeping up its numbers. The progress of the students is favorably reported on.

The arguments for the appointment of a body of Examiners for conducting the College examinations are very weighty and will receive attention.

The Principal justly observes that the current year marks an important era in the history of the institution, the higher ranks of the Public Works Department having been systematically opened for the first time to its students in accordance with the orders of the Supreme Government guaranteeing one such appointment annually to the college. The Acting Director of Public Instruction congratulates Mr. S. A. Subrahmanya Aiyar, B.A., B.C.E., on his having won the distinction of entry into the superior service of the department, and trusts that his future career will fully justify the high opinion formed of him by Captain Love.

The Acting Director is also glad to note that the remaining students who passed out of the First department have secured fairly remunerative appointments.

Mr. Krishnan Nayar, B.A., B.C.E., the most distinguished student of the previous year, the Acting Director is glad to learn, has been appointed an Assistant Engineer on the South Indian Railway, while another student has been employed by the Government of Maisúr. While the popularity of the college is increasing, it is gratifying to record that students of merit find no difficulty in getting employment, and there is no doubt that the demand will continue to increase.

IV.—SECONDARY EDUCATION.

(a) *High Schools for Boys.*

Matriculation Examination.

106. The annexed summary shows the general results of the Matriculation Examination held during the year :—

General results.		Public institutions under the Madras Government.	Public institutions maintained by Local Fund and Municipal Boards	Public institutions in Native States	Public institutions receiving aid	Other public institutions	Private students	Total
Examined	1883-84	526	75	344	2,076	1,164	1,105	5,290
	1884-85	462	60	355	2,216	1,019	1,103	5,215
	1879-80	562		252	1,515	443	537	3,309
Passed— First class	1883-84	32	6	16	86	49	4	193
	1884-85	48	7	32	117	51	12	267
Second class	1883-84	202	21	129	691	346	157	1,546
	1884-85	184	21	90	651	258	132	1,336
Total	1883-84	234	27	145	777	395	161	1,739
	1884-85	232	28	122	768	309	144	1,603
	1879-80	259		97	550	96	92	1,094

From the above figures it will be seen that the results were on the whole unfavorable, the total percentage of passes having fallen from 33 to 31. The total number of candidates examined fell slightly, the number having been 5,215 against 5,290. There was thus a decrease of 1½ per cent. in the number of examinees, while the percentage in the number of passes, which was 1,603 against 1,739, fell much lower. The departmental institutions and the two high schools transferred to the Municipality have done better than in the year preceding. The other institutions have not done satisfactorily. This is the first year of examination according to the amended curriculum, and it will be observed that the new requirements are more severe than the old. The standard was raised in vernacular languages from one-fourth to one-third; to the arithmetic test, interest, discount, present worth and stocks were added; under general knowledge, whilst English History was omitted, the standard in Indian History was advanced, and the Elements of Chemistry and Physics required instead of a fixed and defined portion of two elementary text-books on these subjects. It is mainly owing to this circumstance that the percentage of success has fallen in the past year, for there can be no doubt, speaking generally, that the teachers of upper secondary classes are, as a body, superior in general educational attainments at least to the men previously employed. The vast size, however, of many matriculation classes, which interfere greatly with efficient teaching, may also be a cause of decline in the average attainments of students. The great increase (60 per cent.) in the number of candidates in the past five years is remarkable, although the number of candidates coming from Government institutions has fallen.

Institutions	1883 84	1884-85
Departmental institutions	44	50
Local Fund and Municipal institutions ...	36	47
Public institutions in Native States	42	34
Do receiving aid .	37	35
Other public institutions	34	31
Private study	15	13

The percentages of passes were as noted in the margin. The departmental and Local Fund and Municipal institutions show improvement, while the rest show decline, the decrease in the percentage appertaining to public institutions in Native States being the greatest.

The statement in the margin gives the number of passes in the different subjects. The improvement in the percentage of success in English is satisfactory, the number having been 62 against 48. Mathematics also show improvement, 74 against 64, notwithstanding the extension of the arithmetic test. The other two subjects, however, show decline, notably general knowledge, in which the percentage of success was only 39 against 64. This decline was to be expected in the first year of a raised or extended test. In Chemistry and Physics the change is especially marked, and is not to be wondered at, now that the mere cramming of elementary text-books will not secure a pass. The want of efficient teachers of science and the failure to teach the subject practically have produced these untoward results, but there can be little question that energetic efforts will now be made to improve this department of teaching. The expediency of making elementary science a universal test for matriculation is, of course, open to question, but there can be no question that if the test is imposed, it should be thorough and practical, however elementary it may be.

Analysis of success.	1883-84	1884-85
Examined	5,290	5,215
Passed in—		
English	2,541	3,230
Optional language	4,416	3,949
Mathematics	3,372	3,865
General knowledge . .	3,362	2,034

SECONDARY EDUCATION.

The table below gives the results of the examination in Optional languages:—

Language.	Examined			Passed			Percentage of passes		
	1882	1883	1884	1882	1883	1884	1882.	1883	1884
Sanskrit	419	542	606	340	318	359	81	58	59
Latin	209	209	185	145	176	160	69	84	86
Persian	33	33	44	27	29	38	81	88	86
Arabic			5			5	..	..	100
Tamil	2,299	2,496	2,361	2,116	2,156	1,809	94	86	77
Telugu	850	1,073	1,142	817	963	905	96	90	79
Canarese	410	415	359	374	322	323	91	78	90
Malayalam	368	460	458	334	395	303	91	86	66
Hindustani (Urdu)	42	57	48	38	57	43	90	100	89
Uriya	4	5	7	4	5	4	100	100	57
Total	4,634	5,290	5,215	4,195	4,416	3,949	90	84	76

Five candidates presented themselves for examination in Arabic and all were successful. The number of examinees in Sanskrit, Persian, Telugu, and Uriya shows advance, while there was a falling off in all the other languages. As regards the proportion of passes, Sanskrit shows an increase of 1 per cent. and Latin 2 per cent. The percentage of success in Canarese is almost that of 1882. The high percentage of success in this language is creditable to the Canarese candidates, considering the rise in the test. In all the other vernaculars there is marked decline, indicating that the students were little if at all better prepared than in the preceding year, whilst the standard had been considerably advanced. It is hoped that the raising of the standard will have a beneficial effect not only in the teaching of the vernacular, which at present is too much entrusted to men of archaic minds and methods and not to men skilled in the more modern methods of teaching language and possessed of some general culture. All the other languages secured less percentages in success with the exception of Arabic.

The classes of the community represented at the Matriculation examination are given in the margin. With the exception of "Other Hindus," "Muhammadans" and "Others," who show increase in the number of candidates examined, all the other classes of the community show decrease in this respect. Taking the number passed, other Hindus and East Indians alone show improvement. As regards the percentage of passes Native Christians and East Indians head the list, being on a par in the order of merit, while next to them come Europeans who seem to be gaining the position lost by them in the preceding year. Muhammadans have gone down two places, while Brahmans have lost the position hitherto maintained by them. Other Hindus remain stationary, though there was increase both in the number examined and passed. The most remarkable feature in the figures of the past year as compared with those of 1879 is the very great advance of the various sections of the community as compared with Brahmans. Whilst the Brahmans have only advanced by 33 per cent., other Hindus have risen 67 per cent., Muhammadans 173 per cent., and Native Christians and East Indians 80 per cent. and 41 per cent. respectively. No more satisfactory evidence could be produced of the marvellous advance of intermediate and low caste sections of the population. In 1879, nearly 7 out of every 10 candidates who passed were Brahmans. Last year, the proportion had fallen to about 6 in 10.

Classes	1883 84			1884-85			Passed – 1879-80
	Examined	Passed.	Percentage.	Examined	Passed.	Percentage	
Brahmans .	3,100	1,077	35	3,036	937	31	704
Other Hindus	1,523	412	27	1,554	415	27	249
Muhammadans.	125	47	38	128	41	32	15
Native Christians	357	144	40	334	144	43	80
East Indians .	107	32	30	94	41	43	29
Europeans ...	74	27	36	57	23	40	17
Others ...	4		..	12	2	17

SECONDARY EDUCATION

Comparative Examination of the Fifth Classes

107. The following extracts are from my review of the Comparative Examination of the Fifth Classes:—

Forty-eight high schools presented pupils for this examination against 44 in 1883-84. The number of examinees, however, fell from 1,278 to 1,091 and the number of passes from 674 to 640. This result is probably due almost entirely to the comparative smallness of the fifth classes. The percentage, however, of passes to examinees, it is noted with satisfaction, rose from 52·7 to 58·7, indicating a general improvement in the quality of instruction.

Four out of 44 institutions in the previous year's list disappeared, viz, the Government School at Anakápalle, the Maharajah's College, Pudukóta, and the Native High Schools, Cocanada and Negapatam. The Anakápalle school had no fifth class at the close of the year, while the remaining 3 schools withdrew from the examination. On the other hand, 8 schools, as per margin, joined the examination during the year, and it is observed that 7 of these are institutions under private management. Their having taken part in the examination was voluntary.

St Thomé Seminary.
St Mary's College, Madras
St. Joseph's High School, Sivaganga
Native High School, Coimbatore
American Mission High School, Dindigul.
Town High School, Máyavaram
Hindu High School, Sivaganga.
St. Joseph's Convent School, Calicut.

A statement is appended to these proceedings giving full details of the average marks gained by, and the number of examinees and passes in, each institution; the schools being arranged according to the total average secured by them. The St. Aloysius' College, Mangalore, heads the list with 305 marks, and the Government College, Mangalore, stands next with 296 marks. The keen competition between those two institutions has probably led to an improvement in both. The lowest average gained was 187 against 137 in the previous year. No less than 43 schools secured more than a third of the average marks, and 36 schools passed 50 per cent. of their pupils against 24 out of 44 schools in 1883-84. Only 2 institutions passed less than a third of the pupils they sent up—the Pachaiyappa's School, Chidambaram, and the Church Mission Society's School, Bezváda.

Fifth-class Comparative Examination held in November 1884.

SECONDARY EDUCATION.

Number and strength of upper secondary (high) school for boys.

108. The following statement shows the number and strength of high schools for boys, including the middle (lower secondary) and primary departments thereto attached. The figures are contrasted with those of 1879-80.

Divisions.	Number of schools.	Strength on 31st March 1880.				
		Upper secondary.	Lower secondary.	Upper primary.	Lower primary.	Total.
First division ...	9	451	1,129	301	217	2,098
Second do. ...	9	223	706	227	237	1,393
Third do. ...	23	1,607	2,318	860	1,154	5,939
Fourth do. ...	8	452	1,207	320	325	2,304
Fifth do. ...	19	1,161	2,322	552	658	4,693
Sixth do. ... / Seventh do. ...	9	605	932	263	465	2,265
Total ...	77	4,499	8,614	2,523	3,056	18,692

Divisions.	Number of schools.	Strength on 31st March 1884.				
		Upper secondary.	Lower secondary.	Upper primary.	Lower primary.	Total.
First division ...	17	624	1,470	416	430	2,940
Second do. ...	8	311	814	124	211	1,460
Third do. ...	26	1,723	3,013	939	1,143	6,818

Seventh do. ...	2	198	185	...	...	383
Total ...	115	6,467	11,065	2,390	3,833	23,755

The number of schools in the third, fourth and seventh divisions remains stationary. In the third division, however, the high school classes attached to the Presidency College were abolished and the loss made good by opening a fifth class in the Madrasa-i-Azam. The other divisions, with the exception of the fifth, in which there was a slight decline, show improvement. On the whole there is a net increase of 5 in the number of schools, the number being 115 against 110. This increase has been the result of the opening of fifth classes in 15 middle schools against 18 in the preceding year, and of the abolition of high school classes in 7 schools; while 2 schools (Parlákimedi Zemindary school and Viraraghava Pillai's school, Tanjore), which were returned in the preceding report as public schools, have been now classed as private schools. The fact that formerly schools without the means to maintain the position, rose to the status of high schools by simply opening small fifth classes, was an unsatisfactory feature in the educational system, and, although the evil may still continue, yet there can be little doubt that the new Fee Notification will tend in a great degree to check raising of the standard of a school without due consideration. As anticipated by me last year, there has been a satisfactory improvement in the strength of the upper secondary classes, the number having risen to 6,467 from 5,949, or by 9 per cent. With the exception of the fifth, all the other divisions show progress. The check in the fifth division is not to be regretted, as the high school department of not a few schools was unduly

inflated by laxity in regard to fees and to promotion. The strength of the middle and primary departments of the schools has fallen.

It will be observed that in the past five years the number of high schools has risen by 50 per cent. and the number of pupils in the upper secondary departments by 44 per cent., although as might be expected from the increase in the number of institutions, the average strength is not quite as great, viz., 56 against 58. The advance has been most rapid in the sixth and seventh divisions, and next to these districts come those comprised in the first division. In the former the number of schools and pupils has considerably more than doubled, whilst in the latter the number of schools has doubled, but the attendance has not risen quite in proportion. The progress of the sixth division is, however, partly due to the transfer of Trichinopoly to it, whilst this fact accounts for the comparatively small advance in the fourth division, to which it formerly appertained. The progress of the second division as regards attendance is very encouraging. The third division, which includes Madras, has advanced steadily, but not at all proportionately to the others. It still, however, has the largest attendance. Taking, however, the schools as a whole, the total attendance has slightly fallen, but the decrease is confined to two divisions, the other five divisions showing considerable improvement. The decrease, moreover, is absolute, as whilst 1,304 pupils appertained to schools removed from the list or to abolished departments, 1,568 pupils appertained to new schools or departments, so that the net difference in the constant schools and departments was 688. It is noteworthy, however, that the second division shows increase throughout all departments; the first, third, fourth, and sixth divisions show increase in all save one department; whilst the fifth shows decrease in all departments, and in this division the fall does not extend to the Madura district. The high schools of the Tanjore and Tinnevelly districts felt the change in fees most; partly because there had been excessive competition, and managers, consequently, had been tempted to be lax in collecting fees; partly because promotion in many schools had also been very lax, and lastly, because the competition of aided and unaided private elementary schools is most severe in these districts, where there are a considerable number of partially educated young men who are anxious to make a few rupees by teaching. It will further be observed that in the upper primary department alone is the variation in the figures material—a department in which fees are still collected by monthly instalments; but on the other hand, the rise in fees of this class was greater in proportion than in the lower primary classes. The necessity for obtaining lower primary certificates probably also affected appreciably the promotions to this class.

Distribution of high schools.

109. The distribution of high schools according to agency is shown in the statement given below :—

Divisions	1883-84				1884-85			
	Government schools	Board schools.	Aided schools	Unaided schools	Government schools	Board schools	Aided schools	Unaided schools
First division ...	5	...	10	2	3		12	3
Second do .	4		4	.	4	2	4	
Third do ...	2		22	2	2		22	2
Fourth do	3	1	5	1	3	1	5	1
Fifth do	2	1	23	7	1	2	25	3
Sixth do.	5		8	1	2	5	9	2
Seventh do .	1		1		1		1	
Total ..	22	2	73	13	16	10	78	11

The number of Government schools has fallen from 22 to 16. The decrease, with the exception of the schools in the first division, is nominal, as the schools are shown under Board schools. The increase in the number of aided schools is due to some of the unaided schools having passed to the aided list.

High schools, first division.

110. The particulars of the high schools in the first division are given in the following statement. It is satisfactory to observe that five schools are newly shown in the statement. The Parlákimedi zemindary school is now returned as a private school, the managers having declined to collect fees according to the new rates. The Anakápalle and Amalapuram schools have become middle schools, while the Grant-in-aid School, Dowlaishweram, has

SECONDARY EDUCATION.

been closed. On the whole the total number of schools rose from 17 to 18 and the strength of the upper secondary classes from 624 to 787. There is improvement also in the middle and lower primary departments. These increases are noteworthy in connection with the changes in fees. For the Matriculation Examination, 402 candidates appeared against 317, and 114 passed against 133. The decrease in the number passed is not to be regretted for reasons set forth in the earlier portions of this chapter. In the Comparative and Middle School Examinations the results are encouraging, 59 and 326 respectively having passed out of 92 and 586 presented.

SECONDARY EDUCATION.

The attendance in the upper secondary classes of the Berhampore and Chicacole high schools improved. The former school did better in the Matriculation Examination than in the preceding year, while the latter retrograded. The results of the Comparative and Middle School Examinations show improvement. The Parlákimedi school is shown as a private institution.

The school department of the Rajahmundry college has again declined in numbers owing to the abolition of the fifth class and also to the progress made by the aided schools in the town. I trust ere long to submit proposals for the entire abolition of the upper secondary department, as funds are required for the improvement of the college. To give effect to the orders of Government, dated 3rd June 1885, No. 377-E, in connection with agricultural education, a carpentry class has been recently opened. As regards aided and unaided high schools, five have been added to the list, and all these schools show increase in the strength of the high school classes with the exception of three, of which the Church Mission high school, noticed last year, is one. The results of the Matriculation Examination were not satisfactory.

High schools, second division.

111. The high schools of the second division are exhibited in the following statement. The Municipal school, Anantapur, and Local Fund School, Madanapalle, have been returned as high schools, small fifth classes having been opened in them. All the schools show general progress, though the successes in the Matriculation Examination fell by two, the number examined being the same. The results of the other two examinations are satisfactory, notably those of the Middle School. The attendance in each department improved notwithstanding the new fee rules.

SECONDARY EDUCATION.

The Government high school, Guntúr, shows increase in numbers. The results of the Matriculation Examination are not satisfactory. Of the three aided schools in the Kistna district, the Hindu school, Masulipatam, is improving, 15 out of 25 having passed the Matriculation Examination; the other two schools have fared badly, the Church Mission school, Bezváda, especially. Of the Government and aided institutions in Bellary, the Wardlaw Institution seems to be improving. As regards the other schools in the division, the Cuddapah and Kurnool high schools have, it is satisfactory to observe, improved in strength and done better in the University and other examinations.

High schools, third division.

112. The annexed statement gives particulars of the high schools in the third division. With the exception of the upper primary classes, all the other departments show increase. The decrease in the upper primary department was partly due to the abolition of the primary department in some schools. There was an increase in the number of passes in the Matriculation Examination, though the number of candidates fell slightly. In the other two examinations also the division did well.

The attendance in the Free Church Mission school, Nellore, improved, while that in the Hindu school fell. There was slight progress in the results of the Matriculation Examination of the two institutions. The American Baptist Mission school, Ongole, shows a slight falling off in the attendance all round. The abolition of the high school department of the Presidency College has already been noticed. In view of the progress taking place in the secondary education of the Muhammadans in Madras, and in consideration of the circumstances under which the Madrasa was taken over by Government, sanction was obtained during the year for the raising of the standard of the Madrasa-i-Azam to that of a high school and a fifth class was opened in January. On the 31st March 12 pupils were on the rolls of the highest class. The only other Government school in the division—the Saidápet school—does not exhibit any material progress. The attendance has fallen. The aided schools in Madras, with the exception of three, show increased attendance in the upper secondary class, while the results of the Matriculation Examination may in general be considered fair. The strength of the upper secondary class of the aided schools in the Chingleput district, except in three cases, has fallen.

SECONDARY EDUCATION

High schools, fourth division.

113. From the statement given below, showing the high schools in the fourth division, it will be observed that the schools in this division remain stationary. The attendance, except in the lower secondary class, shows decided improvement. Of the 260 candidates who appeared for the Matriculation Examination 94 passed, against 237 presented and 90 passed in 1883-84. The percentage of success shows decrease.

Of the three Government high schools in the division, the Chittoor school stands best in point of attendance and success in the Matriculation Examination. The strength of the other two schools shows satisfactory progress. The Wálajápet school bids fair to improve. The general progress of the aided institutions seems fair. Nine candidates went up for the Matriculation Examination from the Hermannsberg Lutheran German Mission school, Tirupati, and 7 passed. The school met with similar success in the Fifth Class Comparative and Middle School Examinations. The results are very creditable to the institution.

High schools, fifth division.

114. The following statement exhibits the high schools in the fifth division. The number of schools has fallen by two. Three schools have been added to the list—Native school, Shiyáli, Grammar school, Kumbakonam, and Periyakulam school and six have disappeared, one having become a private school, whilst the standards of the others have been reduced. The total attendance in each department shows decrease. For the Matriculation Examination, 898 appeared against 951, and 300 passed against 354.

SECONDARY EDUCATION.

The Tiruválur school, which declined in numbers last year, shows slight improvement. The school has become a Board school. Two pupils appeared for the Matriculation Examination, but none succeeded in passing. The only Government institution in the division—the Madura school—shows its attendance on the 31st March as stationary. The results of the University and Fifth Class Comparative Examinations were fair. The Municipal school, Mayavaram, continues to do its work satisfactorily. It sent up 24 pupils for the first time for the Fifth Class Comparative Examination, of whom 13 passed. The aided and unaided schools in the division show variation in attendance, but none of them shows any decided improvement or decline.

High schools, sixth division.

115. Annexed is a list of high schools in the sixth division. The number of schools rose from 14 to 18, high school classes having been opened in four institutions. The Palghát and Tellicherry schools having been transferred to the Municipalities concerned, have been shown as Board schools. Excepting the upper and lower primary departments there has been improvement in the total strength. The decrease in the primary departments was almost wholly due to the separation of the primary department from the high school in St. Joseph's institution, Trichinopoly. The number of candidates for the Matriculation Examination also increased, and the number of passes was 264 against 257. In the Comparative Examination, however, the number of candidates presented and passed declined, the decrease being confined to almost all the schools.

The S.P.G. school, Trichinopoly, which showed diminished attendance last year, again increased in numbers, while the St. Joseph's institution fell in strength in consequence of the exclusion of the primary department. The success of the two schools in the Matriculation Examination is satisfactory. The Karúr and Erode schools transferred to the Boards concerned have been raised in standard. Of the three aided high schools in Coimbatore, only one shows increased attendance, while that of the two others fell. The results of the Matriculation Examination were fair. The strength of the upper secondary class of the Ootacamund Brooks' Memorial school rose from 4 to 10. One pupil went up for the Matriculation Examination, but failed.

The two Government institutions in Malabar declined in numbers, but the results of the Matriculation examination were good. The Pálghat school shows improvement in respect of numbers and success in the Matriculation Examination, while the Tellicherry school shows improvement in the latter respect only. The Rajah's school, Kolangod, has entered the list of aided schools. The two other aided schools do not show any material progress. The Calicut Kerala Vidyasala advanced in strength, but the results of the Matriculation Examination were indifferent.

High schools, seventh division.

116. The particulars of the two high schools in the seventh division are given in the following table. Both the schools show increased attendance, and the success in the Matriculation Examination of the pupils of St. Aloysius' school is satisfactory, while that of the Government school was not so.

(b) *Middle or Lower Secondary Schools for Boys.*

Middle School Examination..

117. During the year under report some changes were made in the scheme of the Middle School Examination. The new scheme of fees having been introduced into Government and aided schools by the school-fee notification of 5th February 1884, the middle school notification was altered so as to make provision for the admission to the examination of only such schools as levied fees in all these departments at the prescribed rates. Provision was also made by the removal of the word "*permanently*" in clause II of paragraph 1 for the admission to examination after the age of 25 years of officials employed sub. *pro tem.* Needle-work and Drawing were added to the optional subjects and French and German were made part of Branch B (second or optional language) in view of the introduction of these languages into the Matriculation Examination. The other changes and additions relate to the publication of a separate list of candidates passing in needle work (which has been done with a view to give special prominence

SECONDARY EDUCATION

to the subject and partly because a pass therein qualifies for a mistress' certificate of the second grade); and to the addition of a penalty to the article regulating the admission of pupils into the upper department of high schools. This was necessary as there is a tendency in some institutions to disregard the restrictions which appear to me indispensable in the present state of education and until the University demands a certificate of having passed the Middle School Examination from all candidates for the Matriculation Examination. To give effect to the scheme for the development of scientific and technical instruction a new notification was issued in February 1885, but as it relates to the current year, it will be more appropriately dealt with in the next year's report.

The following extracts are taken from my proceedings as Commissioner for the U.C.S. Examinations reviewing the results of the last Middle School Examination :—

Eight thousand five hundred and fifty-one candidates registered their names, 8,358 underwent examination, and 4,895 passed against 8,281, 8,055, and 3,959, respectively, in 1883-84. This shows that 58 per cent. passed last year against 49 in the previous year.

—	December 1884					December 1883.

The following table gives the classes of institutions from which the examinees appeared with particulars as to the amount of successes each class of institution met with in the examination. Six thousand six hundred and seventy-nine male pupils and 243 female pupils appeared for the examination; 57 per cent. of the former and 71 per cent. of the latter were successful against 46 and 69, respectively, in 1883-84. For private candidates the percentage was 59 for males and 54 for females against 56 and 59, respectively, in the preceding year. The number of females examined and passed in both years was about the same :—

Class of institution.	Registered.		Examined.		Passed.

The following table show the optional subjects and languages brought up by the candidates. For male pupils Mathematics was not optional. Next to Mathematics, English History and Physical Geography were the principal optional subjects selected by private candidates as in the year previous. No marked change was observable in the numbers registered in the last two years in the several optional languages brought up by the candidates.

Fifth do. ...	37	530	36	205	241	34	483	23	167	190
Sixth do. ...	36	752	174	475	649	49	883	75	418	493
Seventh do. ...	7	139	41	66	107	8	150	23	73	96
Total ...	159	3,162	519	1,549	2,068	170	3,160	261	1,349	1,610

The number of schools that presented pupils for examination rose from 159 to 170. Of the schools of the preceding year 30, either withdrew from the examination or disappeared or were abolished, while 41 new schools took part in the examination. The total number of pupils examined fell by 2, while the number passed shows a serious decline, only 1,610 having passed against 2,068. The number of passes in the first class was about half that of the preceding year.

The next table gives the classes of institutions from which the pupils were presented.

Divisions.	Departmental schools.			Board schools.			Salary-grant schools.			Results schools.			Unaided schools.		
	Schools.	Examinees.	Passes.	Schools.	Examinees.	Passes.	Schools.	Examinees.	Passes.	Schools.	Examinees.	Passes	Schools	Examinees.	Passes.

Total	12	333	166	69	1152	714	32	837	358	51	575	262	6	263	110

The number of departmental schools has fallen, while there was an increase in the number of Board schools. The decrease in the one and increase in the other is due to the transfer of Government middle schools to District Boards. The two classes of schools put together show increase, having been 81 against 76. The number of pupils presented for examination shows a slight falling off, 1,485 against 1,489. The salary and results schools show improvement both in respect of number of schools and examinees. The unaided schools have fallen by 3. The percentage of success in the different classes of institutions ranged from 42 to 62 against 48 to 78 in the previous year.

Schools	1883-84	1884-85
Board schools	78	62
Departmental schools	74	50
Results do	48	46
Salary grant do	62	43
Unaided do	62	42

SECONDARY EDUCATION.

Every class of institution shows decline. The Board schools, however, maintain their position, while next to them stand the departmental schools. The improvement under the results schools is very marked, they having advanced absolutely as regards salary and unaided schools and relatively as regards Board and departmental schools.

Comparative examination of the third class.

119. A comparative examination of the third classes was held in the sixth and seventh divisions. Sixty-four schools presented 1,241 pupils for the examination, of whom 634 passed.

Number and strength of middle schools for boys.

120. The number and strength of lower secondary (middle) schools for boys, English and vernacular, are exhibited in the annexed statement. There was a decrease under both schools and scholars, chiefly under vernacular schools. But it is satisfactory to observe that while the number of schools fell by 22 per cent., the number of scholars in the middle department fell by 8 per cent. only, indicating that the schools closed or reduced to the primary standard were poorly attended. A comparison of the figures for 1884-85 with those of 1879-80 shows that the number of schools and pupils more than doubled in that period. In the second, fifth and sixth divisions the advance has been about threefold, and in the Presidency (third) division alone has there been only a moderate advance. The figures indicate how rapidly the provinces are overtaking the capital in the matter of secondary education.

Total ...	...	...	99	426	29	151
Grand Total ...	188	4,498	593	11,326	463	10,431

Viewing divisions separately, the fifth and third divisions show the largest decrease in the number of English schools, and the first and fourth divisions in vernacular schools. It is noteworthy that while there was a fall of 35 English schools in the fifth division, the number of pupils in the middle departments of such schools rose from 2,317 to 2,359. The largest decrease in pupils appertains to the Presidency division.

Distribution of middle schools according to agency.

121. The following table shows the distribution of middle schools according to agency of upkeep :—

Divisions.	Government.				Board.				Aided.				Unaided.

SECONDARY EDUCATION.

Owing to the transfer of middle schools to Municipalities and District Boards, the number of Government middle schools fell from 38 to 3 and their strength from 1,488 to 68. The three schools are the Bhadráchalam and Gunupur schools in the Agency Tracts of Godávari and Vizagapatam and the practising branch of the Madras Normal School. The Board schools, English, show increase in number and strength in consequence of the accession of the Government middle schools to the list, but the vernacular schools maintained by the Boards dwindled down from 41 to 3. The number of aided English middle schools fell by 52 and their strength by 415. This was in great measure the result of the closing of weak fifth standard classes in rural schools to escape the operation of the new Fee Notification. The attendance in unaided English middle schools has risen, though there has been a slight diminution in the number of schools.

Middle schools, first division.

122. A summary of middle schools in the first division is given below. There were 2 English schools more and 39 vernacular schools less than in the preceding year. The aggregate attendance in the middle departments was 1,378 against 1,517 in 1883-84 and 774 in 1879-80. For the Middle School Examination 786 candidates went up against 671, and 461 succeeded against 335. Ganjam shows decrease in schools and scholars. In Vizagapatam the number of schools remained stationary, but the attendance improved, while in Godávari the total number of schools as well as of scholars fell, owing to the disappearance of the vernacular schools.

Middle schools, second division.

123. The English middle schools in the second division fell from 50 to 47 and the vernacular schools from 9 to 5, as will be seen from the annexed table. In attendance there was a diminution of more than 20 per cent. The number of candidates for, and passes in, the Middle School Examination were respectively 428 and 258 against 437 examinees and 187 passes in 1883-84. Of the 341 candidates for the Lower Fourth Comparative Examination, 145 met with success.

SECONDARY EDUCATION

Kistna is credited with a larger number of schools, but the strength of the middle departments declined considerably, the decrease chiefly appertaining to aided schools. Bellary shows a fall of 1 school and 14 pupils, Anantapur 2 schools and 51 pupils, Kurnool 1 school and 2 pupils, and Cuddapah 4 schools and 54 pupils. The decrease in the last district is owing to the transfer of the Madanapalle school to the list of high schools and to the disappearance of the 3 unaided English middle schools in the last year's list.

Middle schools, third division

124. The particulars of the middle schools in the third division are given below :—

Middle schools for boys		1883-84		1884-85.	
		Number of schools	Strength of the middle department on the 31st March	Number of schools	Strength of the middle department on the 31st March

	Vernacular	1	2	3	16
Grand Total	English	74	1,992	51	1,520
	Vernacular	1	2	3	16

There were at the close of the year 54 schools with 1,536 pupils against 75 schools with 1,994 pupils at the close of 1883-84, Madras and Chingleput showing the chief decrease. For the Middle School Examination 1,398 pupils were presented, of whom 701 succeeded. The figures of the previous year were 815 examinees and 391 passes. Viewed by districts, Madras shows a diminution of 12 schools and 416 pupils owing to the transfer of the Madrasa-i-Azam to the list of high schools, the reduction of the standard of the Mailapur school, and the disappearance of 10 aided results schools. In Chingleput, the number of aided schools diminished by 9, while in Nellore, the Board schools fell from 9 to 7, though the Government school at Ongole was transferred to the Municipality.

Middle schools, fourth division

125. There were 7 English and 14 vernacular schools less than in the preceding year, and the number of pupils studying in the middle departments was 1,718 against 1,807. The examinees for, and the passes in, the Middle School Examination were 657 and 413 against 538 and 296 respectively in 1883-84.

In South Arcot, 1 aided and 1 unaided English and 6 aided vernacular schools do not appear in the present list. The attendance fell in consequence from 640 to 595. North Arcot also shows a diminution of 9 schools and 39 pupils, but with the exception of 2 schools and 2 pupils, the decrease belongs to vernacular schools. The number of schools in Salem fell from 24 to 20; the attendance in the middle departments was 604 against 609 in 1883-84.

Middle schools, fifth division.

126. The middle schools in the fifth division are summed up in the following table:—

All the vernacular schools in the division ceased to be ranked as middle schools, and the number of English schools fell by 35, of which 19 were in Tanjore, 13 in Madura, and 3 in Tinnevelly. The aggregate attendance of English schools, however, rose from 2,317 to 2,359, which is due to the improved attendance of the Tanjore and Tinnevelly schools. For the Middle School Examination 1,378 candidates were sent up, of whom 870 passed.

Middle schools, sixth division.

127. The next table exhibits the particulars of middle schools in the sixth division. There were 89 English and 6 vernacular schools against 83 English and 10 vernacular schools in the previous year. The aggregate attendance rose from 2,215 to 2,276.

For the Middle School Examination 1,192 pupils appeared, of whom 690 passed. As regards schools, Trichinopoly and Coimbatore show a decrease of 1 and 4 schools respectively, and Nílgiri and Malabar an increase of 2 and 5 schools. In the attendance of the middle departments, Trichinopoly and Malabar show an increase, and Coimbatore and Nílgiri a decrease.

Middle schools, seventh division.

128. From the annexed summary it will be seen that the number of English schools in the seventh division remained unchanged, while all the four vernacular schools of the previous year ceased to be middle schools.

SECONDARY EDUCATION.

One hundred and sixty-five candidates were presented for the Middle School Examination, and 110 succeeded against 152 candidates and 87 passes in 1883-84.

(c) *High Schools for Girls.*

Number and strength of high schools for girls.

129. There were 26 high schools for girls at the close of the year against 19 in 1883-84. The increase was the result of the opening of the high departments in connection with the Vizagapatam Fort Catholic School, the Bellary Convent School, the Madras F.C.M. Boarding School, the Vepery Convent Free and Special Schools, the Nazareth S.P.G. Boarding School, the Coimbatore Day School and the Ootacamund Nazareth Convent School, and by the closing of the high department of the All Souls' Results School at Coimbatore. The particulars of attendance and of examinees and passes in the Higher Examination for Women and Middle School Examination are given in the annexed table.

The number of girls in the high department, that is, studying for the Higher Examination for Women, rose from 94 to 160, and of these 123 girls were in schools in the town of Madras. There is also an appreciable improvement in the attendance of the middle and primary departments of the above high schools. Twenty-two out of 62 candidates passed the Higher Examination for Women against 19 out of 48 last year. The examinees for, and the passes in, the Middle School Examination rose by about 50 per cent. This rapid advance of secondary education among women is a very encouraging feature in the history of female education in this Presidency, but as yet practically no institution has begun to provide collegiate education, or even to provide regular instruction in the Matriculation course of the Madras University. This defect is much to be regretted, and if not remedied will probably result in natives of India being supplanted in the advanced institutions by mistresses imported from Europe having higher qualifications. The introduction of French and German into the subjects of the Entrance Examination removes the language difficulty, and there is no good reason why girls should not be taught mathematics and physical science up to the required standard. The continuance of the present system is much to be regretted and may ultimately necessitate the abolition of the Higher Examination of Women, for this examination cannot be regarded as an equivalent of the Entrance Examination and by leading managers to rest content with the present low standard it has not a wholly beneficial effect on female education.

(*d*) *Middle Schools for Girls.*

Number and strength of middle schools for girls.

130. Similar improvement took place in the middle schools for girls. The number of schools rose from 114 to 139 and the attendance in the middle and primary departments from 883 and 7,284 to 994 and 8,715 respectively in spite of the transfer of 7 schools to the list of high schools. In 1879-80 there were only 19 English and 2 vernacular girls' schools or 21 middle schools for girls, so that during the last quinquennium the number of such schools has risen by about 450 per cent. and the attendance of the middle department by 250 per cent.

Annexed is a summary of the schools classified according to agency, vernacular schools being distinguished from English schools. The increase in schools and pupils extends to both classes of institutions.

Regarding lower secondary schools for girls, Mrs. Brander observes:—

"I examined all the above schools during the year and found them generally improved. Reading aloud and recitation continue fair, but are often too listless in European schools and

too fast in Native schools. Grammar is receiving attention, but in Native schools it is taught too mechanically and with too little reference to the language itself. Composition in almost all schools is merely an exercise in writing from memory. Arithmetic has improved and mental arithmetic is receiving more attention, but much remains to be done in this subject. Writing and needle-work are steadily improving. Map-drawing from memory has made fair progress in some schools."

Home education classes.

131. Mrs. Brander's annual report summarizes the work of the home education classes as follows :—

"I am glad to say that there are two sets of these classes under inspection—those of the Madras Branch of the National Indian Association and some of those of the Indian Female Normal School and Instruction Society, both in Madras.

"(*a*) The National Indian Association has 3 trained mistresses at work as last year, and an important step has been taken in the appointment of a superintendent to overlook the work and to introduce better instruction, especially in English and needlework. The number of pupils under instruction was 24 against 25 last year. Three pupils held upper primary and 4 lower primary certificates against 5 and 1 last year. Of the pupils, 12 were Brahmans, 6 Vaisyas, and 6 Sudras. Eleven were classed as belonging to the richer classes and 13 as belonging to the middle classes. The following are the financial particulars of the National Indian Home Education classes :—

		RS.	A.	P.
"Received from	Government	665	0	0
	Fees	386	8	0
	Subscriptions and donations...	1,070	13	4
	Total ...	2,122	5	4

"(*b*) The Secretary, Free Church Mission, Madras, applied early in 1885 for sanction to place some of the home education classes of the Indian Female Normal School and Instruction Society under inspection and to receive grant. Grants have been sanctioned for 3 teachers from 1st January 1885. One holds a first-grade normal certificate, another a second-grade ordinary certificate, and the third a third-grade general education certificate. The sanction was not however received until after the close of the official year. Hence I have no returns of the classes and I have not as yet examined them. It is satisfactory, however, that another society, besides the National Indian Association, has availed itself of Government aid for home education."

Encouragement of female education.

132. Mrs. Brander has the following remarks on the subject of the desire of the people to start fresh schools :—

"The year under report has not been without some instances of the people themselves coming forward to help and show an interest in their girls' schools. The Deputy Inspectress reports that at Villupuram the people have subscribed a sum sufficient to buy a clock and some furniture for the girls' school. At Cuddalore a subscription was raised to supplement the Government grant for prizes, and superior prizes were therefore provided. There also the parents have subscribed and take the Sugunabothini magazine every fortnight for their daughters. I hope to see their example followed in other towns. In Gúdúr, Nellore, the people, led by the Tahsildar, have established two girls' schools, one for Hindu and the other for Muhammadan girls, and are wholly supporting them until the first result grant is earned. Chiefly owing to the exertions of Kotayya Chetty, Deputy Inspector of Schools, girls' schools have been opened at Kottapatam and Kanigiri in the Nellore District, and by the help of Venkataramayya, Deputy Inspector of Schools, Cuddalore, at Nellikuppam in South Arcot. These 3 schools are aided by the Madras Branch of the National Indian Association."

I trust that this desire on the part of the people will continue, and that new schools for girls will be started in all important localities as female teaching agency becomes available.

(*e*) *Private Schools.*

Private secondary schools.

133. There were 18 private secondary schools at the close of the year against 5 schools of that description in 1883-84. Of the schools, 5 had classes corresponding to the high school classes in aided institutions. These are—

(1) The Parlákimedi Zemindari High School.
(2) The Chingleput Native High School.
(3) The Tanjore Viraraghava Pillai's School.
(4) The Abd-ul qádir's Muktub, Bellary.
(5) The Sanskrit School, Tiruvádi.

PRIMARY EDUCATION

The first 3 schools did not bind themselves to the fee-rules prescribed by Government, and were not therefore recognized by the department or treated as public schools. The fourth is a purely Muhammadan school teaching Persian, Arabic and Hindustani. The fifth is a Sanskrit school maintained out of the Chattram funds.

Number of schools and pupils represented at the fifth, sixth, and seventh results standard examinations.

134. The following table compares the number of schools and pupils represented at the fifth, sixth, and seventh results standard examinations :—

Standard.		Number of schools that		Pupils presented.		Pupils passed.	
		Presented pupils.	Passed pupils.	Boys.	Girls.	Boys.	Girls.
Fifth	1883-84 ...	367	336	2,414	162	1,511	142
	1884-85 ...	301	280	2,061	268	1,431	223
Sixth	1883-84 ...	124	107	1,073	26	551	23
	1884-85 ...	131	121	1,196	66	573	53
Seventh	1883-84 ..	76	72	829	28	818	22
	1884-85 ...	84	82	1,189	21	606	20

The number of schools that presented pupils for the fifth standard fell from 367 to 301, but there was improvement in the proportion of schools that passed pupils under this as well as the sixth and seventh standards. General advance will also be noticed in the number of entries for and passes in all the standards, save under boys of the fifth standard and girls of the seventh standard.

V.—PRIMARY EDUCATION.

Classification of primary schools.

135. The classification of primary schools remained the same as in the preceding year. Purely primary schools only are treated as such schools and not the primary departments of superior institutions.

Number and strength of primary schools.

136. The following statement gives the number and strength of primary schools and classes :—

Schools.	Number of schools.		Number of pupils in primary schools proper		Number of pupils in primary classes.	
	1883-84	1884-85.	1883-84	1884-85.	1883-84.	1884-85.
Primary schools for boys	14,692	14,128	353,116	338,921	385,028	365,081
Do. do. for girls	508	578	18,896	20,190	27,262	30,243
Total ...	15,200	14,706	372,012	359,111	413,290	395,324

The number of primary schools for boys fell by 4 per cent., but that for girls rose by 14 per cent. The attendance in primary schools and classes for boys fell by 20,947, and that in primary schools proper by 14,195, so that the fall in the strength of the primary classes of superior schools is 6,752. Considering that these attached primary classes do not consist of a very large number of pupils, the diminution is very heavy, and this is probably due to the constitution of primary classes in several middle schools as separate institutions with a view to avoid the introduction of the term 'fee system.' The practice of doing away with the lower classes when the standard of schools is raised must have also partly led to the above diminution. On the other hand, it will be observed that in the case of girls' schools the attendance in primary schools proper rose by 7 per cent., while that in primary schools and classes rose by 11 per cent. The lower departments of superior schools were thus stronger than in the previous year. The average strength of primary boys' schools remained stationary (24), but that of girls' schools fell slightly, *i.e.*, from 37 to 35, apparently owing to the attendance of the new schools opened during the year being insignificant.

Primary schools in the hill tracts of Ganjam.

137. The number of hill schools in Ganjam rose by 11, owing to the establishment of 11 combined schools about the middle of the year. The total attendance in these schools rose from 982 to 1,375 (boys from 868 to 1,221 and girls from 114 to 154). Twenty-three of the hill schools were examined by Mr. Bickle, and the following extracts from the review of his report show the working of the schools :—

Excepting three remotely situated in the Ramgiri taluk and for the inspection of which there was no time, Mr. Bickle examined all the schools, twenty-three in number, twelve primary schools and eleven on the combined system, and he submits an inspection statement for each of them. The general result is as follows :—

1. Kalingiyá (Combined System)	Unsatisfactory.
2. Udayagiri (Primary School)	Good on the whole.
3. Raikhol (Combined System)	Fair.
4. Dhannapúr (Combined System)	Good.
5. Nangám (Combined System)	Bad on the whole.
6. Budaguda (Primary School)	Good.
7. Kirkuti (Combined System)	Do.
8. Balliguda (Primary School)	Do.
9. Mahásingi do.	Bad on the whole.
10. Kurtili do	Good.
11. Sárangoda do.	Do.
12. Koinjúr do.	Bad on the whole.
13. Sankarakhol (Combined System)	Fair.
14. Kavalagám (Primary School)...	Bad on the whole.
15. Tikabali do.	Fair on the whole.
16. Tentuligada (Combined System)	Good.
17. Lojuramunda do.	Do.
18. Lainipada (Primary School)	Good, except in third standard class.
19 Brahmanapad do.	Bad, do. do.
20. Bellapodra (Combined System)	Fair.
21. Donga do.	Unsatisfactory, except in third standard class.
22. Chokapád do.	Good.
23. Posora (Primary School)	Unsatisfactory, except in third standard class.

From this it appears that fifteen schools did well or fairly well, and only eight unsatisfactorily.

Mr. Bickle's tour lasted 24 days, and from 2 to 7½ hours were given to the examination of each school. The Acting Director is glad that the inspection was made so thorough, as without this it would be impossible to obtain the data necessary to enable an opinion to be formed on the proposal of the Agent to the Governor to convert the present salary grant schools into combined system schools.

In para. 8 of his report, Mr. Bickle observes that "the results produced by the schools which head both lists are probably equal to the very best results grant schools anywhere on the plains; and amongst all the elementary schools I have examined in various parts of the Presidency, I do not remember any better." And he draws the very natural conclusion "that with efficient teachers and a continuation of such excellent supervision as has been exercised by the late Special Assistant Agent, Mr. C. H. Mounsey, these hill schools might be made equal, if not superior, to any group of schools in the whole Presidency." Comparing this with the difficulty experienced in the early days of the Educational department in dealing with the hill population, the result cannot but be regarded as eminently satisfactory.

Classifying the children examined and passed for grant according to nationality the results are as follow :—

—	Uriyas.		Khonds.	
	Boys.	Girls.	Boys.	Girls.
Salary Schools.				
Examined	257	23	26	...
Passed	134	7	10	...
Combined System Schools.				
Examined	87	1	37	1
Passed	61	1	14	...
Total for both classes of schools presented.	344	24	63	1
Passed	195	8	24	...

PRIMARY EDUCATION.

The Acting Director regrets to find from the tables given in para. 11 that while there was an increase in the salary schools of eighteen boys, there was a decrease of eight girls. The figures of 1884 are not given in respect of combined system schools, which are, with three exceptions, stated to be virtually new ones, but in 1885 there were 417 boys and 51 girls, making a total in all schools for 1885 of 1,104 boys and 152 girls. The Acting Director agrees with the Inspector in considering that the increase as regards the schools of long standing is not satisfactory. Another unsatisfactory feature is the comparatively large number of pupils in the "Initiatory" class, pointing to the conclusion that but few children remain sufficiently long to make useful progress.

In paras. 14, 15 and 16 Mr. Bickle refers to the defects perceived by him in the several subjects taught, the dirty condition of the children, the unsuitability of the school-houses and the necessity for improved furniture. He also points out in para. 17 that discipline is lax and that gymnastics are not taught. His suggestion that the gymnastic instructor of the Berhampore College should proceed to Udayagiri in December and give instruction to the assembled hill schoolmasters is a good one and ought to be carried out.

The Inspector is in favor of the proposal of the Agent to the Governor to convert the salary schools into schools on the combined system, being of opinion that, if carried into effect, it would materially improve the efficiency of the schools. In this opinion the Acting Director entirely concurs. He also gives his general approval to the proposals made by Mr. Bickle with regard to salaries, pensions, &c. This question will, however, require to be separately dealt with. On the subject of rewarding parents by giving them a portion of the grant earned by their children, the Acting Director agrees with Mr. Bickle in thinking that it would not be advisable to adopt it, more especially as Mr. Mounsey is of the same opinion, considering that such an inducement to parents is unnecessary.

Mr. Bickle's suggestions for the improvement of handwriting are approved. Government has been addressed on the subject of translating the Grant-in-aid Code into all the vernacular languages.

The question of the transfer of the normal school from Russellkonda and of improved arrangements for supplying the hill schools with efficient teachers, will be separately taken up.

Primary schools in the hill tracts of Vizagapatam.

138. The Government primary school at Rayaghada had 24 pupils on the rolls at the close of the year against 30 pupils at the close of 1883-84. It produced satisfactory results at the Deputy Inspector's examination. Besides the above school, fifty schools were examined by the Deputy Inspector of Schools of the Párvatipur range; the results of the examination were unsatisfactory, except in the case of a few results schools in Rayaghada, the Bitchinkota school in Gunupur, the results schools at Koraput and Nandapur, the salary school at Jeypore, and the combined school at Narayanapatnam. No great improvement can be expected unless the schools are placed under qualified teachers. To remedy these defects, Mr. Bickle proposed to convert the Gunupur middle school into a combined primary school, to abolish the normal class attached to the Gunupur middle school, and to start a normal school out of the funds thus set free. The first two proposals have been sanctioned, and detailed proposals have been called for regarding the third. It is also in contemplation to place the salary and results schools in these tracts on the combined system. The charge of these schools was lately entrusted to the Governor's Agent in Jeypore, and I trust that education in these localities will soon improve.

Primary schools in the Upper Godávari District.

139. The town school at Bhadráchalam contained 36 pupils against 54 at the close of the previous year, and it sent up 6 pupils for the last Middle School examination, all of whom were successful. The normal class attached to this school proved a failure, and it was temporarily closed. The attendance in the primary schools fell from 252 to 203. Government were pleased to sanction towards the close of the year the opening of six schools in the Rampa tract.

Government Muhammadan schools.

140. The middle school at Mylapore, which had for some time produced very indifferent results, was reduced to a primary school in January last. It had 27 pupils on the 31st March. The practising branch of the elementary Muhammadan normal school, Madras, was attended by 52 pupils. The number of Muhammadan combined schools in Madras on the last day of the year was 12, and 335 pupils were attending these schools.

Local Fund schools.

141. From the annexed summary of the Local Fund primary schools, it will be observed that the number of schools rose from 973 to 1,014, but that the attendance fell from 30,825 to 30,252. The decline is confined to six districts, the remaining fourteen districts showing in most cases decided advance, notably Godávari, Kurnool, and Nellore. The highest decrease occurred in Tanjore, in whom the number of schools was reduced by 23 and the attendance proportionately. The reduction was due to a radical change in the policy of the Local Boards, by whom the schools were converted into private combined schools. Omitting Tanjore, the other nineteen districts show a net increase of 810 pupils, which is satisfactory considering the introduction of the new scheme of fees :—

Grand total ...	973	1,014	30,825	30,252	3,230 girls.

The Tanjore district especially shows diminution in schools and scholars. In the case of the South Arcot, North Arcot, and Salem districts the decrease is attributable to the closing of unpromising schools. The number of girls in these schools rose from 2,765 to 3,230.

Municipal schools.

142. The following statement exhibits Municipal primary schools for boys by districts. The total number of primary schools was 4 less than in the preceding year, but the average strength of the schools remained the same.

PRIMARY EDUCATION.

Districts.	Schools		Pupils		Remarks.
	On 31st March 1884.	On 31st March 1885.	On 31st March 1884.	On 31st March 1885.

Coimbatore	8	8	762	677	16 girls.
Malabar	5	1	241	48	
Total, Sixth division ...	21	15	1,414	1,014	
Grand total ..	84	80	4,662	4,444	129 girls.

The first and fourth divisions only show an increase in the number of schools and scholars. The increase in the Ganjam district is due to the transfer of the Municipal elementary schools at Chicacole from the list of aided to that of Local Fund combined schools. The fluctuations in the other districts are slight and do not call for special remark. The number of girls was 129 against 132.

Schools aided on the combined system by Local Fund Boards.

143. The total number of combined schools aided from Local funds remained stationary, viz., 663, but the attendance rose from 24,076 to 24,443, which is encouraging, as these schools have in this year for the first time been brought under the school-fee regulations. Ganjam shows a decrease of 85 schools and 2,787 pupils. This is owing to the closing of a large number of schools for want of funds. The increase in Tanjore is due, as elsewhere explained, to the conversion of Local fund into private combined schools. Coimbatore is credited with an increase of 34 new schools. The Board's action in aiding schools under trained teachers on the combined system, with a view of inducing unqualified teachers of pial schools to join the normal school, has led to this increase. The number of schools in Malabar rose from 298 to 351. At the close of 1882-83, there were 326 schools. There is no entry against Nellore, as the aided combined schools were made Local fund combined schools.

Schools aided on the combined system by municipalities.

144. Combined schools aided from Municipal funds fell from 81 to 54 and their strength from 4,230 to 2,856; but the average strength of the schools remained unchanged, which is satisfactory, as the new fee rules apply to these schools. The decrease in schools is confined to Ganjam and Malabar. The transfer of the elementary schools at Chicacole to the list of Municipal combined schools led to the fall in Ganjam. In Malabar the decrease is heavy, but the number of schools is still greater than the figure of 1882-83, viz., 30 schools.

Aided and unaided elementary results schools.

145. The number of elementary results schools for boys, aided and unaided, fell respectively from 7,978 and 4,737 to 7,526 and 4,253, and the attendance thereat from 207,554 and 92,339 to 187,220 and 79,553.

The number of aided and unaided girls' schools, on the other hand, rose from 301 and 100 to 310 and 165 and their strength from 10,920 and 2,497 to 11,401 and 3,740. Particulars of schools and pupils by districts are given in the subjoined statement:—

Only in nine out of twenty-two districts more than a fourth of the boys were attending schools connected with the department, while the eight districts named in the margin have less than a fifth of their pupils under instruction. As regards percentages of girls under instruction to those of school-going age, great fluctuations will be noticed. Four districts had not a single girl at school and three districts had but one girl, while seven districts had more than one per cent. of girls attending schools.

Cuddapah.	North Arcot.
Kurnool.	Nilgiri.
Nellore.	Malabar.
Chingleput.	South Canara.

Comparing the figures with those of the preceding year, it will be observed that eleven districts show increase and eleven decrease in the number of male pupils, and seven districts decrease in girls. The total number of male pupils fell from 29,456 to 28,046. Malabar shows a diminution of 1,132 pupils, North Arcot 348, and Madras 237.

The following extracts are taken from the annual report of the Deputy Inspector of Muhammadan Schools:—

"The schools examined during the year were those in the second and third divisions, besides the Muhammadan schools of Arcot and Vellore in the fourth divsion and the Local Fund combined Muhammadan School of Panagudi (Tinnevelly District) in the fifth division, the last having been examined under special orders. The Yeomiah school of Arcot was found in a very unsatisfactory condition, and the result of my examination of the Municipal Muhammadan school, Vellore, was hardly satisfactory. The Local Fund combined system Muhammadan school, Panagudi, in the Tinnevelly District, however, passed a fair examination.

"*The Second Division.*—Two Government, three Local Fund (on the combined system), six Municipal, three salary grant and thirty-five results schools were examined in this division in the following ranges:—

"*Masulipatam range.*—The schools examined in this range were the Municipal Muhammadan school, Masulipatam, the Muhammadan department of the Noble College, Masulipatam, the Muhammadan girls' schools of Javarupetta and Englishpolem in the Masulipatam Municipality under the management of Miss Brandon and Mrs. Ruthnam respectively, the Muhammadan girls' school of Gudur under the management of Miss Brandon, and the Muhammadan results schools in the villages of Chandole, Addepalle and Piddaperru in the Répalle Taluk. Of these, the Municipal Muhammadan school of Masulipatam and the Muhammadan department of the Noble College, Masulipatam, passed a satisfactory examination. The result of the examination of the Muhammadan girls' school, Javarupetta, under the management of Miss Brandon, was middling, while the Muhammadan girls' school of Gudur, in the Bandar taluk, under the management of the same lady, and the Muhammadan girls' school of Englishpolem, under the management of Mrs. Ruthnam, passed a satisfactory examination. Of the two Muhammadan schools of Chan-

dole in the Répalle Taluk, one did poorly, but the results of the other school in the same village, as also of the Muhammadan schools of Addepalle and Piddaparru in the same taluk were fair.

"*Bezváda range.*—The schools examined in this range were the Muhammadan department, C.M. High School, Bezváda, C.E.Z.M. Muhammadan girls' school, Bezváda, the Local Fund combined system Muhammadan school, Kondapalle, and the results schools of Bezváda, Pendala, Nandigama and Valluru. Of these, the first two passed but an indifferent examination, but the result of the Local Fund combined Muhammadan school, Kondapalle, was very fair. The results schools in the range did fairly also, with the exception of one in Pendala under a very inefficient teacher who has since been replaced by one better qualified.

"*Guntúr range.*—The schools examined in this range were the Municipal Muhammadan school of Guntúr, the Muhammadan girls' school at Guntúr under the management of Miss Dryden and the Muhammadan results schools of Guntúr, Varagani and Amarávati, the two latter in the Sattenapalle Taluk. Of these the Municipal Muhammadan school of Guntúr passed on the whole a fair examination. The Muhammadan girls' school under the management of Miss Dryden was very satisfactory both as regards numbers and efficiency, there being 69 girls on the rolls at the time of examination, of whom 16 were presented for examination under the first standard. In every way the school, which had been started but a short time back, appeared to me very promising. The results schools in the range passed more or less satisfactory examinations.

"*Cuddapah range.*—The schools examined in this range were the Muhammadan department attached to the Government High School, Cuddapah, and two results grants schools in the Cuddapah Municipality. Excepting one of the two latter, the schools did fairly at my examination.

"*Kurnool range.*—The schools examined in this range were the Muhammadan department attached to the Government High school, Kurnool, and the two Muhammadan results schools in the Kurnool Municipality. The Muhammadan department attached to the Government High school, Kurnool, passed but an indifferent examination. Of the results schools, one did fairly and the other badly.

"*Nandyál range.*—The schools examined in this range were the Local Fund combined Muhammadan school of Nandyál and a Muhammadan results school in Atmakúr in the Nandikótkur Taluk, both of which passed a satisfactory examination.

"*Bellary range.*—The schools examined in this range were the two Municipal Muhammadan schools of Bellary, the Municipal Muhammadan school of Adóni and the Muhammadan results schools, 6 in Bellary and 2 in Adóni. Of the Bellary Municipal schools, 1 in Cowle Bazaar passed a satisfactory examination, but the result of examination of the other in Brucepetta was indifferent. The Municipal Muhammadan school of Adóni passed a tolerably satisfactory examination, but the results schools in the range, except one in Adóni, did badly at my inspection.

"*Hospet range.*—Only one Muhammadan school (in Hospet) was examined in this range, and the result of the examination was extremely unsatisfactory. No register was kept, nor were the boys taught anything but Arabic reading.

"*Anantapur range.*—The only school examined in this range was the Muhammadan department, Municipal school, Anantapur, and the result of the examination was pretty fair. The school, however, has been abolished since, the Municipality being unwilling to bear the cost.

"*Penukonda range.*—The schools examined in this range were the Muhammadan department, Local Fund combined system school, Penukonda, and the Muhammadan results schools in Hindupur and Chowloor in the Hindupur Taluk, and these schools passed a satisfactory examination.

"*The Third or Presidency division.*—The schools examined in this division were the Government Madrasa-i-Azam, the Government Muhammadan middle school, Mailapur (since reduced to a primary school on the combined system), the Government Muhammadan Normal school, Madras, the combined system schools, Madras, 12 in number, and the Muhammadan results schools in Madras, 13 poor and 2 non-poor. I also assisted the Inspector of Schools, Presidency, at the inspection of the Doveton and Christian Colleges and the Local Fund Normal school, Poonamallee.

"The Hindustani and Persian (in which languages I examined the school) results of the Madrasa-i-Azam were tolerably satisfactory, and those of the Mailapur school indifferent. The practising department of the Government Muhammadan normal school, Madras, did fairly at my inspection, and the results of the normal department were also on the whole satisfactory. The result of my examination of the Muhammadan department attached to the Christian College was middling. Of the twelve combined system schools, Madras, seven passed satisfactory examinations, but the results of the rest were more or less unsatisfactory, two of them (opened last year) having produced extremely poor results. I may mention that the manager of one of these two (whose school earned so small a grant as Rs. 2-3-0 for the work of the year) was also found to be very inefficient in matters of routine, his school registers having shown several irregularities. Although in the present instance, these irregularities, added to the extremely poor results, may form sufficient grounds for withholding the grant and perhaps for abolishing the school altogether, I beg to state in this connection that a general withholding of the annual grants on account of irregularities in matters of routine, provided there is no deception or fraud, is apt, in the present state of Muhammadan education, to render several honest (though, it may be, not sufficiently well versed in matters of routine) schoolmasters ineligible for aid

PRIMARY EDUCATION.

on the result system, especially in the mofussil where there are no Inspecting Schoolmasters to assist them. Mistakes both of omission and of commission will, on close examination, be found more or less in the register of almost every elementary school where the teacher is generally a man of no very great information or aptitude; but in the Madras Municipality, where there is an Inspecting Schoolmaster solely to look after these schools, such irregularities might have been prevented had that officer been more attentive and vigilant. I am glad, however, to state that the Inspecting Schoolmaster in question (a very old man of more than 25 years' service in fact too old for the work) who I may mention was until July last under the direct control of the Local Deputy Inspector and was placed under me by Proceedings, No. 4588, dated 10th July 1884, has since been on my recommendation, warning on several occasions having proved of no avail, compelled to retire; and that with a more vigorous officer in his place I hope to see such irregularities duly brought to my notice in future, with a view to their being rectified or reported to the Inspector if necessary. I may add that to prevent the recurrence of such irregularities in schools taught by trained men the proper keeping of school registers has recently been made a subject of instruction at the Muhammadan normal school and the normal students will be tested in this particular in future examinations.

"The Muhammadan poor schools, Madras, taught mainly by indigenous pial schoolmasters of the *Moollah* type, produced as in the previous year more or less unsatisfactory results, but the non-poor schools, two in number, passed a very fair examination.

"The unsatisfactory condition of the Muhammadan poor schools, Madras, is due to the rigid conservatism of the teachers who cling to their time-honored subjects of instruction and the old fashioned modes of teaching and are but with difficulty persuaded to conform to the secular studies prescribed by the Grant-in-aid Code. Their advanced age, besides has been found a bar to their admission into the Muhammadan normal school, Madras, though after considerable expostulation a few of them expressed their willingness to join on the increased scholarship sanctioned in the case of such teachers. As the next best resort, the sons and relations of such teachers have been admitted as far as considerations of qualifications and character permitted. I must here repeat the remark made by me in my last annual report that to increase the usefulness of the Muhammadan normal school, it is necessary that Local and Municipal Boards should co-operate with the department and try as much as possible to see all schools under their management provided with certificated teachers from the Muhammadan normal school. I am glad to state here that two teachers of Local Fund schools are now undergoing training at the normal school, and that a trained man from the school who was conducting a combined system school in Madras was recently appointed by the Local Fund Board, Anantapur, as head master of an elementary school under the Board's management.

"As I have said in my previous annual reports Muhammadan education in the Presidency is advancing though at a slow rate, and it is my belief that in the present indigent and backward state of the community in this Presidency, the progress of Muhammadan education will be but slow."

Regarding Mappila education Mr. Garthwaite writes :—

"The following statement exhibits the state of Mappila education in Malabar during the past ten years :—

Years.	Number of schools aided.	Pupils.		Results grants and stipends			Remarks.
		Boys.	Girls.	RS.	A.	P.	
1875-76	210	* 7,212		15,555	0	0	* These figures represent boys and girls.
1876-77	201	* 6,445		10,195	0	5	
1877-78	166	* 5,274		8,650	0	0	The expenditure shown in this statement includes grants from all sources—Local, Municipal, and Provincial—and excludes expenditure on the Mappila normal school
1878-79	183	* 4,963		7,922	1	8	
1879-80	251	* 5,648		10,317	9	9	
1880-81	210	5,961	392	9,584	8	0	
1881-82	205	5,131	435	11,750	2	0	
1882-83	158	4,415	559	8,873	14	10	
1883-84	213	6,551	1,014	10,533	8	4	
1884-85	188	5,422	638	8,620	9	3	

"During the year under report there has been a large falling off in the number of schools and pupils and in the amount of result grant and stipends paid to Mappila schools. The expenditure on Mappila education in 1884-85 is the smallest that was ever spent during the decade.

"The following extract from a letter recently addressed to you deals fully with the retrogression in the education of Mappilas during the year under report :—

"I may premise that there being amongst the Mappilas but little demand for secondary education, the efforts made have all been in the direction of bringing under inspection and improvement primary schools under the management of the Mullas of the numerous mosque

schools in which previously the Koran in Arabic was the sole subject of instruction. To do this, it was found necessary to offer a pecuniary inducement in the shape of a small monthly stipend to the Mulla and a result grant to the teacher employed by him to teach the three Rs which he himself was too ignorant to teach. Hence the grant-in-aid system on which the schools were aided was a modified combined system, having, however, this serious but unavoidable defect that salary grants were given to unpassed men and results grants were given at the maximum rates.

"It will be observed from the table that during the past ten years Mappila education, taken as a whole, shows, to say the least, but little expansion, whether we look at the number of schools, at the number of scholars, or at the amount spent. Indeed, the amount spent last year of the decade is only a little over half the amount spent in the first years. The fluctuations during the years have been considerable. This is due to the fluctuating policy of the Board which has depended very much, if not wholly, on the funds at disposal. From the first there has been no difficulty in getting Mappila schools under inspection, nor in getting the Mappila children to receive the usual instruction, nor even in getting Mappilas (for obvious reasons, it is desirable to train Mappilas and not Hindus as schoolmasters of a race suspicious of Hindu and Christian interference) to come to the Mappila training school to be trained as teachers. The difficulty has always been and is still in getting the large allotment of funds which is necessary, if, within a reasonably short time, any sensible educational impression is to be made upon a large and educationally very backward race. Thus the large decline in the expenditure of 1882-83, in which year the number of Mappila schools aided was the smallest, was due to the stringent measures adopted by the Board to curtail educational expenditure under all heads. No new schools were allowed to be aided, and the salary grants of schools closed were not allowed to be transferred to other schools which needed them, the consequence being the closing of a large number of Mappila schools. The rates of results grants given to Mappila schools have also fluctuated considerably. In some years, the maximum rates, together with 25 per cent. for Muhammadans were allowed, while in other years the 25 per cent. was withheld. In the past year, not only was the 25 per cent. withheld, but the rates were reduced to two-thirds of the maximum rates, and for the current year, a new rate of results grants to Mappila schools has been adopted, viz., two-thirds of the maximum rates, together with the 25 per cent. allowed for Muhammadans.

"The rate of combined system stipends allowed to Mappila schools have also fluctuated considerably. Originally all passed and trained Mappila masters were paid stipends ranging from Rs. 5 to Rs. 6, and unpassed Mullas of mosque schools who brought their schools under inspection received stipends ranging from Rs. 3 to Rs. 4. But these rates were soon reduced to Rs. 4 in the case of passed and trained Mappilas and to Rs. 2 to Rs. 3 in the case of unpassed Mullas. These fluctuations have much shaken the faith of Mappila schoolmasters in the permanence of State aid, and placed additional difficulties in the way of the extension of Mappila education."

Muhammadan education formed the subject of correspondence quite recently, and it will be noticed in the next report.

Number of schools that presented and passed pupils under the first four standards.

147. The number of results schools that presented pupils for the first four standards fell from 11,884 to 11,619, or by 2·3 per cent., and that of schools that passed pupils from 11,556 to 11,351, or by 1·8 per cent. The number of schools that failed to pass pupils under any standard was 268 against 328 in the previous year, which indicates an improvement in the quality of instruction imparted in elementary schools in rural tracts.

First division	... 12
Second do.	... 49
Third do.	13
Fourth do.	10
Fifth do.	... 130
Sixth do.	... 54
Seventh do.	... ...
	268

The failures in each division are noted in the margin, from which it will be observed that nearly one-half of the failures appertains to the fifth division. There is no failure in the seventh division, and the failures in the first, third, and fourth divisions are trifling compared with those in the second, fifth, and sixth divisions.

Number of pupils presented and passed under the first four standards.

148. The subjoined summary gives the number of pupils, male and female, presented and passed under the first four standards :—

PRIMARY EDUCATION.

Districts.	Pupils presented for Standard								Pupils passed under Standard

PRIMARY EDUCATION.

The number of boys and girls presented for the first four standards rose respectively from 160,009 and 12,513 to 160,058 and 13,735. Viewed by standards, there was a large decrease (3,391 boys) in the number of pupils presented for the first standard, while under boys for the other standards and under girls for all the standards there was more or less increase. The aggregate number of male pupils passed under the four standards fell from 115,737 to 115,284, but the decrease is confined to the first standard, the second, third, and fourth standards showing an actual increase of 3,031 pupils. The number of girls passed under the standards in question rose on the whole from 9,701 to 10,729, or by more than 10 per cent. The diminution in the number of male pupils presented and passed under the first standard is owing to causes which I have explained elsewhere. The percentages of passes under boys in the first four standards were 72, 75, 69, and 67, and those under girls 75, 81, 80, and 80, showing that the girls' schools continued to maintain their relative efficiency as regards boys' schools.

Number of pupils passed in different heads under the first four standards.

149. Statement No. V in the appendix gives the number of pupils passed in different heads under the first four standards in each district. The following is a summary of the statement:—

Standards.		Vernacular.									English.			Needle-work.
		Reading.	Writing.	Arithmetic.	Poetry.	Grammar.	Geography.	History.	Hygiene.	Agriculture.	Reading.	Writing.	Grammar.	
I	1879-80.	23,951	24,213	21,777	17,741	...	..	...	..	.	...	...	..	1,200
	1883-84.	50,167	51,441	49,126	...	...	...	..	.	...	...	.	.	1,731
	1884-85.	46,631	48,554	46,391	...	...	..	..	...	...	...	..		1,948
II.	1879-80	15,596	15,778	12,627	10,680	...	..	...	..	..	..	..	.	898

	1884-85.	36,718	37,584	34,723	34,746	.	.					.		1,384
III	1879-80.	9,950	10,380	7,743	6,893	4,479	5,022	462	..		1,582	1,640		558
	1883-84.	18,420	19,473	16,485	17,735	8,121	10,443	1,752	8	4	3,260	3,514		770
	1884-85.	20,494	21,759	18,865	20,433	9,195	11,157	2,820	134	4	3,717	3,923	7	940
IV.	1879-80.	3,377	3,535	1,759	2,628	1,535	1,570	228	253	147	839	813	434	284
	1883-84.	7,036	7,489	4,484	6,575	3,651	4,166	1,022	1,123	123	2,164	2,461	1,359	352
	1884-85.	7,727	8,276	5,259	7,309	4,061	4,793	1,508	1,433	123	2,548	2,853	1,508	553

There was a decline in the number of passes under 'Reading,' 'Writing,' and 'Arithmetic' of the first standard, but this is due to a smaller number of pupils having been presented for that standard during the year. Marked improvement may be noticed under all other heads and standards. Owing to the introduction of Hygiene as an alternative subject for girls under the third standard, the number of pupils passed in that subject rose from 8 to 134. The number of pupils who passed in Agriculture was the same as in the preceding year. In Needle-work 4,825 girls secured a pass in the first four standards against 4,105 girls in 1883-84 and 2,940 girls in 1879-80. A comparison of the passes in 1884-85 with those in 1879-80 will show that the numbers had doubled in most cases, and in some cases they are three and even four times as great as in that year. The proportion of passes under the higher as compared with the lower standards, notably in Arithmetic, has also greatly improved. There can be no better proof of the advance during the quinquennium in the average standard of village schools than these facts.

Percentage of passes in Reading, Writing and Arithmetic.

150. The next table compares the percentages of passes in Reading, Writing, and Arithmetic of the first four standards.

Standards.	Reading.		Writing.		Arithmetic.	
	1883-84.	1884-85.	1883-84.	1884-85.	1883-84.	1884-85.
First	65	63	67	66	64	63
Second	67	67	69	69	62	64
Third	60	62	64	65	54	57
Fourth	61	61	65	66	39	42

PRIMARY EDUCATION.

In the first standard, there was a decrease under each head, but in the other three standards the percentages remained stationary or advanced. The improvement in the Arithmetic of the second, third and fourth standards is satisfactory.

Government girls' schools.

151. A list of Government elementary schools for girls on the 31st March 1885 is given below. The number of schools rose from 15 to 22, which is the result of—

(i) the establishment of schools at Satyamangalam, Kollegal, Kanatur (Cannanore), Tiruvengód (Tellicherry) and Mulapet (Nellore);
(ii) the transfer of the Wálajápet school from the list of middle schools to that of primary schools;
(iii) the transfer to Government of the Berhampore Hindu and Muhammadan and Coimbatore Municipal girls' schools and the Punganur and Dharmapuri Local Fund girls' schools; and
(iv) the raising, to the status of middle schools, of the primary schools at Cuddalore, Vriddháchalam, Ongole and Karantatangudi.

Schools.	No. on rolls on the 31st March 1884.	No. on rolls on the 31st March 1885.
Berhampore Hindu girls' school	62	70
Do. Muhammadan girls' school ...	43	49
Chicacole girls' school	127	87
Russellkonda do.	76	76
Tekkali do.	48	37
Párvatipur do. ... ... } Pálkonda do. ... ... }	85	104
Bhadráchalam do.	30	28
Anantapur do.	46	47
Mulapet Muhammadan girls' school	...	48
Venkatagiri girls' school	50	52
Wálajápet do.	52	67
Chittoor do.	50	55
Punganur do.	34	43
Krishnagiri do. ... ... } Dharmapuri do. ... . }	52 ...	86
Poraiyar do.	29	30
Coimbatore do.	100	132
Coimbatore (two schools)	...	62
Kanatur (Cannanore) girls' school	...	87
Tiruvengod (Tellicherry) do.	.	28
Total ...	884	1,188

The attendance in the above schools rose from 884 to 1,118, or by 26 per cent. The Chicacole, Tekkali and Bhadráchalam schools declined in numbers. The strength of the other schools has advanced.

Municipal girls' schools.

152. Eleven girls' schools were being maintained by the Municipalities at the close of the year against 17 schools in the previous year. Two schools were started by the Karúr Municipality, while the two schools in Conjeeveram and the Tamil girls' school at Calicut were closed, the Chidambaram and Srírangam schools were made middle schools and three schools were constituted Government schools.

Schools.	No. on rolls on the 31st March 1884.	No. on rolls on the 31st March 1885.
Adóni girls' school	22	21
Nellore do.	37	38
Conjeeveram girls' schools (2)	43	.
Salem girls' schools (5)	170	151
Máyavaram girls' school	70	81
Karúr girls' schools (2)	...	63
Coimbatore girls' school	100	...
Erode girls' school	35	49
Calicut Tamil girls' school	60	...
Total ...	537	403

The attendance fell on the whole from 537 to 403. The Adóni girls' school has been taken over by Government since the close of the year.

Local Fund girls' schools.

153. Excluding the Punganur school, transferred to Government, the number of Local Fund primary girls' schools was 27 against 28, but the attendance rose from 988 to 1,039.

Circles.	Schools.		Pupils.	
	1883-84.	1884-85.	1883-84.	1884-85.
Godávari	15	16	514	586
Bellary	3	2	65	40
South Arcot	6	6	284	338
Salem	4	3	125	75
Total ...	28	27	988	1,039

Owing to the retransfer of the Narsápur Local Fund girls' school to the list of primary schools, the number of such schools rose by one. The Bellary Board closed one of their schools while the Dharmapuri school in Salem was taken over by Government.

Aided and unaided salary schools for girls.

154. The aided and unaided salary schools for girls fell both in number and strength, as will be seen from the annexed table.

Divisions.	Schools.		Pupils.	
	1883-84.	1884-85.	1883-84.	1884-85.
First division	18	15	1,046	893
Second do.	4	3	149	124
Third do.	15	11	1,207	1,083
Fourth do.	5	4	308	264
Fifth do.	1	2	89	155
Sixth do.	1	3	36	188
Total ..	44	38	2,835	2,707

The gradual diminution in this class of institutions is due to the placing of such schools on the results system, or to their transfer to the list of secondary schools.

Assignment of funds for results grants.

155. I alluded in paragraph 3 of this report to the inadequacy of the provision for results grants in most of the districts. In remarking on the Local Fund budget estimates for 1885-86, this subject received my attention, and in no less than 16 out of 21 districts, I recommended that the provision for results grants should be raised. Only in three districts—Trichinopoly, Nílgiri and South Canara—did the provision made by the Boards appear adequate, and as regards Malabar and Chingleput the assignment, though not quite sufficient, could not be raised for want of funds. The increased allotments recommended in the case of sixteen districts were proposed to be met partly from the contribution which the Boards concerned had been paying to Provincial funds on account of Deputy Inspectors, the Government having waived their claim to the contributions in question, in consideration of the straitened condition of the finances of the Boards. The assignment for grants in Municipal budgets for the same year (1885-86) was generally fair, and I found that increased provision was necessary in the case of the budgets of thirteen Municipalities—Berhampore, Chicacole, Anakápalle, Vizagapatam, Vizianagrum, Masulipatam, Anantapur, Cuddapah, Mannárgudi, Negapatam, Coimbatore, Trichinopoly, and Cochin.

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

VI.—SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

Number and strength of schools for special or technical training.

156. The number and attendance of schools for special or technical education for the last two years and for 1879-80 are compared below :—

Classes of schools.	1879-80.		1883-84.		1884-85.	
	Schools.	Pupils.	Schools.	Pupils.	Schools.	Pupils.
Schools of Art	1	100	1	147	1	162
Medical schools	2	238	5	225	5	197
Civil Engineering schools	1	109	1	73	1	106
Normal schools for masters	19	533	42	1,044	48	1,155
Do. for mistresses	3	129	8	263	12	363
Industrial schools	2	91	4	138	5	179
Ordnance Artificers' school	1	60	1	72	1	70
School of Agriculture	1	25	1	87	1	96
Total ...	30	1,285	63	2,049	74	2,328

There was an increase in the year of 6 normal schools for masters, of 4 normal schools for mistresses, and of 1 industrial school. The attendance improved in all classes of institutions, except under medical schools and the Ordnance Artificers' school. The decrease in medical schools is due solely to advance in the standard of medical education in consequence of the orders of Government requiring the employment of men not below the grade of Civil Apothecary for the charge of hospitals and dispensaries. It will be observed that, during the last quinquennium, the number of technical or special institutions has more than doubled, and that the attendance has nearly doubled. Under art and industrial institutions some progress has been made, but not great, but further improvement, extensive and still more intensive, may be expected when the scheme for the development of technical education is brought into force, if it receive liberal financial support. The most satisfactory advance is under normal schools, those for masters having risen from 19 to 48, and those for mistresses from 3 to 12. The increase in the number has necessarily been not quite proportionate, although very great. Approximately, one thousand trained elementary teachers are now being annually provided for primary schools. This gives an average of one in every fifteen years for each school, which is probably below the demand, even if the number of schools be permanently fixed, and all schools were already provided with qualified teachers.

(a) *Schools of Art.*

School of Arts, Madras.

157. The attendance of the School of Arts at Madras rose from 147 to 162, showing that the institution is gradually becoming popular, and further advance in strength will take place when the scope of the institution is enlarged and the services of a competent assistant to the present Superintendent are secured. The following extracts from my review of the annual report of the Superintendent show the working of the school during the year :—

The artistic branch appears to be progressing satisfactorily both as regards numbers and efficiency. The average attendance, though still poor, has improved in relation to attendance in the proportion of three to four. A pleasing and novel feature in the year's history is that the institution is beginning to fulfil its chief object—the supply of skilled labor for various art in districts, some students having obtained suitable employment. The engagement of one as a designer of textile fabrics in a coral firm is specially gratifying, for it is in relation to improved design that the school is calculated to benefit especially the industries of the country. From the three examinations held, it appears that the instruction in freehand drawing was more successful than that in geometry, 5 obtaining certificates against 1. The failure in the latter subject is probably due to the low general educational standard of most of the students. ..... The Director is glad to hear that marked improvement has taken place in the work of the apprentices and that the progress made by the students was satisfactory. It is gratifying also to find that the apprentices show "an increased interest in their work and some signs of a spirit of emulation."

The Director appreciates the difficulties under which Mr. Havell has labored in regard to instruction, but trusts that his hands will soon be strengthened by the appointment of an assistant by the Secretary of State. The difficulty in regard to accommodation has been removed by the extension and alteration of the building. SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

The Director has read with great interest the paragraph of the report regarding the instruction given and progress made in wood-carving and engraving and metal work. A carved frame was worked for one of the Amarávati marbles in the Central Museum. The Superintendent will doubtless give special attention to this department. The Director takes the opportunity of thanking Colonel Hawkes for having procured a supply of box-wood, hitherto apparently not used in this Presidency, from Northern India, for engraving purposes.

The instruction in the manufacture of stained glass windows seems to have been judicicusly conducted, the students having been instructed in the process of execution as well as of design.

The Director agrees with the remarks made by Mr. Havell in the paragraph of his report on the subject of the re-organization of the course of instruction. The re-organization of the courses of the school will be dealt with in connection with the scheme of technical education sanctioned by Government in their Order, No. 377, dated the 3rd June 1885. In order to accentuate the special ends for which the school has been established, change in its name, indicating its industrial character, seems desirable.

The institution seems to have been very active in its manufacturing branch, turning out a quantity of high-class work. Experiments too have been made in various directions as regards pottery and valuable information collected. The discovery of superior kaolin, uncontaminated by iron, near Salem, will, it is hoped, prove an important one.

It is noted that a new inventory of stock has been commenced. The result should be reported in due course, as well as the valuation of the articles. An examination must invariably be held at the close of each year.

The expenditure amounted to Rs. 28,261-15-1 and the receipts to Rs. 43,615-5-8. The falling off in the amount of receipts on sales is satisfactorily explained, and in the general remarks made by the Superintendent, the Director concurs. It is satisfactory to note that the fees increased by 100 per cent. The net cost of the institution to Government appears to have been slightly more than in the preceding year. It is observed that the outstandings are nearly 600 rupees greater than in 1883-84. The liabilities are, however, less by 700 rupees.

The museum and library seem to be carefully attended to.

(b) *Medical Schools.*

Number and strength of medical schools.

158. The number of medical schools remained unchanged, but the attendance fell by 28, which is chiefly due to the diminished strength of the Auxiliary medical school.

Madras medical school.

159. The school department of the Madras Medical College was 86 strong on the 31st March 1885, against 87 on the same date in the preceding year. The following extracts from my review of the Principal's report show the progress of the school department :—

Second Department or Apothecary Class.—This department consisted of 76 male and 7 female students, or 83 in all, showing little or no change as regards the figure of the previous year. Five were Colonial students and 1 was a Mysore Hospital Assistant. The Director learns with regret that 2 students, owing to continued ill-health, had to be granted leave; that 1 Hospital Apprentice died; and that a very promising Colonial student was drowned. Thirty-three apprentices and 3 female candidates appeared for the First or Primary Examination conducted by an examining board unconnected with the college, and it is satisfactory to find that all obtained more than half marks, though 3 failed to obtain the required one-third in one subject. The net result was thus only 3 failures, and as they did remarkably well in all other subjects, the action of the College Council, in permitting them to enter on their third year's course with the proviso that they be required to attend a course on the subject in which they respectively failed and undergo an examination in it, is endorsed. The result of the Final Examination of 3 Hospital Apprentices and 3 female students is regarded as highly satisfactory, all having passed very creditably. The Acting Director is pleased to find that many of the students voluntarily purpose appearing for higher distinctions. The reports of the Professors, it is noted, were on the whole very favorable.

Auxiliary medical school, Ráyapuram.

160. The strength of the Ráyapuram Auxiliary school fell from 83 to 47, though no branch medical schools were started in the mofussil during the year under report. This school must soon cease to exist under the operation of the orders already referred to, but it seems doubtful whether District Boards will be able to provide a larger number of schools for the education of men of the Hospital Assistant class. No Board at present sends pupils to this school to be trained for its service. If this were done the school would adequately supply the needs of all the central districts.

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

The annexed extracts from my review of the annual report sum up the facts regarding the working of the school:—

The school opened with 48 students—a less number than the previous year, but the high number of that year was due to the transfer of 27 students from the Medical College. The weakness of the second and first year classes, 12 and 3 (deducting 6 Burmese), is noted. The Principal is requested to report the strength of the class now to be formed shortly after the session begins. The pupils were divided into three classes—third year, second year, and first year. Most of the pupils were Sudras and Native Christians. There were 3 Europeans and East Indians, only 2 Muhammadans and apparently no Brahmans. The absence of Brahmans is noteworthy, as they already constitute a fair portion of the students of the Medical College. Five pupils are described as belonging to other castes, but it will be well in future to give the caste of all the pupils. The Director will be glad to see Brahmans and Vaisyas represented and the number of Muhammadans improved.

At the Final examination at the Medical College 26 students went up (1 student having left) and 21 passed—a very good result. Out of 22 Government pupils only 2 failed. One private student only out of 4 passed. The Director regrets to hear that the 3 students were wanting in ability, 1 having failed in the previous year also. It is satisfactory to find that a remanded Civil Medical Pupil took advantage of his opportunity for amendment and passed. The Director notes the testimony borne to the industry and attainments of student Ambutty. As the two Government students who failed are well spoken of, permission will be asked for giving them a trial for another year with stipend.

It is satisfactory to note that the second year class, including 4 remanded students, is not only well spoken of by the teachers, but by Dr. Thompson.

The first year class, consisting of 6 Burmese and 3 remanded pupils, the Director regrets to hear, is not a promising one. As of the 3 Burmese students, who did not make much progress, owing to deficiency in English (2 promise well for the current year) it is desirable that they should continue their studies. The third, however, Moung Nay Htoon, the Director agrees with Dr. Thompson in thinking should be removed. It is satisfactory to find that the remanded students have much improved.

The conduct of the students, it is noted, was very satisfactory.

The table giving the number of meetings, lectures, examinations and proportion of examinations to meetings shows good work on the part of the teachers.

The Government gold medal competed for by the school and the schools at Madura and Nellore was awarded to a student, P. J. Devasagayam, of the institution, by the Examining Committee and Dr. Thompson naturally notes with pleasure that the medal has been won for the third time in succession by one of his students.

Ten new books were added to the library, making a total of 25. The Director would like to see the library developed more rapidly.

The health of the students has on the whole been good.

The fees, from private students, amounted only to Rs. 270. This was owing to decrease in the number of private students.

The expenditure amounted to Rs. 16,127-0-8 against Rs. 15,326 in the previous year, and Rs. 12,666 in the year before.

The Director is glad to find that Dr. Thompson speaks highly of his Assistants.

Nellore medical school.

161. The strength of the Nellore medical school fell from 23 to 17. Eight students appeared for the final examination for Hospital Assistants' certificates, and it is satisfactory to note that all of them were successful. Four of the pupils were examined in English and 4 in Telugu.

Tanjore medical school.

162. The Prince of Wales' medical school at Tanjore shows improvement in attendance, but it has not yet commenced to send in pupils for any public examination.

Madura medical school.

163. The Local Fund medical school, Dindigul, which was removed to Madura, improved in strength and made fair progress during the year. Eight students appeared for the final examination for Hospital Assistants' certificates, of whom 7 were successful against 9 out of 10 in the previous year.

(c) *Civil Engineering Schools.*

Civil Engineering school, Madras.

164. The junior department of the Civil Engineering College improved in strength, the number on rolls at the close of the year being 106 against 73 on the 31st March 1884 and 49 on the 31st March 1883. The progress of the school department may be gathered from the following extracts from the review of the annual report :—

The present senior division consists of 8 students and the junior of 10, which shows that the first department has no difficulty in keeping up its numbers. The progress of the students is favorably reported on.

The senior division of the second department consisted of 26 students, and it is satisfactory to find that all have passed at the examination held in May, 7 obtaining certificates as supervisors and the rest as overseers.

The junior division, consisting of 24 students, had just gone through a satisfactory sessional examination and earned promotion.

The senior division of the draftsmen's class consisted of 9 students: 1 secured a certificate of the second class and the others third-class certificates. It is stated that several of the students are excellent draftsmen, and that they would have obtained first-class certificates had they paid more attention to estimating for bridges and irrigation works, as compared with estimating for buildings.

The junior division consisted of 21 students, whose examination showed fair results.

The senior division of the survey class consisted of 7 students, 2 of whom secured second and the rest third class certificates.

The junior division consisted of 15 students, who had passed a very fair sessional examination.

Sixty-nine independent candidates appeared for examination as draftsmen and 18 as surveyors. The majority were employed in the Public Works Department and under Local Fund Boards and desired to obtain a higher class of certificate than that possessed by them.

The applications for admission to the junior department have been more numerous than ever, and, generally, they have proceeded from persons who have received a superior education. This is indicative of the growing popularity of the institution and also gives promise of even better results in future. It is matter for regret, therefore, that all the students qualified cannot be admitted.

The Walker scholarship was competed for by 11 natives of the West Coast districts, and secured by S. Jacob, who joins the second department. The examinations were held at Calicut and Mangalore.

The smallness of the number (3) of military students, who are to enter the institution, is attributed to actual and possible departures for field service.

The photographic class appears to have made good progress.

The Principal justly observes that the current year marks an important era in the history of the institution, the higher ranks of the Public Works Department having been systematically opened, for the first time, to its students in accordance with the orders of the Supreme Government guaranteeing one such appointment annually to the college.

The Acting Director is also glad to note that the remaining students, who passed out of the first department, have secured fairly remunerative appointments.

Mr. Krishnan Nayar, B.A., B.C.E., the most distinguished student of the previous year, the Acting Director is glad to learn, has been appointed an Assistant Engineer on the South Indian Railway, while another student has been employed by the Government of Maisúr. While the popularity of the college is increasing, it is gratifying to record that students of merit find no difficulty in getting employment, and there is no doubt that the demand will continue to increase.

It is satisfactory that, as far as can be traced, the passed students of the other departments have also obtained remunerative employment.

The Principal anticipates some difficulty in regard to the employment in the Public Works Department of the Engineering students now leaving, owing to the restrictive orders with reference to civil expenditure, but he anticipates no such difficulty in regard to draftsmen for whom there is an urgent demand everywhere.

(*d*) *Normal Schools for Masters.*

Number and strength of normal schools for masters.

165. There was a further accession of 6 schools during the year to the list of normal schools for masters, which is due to

(i) the establishment by Local Boards of elementary normal schools at Madanapalle, Wellington, Tiruválúr, Karúr;

(ii) the establishment by mission societies of normal schools at Tuticorin, Puttur, and Nettur; and

(iii) the closing of the Pálghat Government normal school.

The attendance rose from 1,044 to 1,155 or by 10 per cent. against an increase of 7 per cent. in the previous year. Eight hundred and eighty-six candidates appeared from these normal schools for the Special Upper Primary Examination against 757 in the previous year, and the number of passes was 676 against 472. The percentage of passes thus rose from 62 to 76, which indicates an improvement in the efficiency of instruction and the selection of suitable candidates.

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

Normal schools, first division.

166. The annexed statement gives particulars of the normal schools in the first division :—

Normal schools.	Number on rolls on 31st March		Special Upper Primary Examination, 1883.			Special Upper Primary Examination, 1884.		
			Examined.	Passed.		Examined.	Passed.	
	1884.	1885.		First class.	Second class.		First class.	Second class.
Russellkonda Government normal school ...	16	18	12	4	3	14	2	6
Vizagapatam do. do.	25	25	23	18	...	23	8	11
Gunupur do. do. .	6	8	9	1	...	8	1	3
Narsápur do. do. ..	25	26	24	12	2	24	13	9
Bhadráchalam do. ...	5	4	..	.	.	5	1	1
Berhampore Local Fund normal school ...	30	30	32	5	10	26	14	5

Pálkonda do. do. ...	22	22	21	9	1	20	15	4
Yellamanchili do. do.	10	10	...	...	.	9	..	3
Rajahmundry do. do.	42	22	30	19	4	35	11	13
Total ..	207	182	173	77	24	189	70	64

The number of schools remained stationary, but the attendance has slightly fallen. The decrease is confined to 3 out of 10 schools, viz., Rajahmundry, Chicacole and Bhadráchalam normal schools. The Russellkonda normal school improved in attendance, but passed only 8 pupils in the Special Upper Primary Examination out of 14 sent up. The Gunupur normal class made fair progress. Eight candidates appeared for the Special Upper Primary Examination, of whom 4 were successful. The Bhadráchalam normal class, opened for the benefit of the teachers of the Upper Godávari district, declined in numbers, and in the Special Upper Primary Examination only 1 pupil passed out of 5 sent up. The Chicacole and Rajahmundry Local Fund normal schools did not make satisfactory progress during the year, as the strength had fallen and in the Special Upper Primary Examination only 14 and 24 pupils were successful out of 25 and 35 pupils presented by the schools respectively.

Normal schools, second division.

167. The annexed statement is a summary of the normal schools in the second division. A second normal school was established during the year by the Cuddapah Board at Madanapalle. The total attendance rose from 138 to 164.

Normal schools.	Number on rolls on 31st March		Special Upper Primary Examination, 1883.			Special Upper Primary Examination, 1884.		
			Examined	Passed.		Examined.	Passed.	
	1884.	1885.		First class.	Second class.		First class.	Second class.
Masulipatam Local Fund normal school ...	12	25	23	14	3	22	14	5
Guntúr do. do. ...	30	29	30	28	..	28	17	4
Bellary do. do. ...	18	12	15	7	1	14	5	5
Anantapur do. do. ...	14	16	9	5	...	14	3	4
Cuddapah do. do. ...	20	18	6	4	2	11	2	4
Madanapalle do. do. ...		10			..	...	...	...
Nandyál do. do. ...	25	21	18	7	1	22	9	7
Masulipatam C.M S. training institution	19	33	5	5	..	13	4	6
Total ...	138	164	106	70	7	124	54	35

The Masulipatam Local Fund normal school regained its numbers, and in the Special Upper Primary Examination passed 19 out of 22 candidates. The Bellary normal school showed a decrease of 6 pupils and Cuddapah of 2 pupils, but the former fared better than the latter in the Special Upper Primary Examination, The Church Mission Society's training institution, Masulipatam, rose in numbers and in the Special Upper Primary Examination 10 out of 13 pupils were successful.

Normal schools, third division.

168. Particulars of the normal schools of the third division are given below :—

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

Normal schools.	Number on rolls on 31st March		Special Upper Primary Examination, 1883			Special Upper Primary Examination, 1884.		
			Examined.	Passed.		Examined	Passed.	
	1884	1885.		First class.	Second class.		First class.	Second class.
Government normal school, Madras	35	47	...	...	...	...	...	...
Elementary normal school for Muhammadans	16	17	10	9	1	9	5	1
Nellore Local Fund normal school	25	18	22	15	1	31	17	9
Kandukúr do. do	28	29	.	..	...	21	8	7
Poonamallee do. do.	30	28	30	11	9	25	2	9
Chingleput do do	13	28	...	...	...	27	17	8
Madras Municipal normal school	28	20	.	...	...	21	12	4
Total ..	175	187	62	35	11	134	61	38

No new school was started in the division during the year. The attendance in the several institutions varied greatly, but the total number of normal students rose from 175 to 187, and the candidates for, and the passes in, the Special Upper Primary Examination more than doubled.

The Madras normal school improved in numbers owing to the institution of additional scholarships. The following extracts from the Acting Principal's report show the working of the institution :—

The late Mr. George Duncan was appointed permanent principal on the 2nd May 1884. Mr. E. H. Elliot was nominated to the headmastership of the practising school on the 1st of December 1884, but has continued to act as Assistant Professor of English in the Presidency College, leaving Mr. B. Hanumanta Row undisturbed in his appointment in this institution. Though not an occurrence of the year under report, I feel yet bound to notice here the death of Mr. George Duncan, which sad event took place on the 12th of April last, three days after his departure from Madras on a year's furlough. Mr. George Duncan had been connected with this institution for 25 years, and had been highly esteemed by his pupils and brethren of the service; and, I believe, I express but the general opinion when I state that the department had not known an officer more devoted to his work, or one of more genial disposition.

The following table gives the numerical details of the normal and practising sections of the school :—

Department.	Number of students and pupils on the rolls on the 31st March 1884	Admitted since.	Left since	Number remaining on the 31st March 1885.
Normal	35	61	49	47
Practising	133	61	82	112
Total	168	122	131	159

The increase of attendance in the normal department is due to the increase of Rs. 1,000 in the stipendiary allotment for the current year.

Of the 47 normal students on the rolls at the end of the year, 8 were not in receipt of Government stipend—1 coming from Coorg with a stipend from that State, and the remaining 7 being military students. Again of these 47, 7 were graduates, 8 First-in-Arts men and 25 matriculates, the rest being military men who had passed no examination in general proficiency.

Of the 49 students, who left the institution during the year, 5 were military students, 6 resigned their stipends, and 1 student, P. Krishnayya, falling ill, was allowed to return to

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

his appointment without completing his normal training. Particulars of the remaining 37 are given in the statement below :—

Lectures on psychology and history of education begun in 1883 were continued during the year 1884. A separate report on the subject was submitted by Mr. B. Hanumanta Row on the 12th May 1885, and was reviewed in your proceedings, No. 3836, dated 29th May 1885.

Thirty-four normal pupils were examined in method in December last, and in teaching power subsequently; 32 were successful in the examination, 10 securing first-class marks. The

results must be pronounced to be highly satisfactory. It had long been the fashion, owing to a number of causes, to cry down the work of the normal school. That time has happily gone by; and the increasing number of applications for admission for training is an evidence of the appreciation of its usefulness, and of a preference on the part of the managers of schools of trained to untrained teachers.

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

Government have recently sanctioned the removal of the school to Saidápet. The reorganization of the school was not dealt with during the year, pending the institution of a degree in teaching by the University. The sanction of Government has been recently accorded to the establishment of this new degree.

The weekly lectures introduced in 1883 were continued till December 1884, when a second examination was held, and 5 pupils were awarded honors certificates and 5 pass certificates. A meeting was held in September 1884, in which it was resolved to address the University in regard to the introduction of a degree in the art and theory of teaching, and at the close of the year the Senate had, under their consideration, the question of introducing such a degree.

The attendance of the elementary normal school rose from 16 to 17, but in the Special Upper Primary Examination, only 6 out of 9 passed against 10 passes out of 10 candidates in the previous year. The Nellore Local Fund normal school passed a satisfactory examination though the numbers have fallen. The Poonamallee school did not fare well in the Special Upper Primary Examination, only 11 out of 25 pupils having been successful. The Chingleput school, on the other hand, improved in strength and passed 25 out of 27 pupils, though candidates were for the first time sent up from the school. The attendance of the Municipal normal school, Madras, fell from 28 to 20. At the last Special Upper Primary Examination, 21 candidates were presented, of whom 16 met with success.

Normal schools, fourth division.

169. There was no change during the year in the number of normal schools in the fourth division. The particulars are given below:—

Normal schools.	Number on rolls on 31st March		Special Upper Primary Examination, 1883.			Special Upper Primary Examination, 1884.		
			Examined	Passed.		Examined.	Passed.	
	1884	1885		First class.	Second class.		First class.	Second class.
Villupuram Local Fund normal schl.	25	26	25	11	5	25	12	4
Tirukoilúr do. do. ...	29	25	24	15	3	28	8	5
Árni do. do. ..	28	27	24	16	3	28	8	12
Palmanér (Tirupati) Local Fund normal school	17	22	24	14	4	12	4	2
Salem (Tirupatúr) do.	33	35	28	11	3	33	16	13
Hosúr (Dharmapuri) do. ...	26	28	27	13	1	28	10	10
Chittoor American Mission normal school ...	17	13	12	6	..	11	8	3
Total	175	176	164	86	19	165	66	49

The Tirukoilúr normal school did not make good progress. The Palmanér school was removed to Tirupati, that at Salem to Tirupatúr, and that at Hosúr to Dharmapuri. The attendance in all these cases improved after the transfer. The American Mission normal school, Chittoor, showed a decrease in attendance, but at the Special Upper Primary Examination all the 11 candidates sent up were successful, 8 being placed in the first class.

Normal schools, fifth division.

170. The subjoined table gives the particulars regarding the normal schools in the fifth division:—

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING

Normal schools.	Number on rolls on 31st March		Special Upper Primary Examination, 1883			Special Upper Primary Examination, 1884		
			Examined	Passed.		Examined	Passed.	
	1884.	1885		First class	Second class		First class	Second class
Tanjore Local Fund normal school	34	30	30	17	5	31	16	10
Tiruválúr do. do	..	16				16	7	9
Madura do do	18	33	18	10	1	15	14	1
Dindigul C V E S training institution ..	40	56	24	10	4	21	9	9
Palamcottah C.M S training institution	73	69	34	12	6	30	16	12
Tuticorin S P G normal school ..	.	8	..			.	...	
Total	165	212	106	49	16	113	62	41

Two new normal schools were started in the division during the year—one at Tiruválúr by the Tanjore Local Fund Board and the other at Tuticorin by the Gospel Society. The former sent up 16 pupils for the Special Upper Primary Examination, all of whom met with success. The Tanjore and Madura Local Fund normal schools made fair progress. The attendance of the Dindigul Christian Vernacular Education Society's training institution rose from 40 to 56, and in the Special Upper Primary Examination 18 pupils were successful out of 21 candidates against 14 out of 24 in the preceding year. The Church Mission Society's training institution at Palamcottah showed a slight fall in attendance, but for the Special Upper Primary Examination, 30 pupils were presented, of whom 28 succeeded, the figures of the previous year being 34 examinees and 18 passes. The normal school established at Tuticorin has not commenced to send up pupils for any public examination.

Normal schools, sixth division

171. The following table gives the statistics of the normal schools in the sixth division.

Normal schools.	Number on rolls on 31st March		Special Upper Primary Examination, 1883			Special Upper Primary Examination, 1884		
			Examined	Passed.		Examined	Passed	
	1884	1885		First class.	Second class		First class	Second class
Tellicherry Government normal school.	46	61	31	18	7	31	25	6
Pálghat do do .	26	.	36	1	6	20	10	8
Calicut Local Fund normal school	20	23	15	9	1	18	13	5
Nettur Basel Mission do	...	28			...	5	1	2
Ponáni (Calicut) Local Fund normal school	22	24	9	3	4	13	4	6
Wellington do do		4		.		..	.	
Coimbatore do. do	26	29	20	9	1	22	11	8
Karúr do do	.	24				22	9	4
Kulitalai do do .	26	22	24	10	1	23	12	6
Puttur S P G. do	...	11	.	..			..	.
Total	166	226	135	50	20	154	85	45

The Government normal school at Pálghat was abolished on the 31st December. Four new normal schools were started during the year—one at Nettur by the Basel Mission Society, one at Wellington by the Nílgiri Local Fund Board for the benefit of Badagas, the third at Karúr by the Coimbatore Local Fund Board, and the fourth at Puttur by the Gospel Society. The total attendance rose from 166 to 226.

The Tellicherry normal school improved in numbers and passed all the 31 pupils presented for the last Special Upper Primary Examination with 25 in the first class. The Calicut Local Fund Hindu and Mapla normal schools and the Coimbatore normal school made satisfactory progress during the year, showing improvement both in attendance and the number of passes.

Normal schools, seventh division.

172. The only normal school in the seventh division, viz., that at Mangalore, had 8 pupils at the close of the year against 18 on the 31st March 1884. The decrease is probably due to the non-admission of fresh pupils. Seven candidates were sent up against 11 for the Special Upper Primary Examination and 6 were successful against 8 pupils in the previous year.

(e) *Normal Schools for Mistresses.*

Number and strength of normal schools for mistresses.

173. From the annexed table it will be seen that, during the year under report, 4 new normal schools for mistresses were started and the attendance rose from 263 to 363, or by 38 per cent. The rapid advance in the number of this class of institutions and of normal pupils is a hopeful sign as regards the development of sound female education, as the increase in the number of qualified female teachers will, by substituting female for male agency, induce parents not only to send their daughters more freely to school, but to keep them longer at school. Ninety-nine teachers trained in the female normal schools connected with the department obtained employment during the year.

Normal schools.	Number on rolls on 31st March		Special Upper Primary Examination, 1883.			Special Upper Primary Examination, 1884.

Hobart normal school		12	...	...	..	...	...	...
Total ...	263	363	79	29	15	88	36	20

Fifty-six pupils passed the Special Upper Primary Examination against 44 in the previous year.

Chicacole normal class.

174. The number of pupils in the normal class experimentally opened in connection with the Chicacole girls' school fell from 4 to 3 and none has yet appeared for the Special Upper Primary Examination.

Government female normal school, Madras.

175. The attendance of the Government female normal school rose from 27 to 31, but in the Special Upper Primary Examination, only 4 passed though 11 were sent up. Mrs. Brander reported on the school as follows in January 1885:—

I submit the usual inspection programme with a few remarks on the exercises, drawing, drilling, singing and needlework, and also detailed statements of the three latter in which I examined the English students individually and was extremely pleased with the results. The needlework is extremely good, and the Indian embroidery, which is being taught by Muhammadan teachers from the Hobart school, will be very suitable for Hindu and Muhammadan girls.

The home exercises were most useful for normal students and included, besides the usual lessons on method, notes of model lessons given by the Superintendent, and model time-tables. I beg to enclose two of these and a map of the town of Madras taken from the note-books. One of the most useful model lessons given during the year was on the geography of the town, and the map drawn by the Superintendent on the board had been copied into their note-books by the normal students.

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

The physical education and training are very satisfactory. The students are drilled themselves and are taught to drill their pupils and also to teach young children marching and games accompanied by songs. The large compound forms an excellent play-ground. Swings have been put up and are very popular. A good tennis ground has also been made and a tennis club formed, to which all the teachers and some of the normal students belong. The club is open to all, and it is to be hoped that in time all the normal students will join it.

At the inspection 20 pupils gave lessons before me. None of them were below fair, many were very good and several were excellent. Careful notes of these lessons had been prepared by each student, and I beg to enclose 6 of these for your inspection. In one or two cases more energy was needed in giving the lessons, the teachers told what they might have drawn from the children and performed experiments themselves which the children would have enjoyed doing; but these were exceptions. As a rule, the lessons were excellently planned, well illustrated and thoroughly aroused the interest of the children. The lesson on reading by Miss O'Keefe formed the basis of a criticism lesson conducted by the Superintendent. The criticisms were arranged under five heads—

1. Matter.	4. Language.
2. Manner.	5. Discipline.
3. Method.	

A certain number of the normal pupils were instructed to criticise the matter of the lesson, others the manner, and so on. This struck me as a good plan as it permitted each student to concentrate her attention on one feature and yet produced a complete criticism in the end. The students' criticisms were intelligent and generally correct and the Superintendent allowed no important good or bad feature of the lesson to be overlooked, so that the criticism was a valuable piece of training to those who took part in it.

I enclose the tabular report of the lessons of the normal students. The black-board exercises were very good and their value was shown by the satisfactory black-board work done during most of the lessons, especially by the facility and correctness with which the students drew maps on the board during geography lessons.

I will make my recommendations for normal certificates as soon as the results of the public examinations are known.

It was satisfactory to learn that the English normal students had continued their Tamil studies privately during the past year. They were examined by Miss Govindurajulu at the inspection and acquitted themselves well, obtaining high marks.

At the request of the Superintendent, I this year examined the staff of assistant mistresses in teaching power, and I was much pleased with the result. Miss Bernard and Miss Shanmugam gave lessons before me when they returned from England in 1882, and I had not heard them since, except that Miss Bernard gave a very good Kindergarten lesson in November. I found them both much improved. Miss Bernard gave a very good lesson on the poem "Hohenlinden." Her explanations and illustrations were clear and sufficient, her questions led her pupils to think, and she was successful in arousing their interest. Miss Shanmugam gave a very good lesson on the Burmese war. She has gained much skill and energy since 1882. Ranganayakiammal gave a good lesson on the geography of China. She aroused the interest of the children and showed much improvement since I last heard her teach. Miss Siromony Eleazar gave Kindergarten lessons before me when I examined the practising school in November. I thought her a very good teacher and especially suited to infants.

The enclosed return shows the number of students who have obtained work during the year.

The order, discipline, and tone of the school were excellent.

The registers were in order.

The building requires some repairs, and, if the numbers increase, the portion now occupied by the school will not be sufficient.

Some new desks are required, and the formation of a library is very desirable.

I enclose also a return of the normal pupils showing that there were 33 stipendiary and 3 free pupils. This is, I believe, the first year in which the full sanctioned number of pupils, 30, has been reached, and this year it has been exceeded. As it has been found that normal pupils belonging to Madras are very reluctant to take situations in the mofussil, endeavours have been made for some time past to induce girls from the mofussil to come for training. As will be seen by the return, 10 of the 36 pupils were from up-country stations. Sarah Peter, thirty-third in the list, was an assistant mistress at Kumbakónam. She was sent to the normal school by your instructions, and as no Government scholarship was available for her, I allowed her one of Rs. 8 a month from a small fund sent by some ladies in England.

Coimbatore female normal school.

176. Sanction was obtained during the year for the establishment of a Government female normal school at Coimbatore. The normal class contained 14 pupils on the 31st March 1885. The school has not commenced to send up pupils for the public examinations, but, as the institution has a capable trained headmistress, it is likely to prove a success. A short while ago, it would not have been possible to fill up the studentship with suitable girls.

Calicut female normal school.

177. The Calicut female normal school shows a slight decline in numbers. Nine candidates appeared for the Special Upper Primary Examination, of whom 4 passed in the first class and 4 in the second, which is very creditable to the headmistress. In 1883-84, four pupils appeared and 3 passed. Four pupils of this school obtained employment during the year.

Masulipatam C.M.S. training institution.

178. The Church Mission Society established a female normal school at Masulipatam during the year and it contained 10 pupils on the 31st March 1885.

Madras Free Church Mission Christian female normal school.

179. The female normal school at Madras exhibits a great fall in strength—from 44 to 30. Nine pupils against 13 in the previous year appeared for the Special Upper Primary Examination and 7 passed as in the preceding year. In the Higher Examination for Women and the Middle School Examination, the school passed 2 and 4 pupils against 3 and 7 pupils, respectively, in 1883-84. Seven pupils trained in the institution obtained employment during the year.

Cuddalore Roman Catholic female normal school.

180. The attendance of the Roman Catholic female normal school established at Cuddalore doubled during the year, and, out of 7 candidates sent up for the Special Upper Primary Examination, 6 passed—all in the first class.

Trichinopoly S.P.G. female training institution.

181. The strength of the Trichinopoly S.P.G. female training institution fell from 57 to 44, which may be partly due to the opening of a female normal class at Madura. At the Special Upper Primary Examination, 12 candidates passed out of 16 presented. The figures of the previous year were 17 examinees and 5 passes.

Madura American Mission female normal school.

182. The school was started during the year. It contained 58 pupils at the close of the year.

Palamcottah Sarah Tucker female training institution.

183. The attendance of this institution rose from 81 to 103. Nineteen pupils passed the Special Upper Primary Examination and 9 passed the Middle School Examination out of 30 and 9 candidates examined. Only 7 pupils trained in the school obtained employment during the year.

Vizianagrum Grant Duff female normal school.

184. The attendance of this female normal class rose from 15 to 18, but, out of 6 candidates sent up for the Special Upper Primary Examination, none passed.

Hobart normal school.

185. A normal class was opened quite recently in connection with the Hobart Muhammadan girls' school with 12 pupils. If the experiment be successful, it will, I trust, lead to the development of education among Muhammadan women.

(*f*) *Industrial Schools.*

School of Ordnance Artificers.

186. The following extracts are taken from the annual report of the Superintendent of the Gun Carriage Factory regarding the working of this institution. The report shows that the efficiency of the school was maintained during the year.

On the 31st March last there were 70 students on the rolls of the school.

Nine of the men had rejoined the factory from out-station arsenals and 2 others from the Revenue Survey Department, having resigned. A similar number of withdrawals formed postings to the different arsenals. Seven lads were entertained as pupils in the pupil establishment. Two of the men died during the year, 2 were transferred to the pension establishment, and 2 others were discharged.

A foreman was sent to the Government Bakery at Thayetmyo, as a temporary measure, for six months, to act for an employé there who had obtained leave on medical certificate. At the expiration of that term he returned to the factory, having given satisfaction.

The 2 men who had resigned their appointments in the Revenue Survey Department were unavoidably compelled to do so through ill-health; of those who were discharged, 1 was for physical unfitness and the other, a pupil, for inefficiency.

Two of the men were promoted to the grade of foreman, being qualified to fill such vacant appointments. On the retirement of one of the warrant officers of this department, a teacher in

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

the school, holding the position of sergeant, was promoted to fill the retired officer's place, which caused a promotion in the succeeding grades.

From the foregoing facts, it will be observed that the efficiency of the school is maintained, as the men are enabled to enter upon various positions in the service of Government. The theoretical instruction given, combined with the practical knowledge attained in the workshops, lead the men so to improve themselves that, when an opening offers itself, they are able to render satisfaction in such.

The scheme of studies has passed through no change during the year; the teachers have worked well, while the behaviour of both teachers and students has been all that can be desired.

Industrial school, Black Town.

187. There has been a slight improvement in the attendance of this institution. The subjoined extracts from my review of the annual report show the working of the institution:—

The establishment of the school was almost the same as in the preceding year. In the place of 3 instructors in rattan work and none in tailoring, there were 2 instructors in rattan work and 1 in tailoring. There is but 1 teacher on the establishment to give ordinary instruction to about 50 pupils distributed into 6 classes. The instruction given is therefore very elementary in character, and also, the Director regrets to note, unsound. A trained assistant should at once be engaged. The institution now draws a lump grant of Rs. 150 per mensem. But the continuance of aid on this system seems undesirable, so soon as the Committee have had time to work the school up to the requirements of the new Code. Mr. Fowler is requested to place himself in communication with that body and point out how they may best adapt the institution to the provisions of the new Code, as the orders of Government must shortly be requested on the subject.

The strength of the school at the time of inspection was 48 pupils against 52 at previous inspection. The school furniture should be renewed and maps should be supplied in place of atlases.

The results of inspection were not satisfactory. Many subjects are marked "middling" and the attainments of pupils of the preparatory B class in arithmetic were very poor. Boys of the infant class were unable to write at all. Better results cannot be expected unless better arrangements are made for the general instruction of pupils. It is noted that, under the revised Code, no results grant can be obtained for a handicraft on account of a child who has not passed the third standard.

The suggestions made last year have received little or no attention with the exception of the industrial test, the results of which seem to have been on the whole satisfactory. Some boys were sent to the Public Works Department, Railway works, and the Lawrence Asylum Press, and nearly all were favorably reported on.

Twenty-six pupils left the school between 1st August 1883 and 30th June 1884, and as many joined the school during the period. An analysis of the statement of boys left shows that 5 boys were withdrawn, 6 were expelled for absence or misconduct, 4 absconded, 1 enlisted himself as a pupil in the Gun Carriage Factory, and only 10 secured employment before leaving. Unless means can be adopted, such as the personal apprenticing of the lads to the Superintendent, to prevent their constant migration, it is useless to expect the school to become a really efficient training institution. In most trades boys must be kept steadily at work for four or five years before efficiency can be attained.

The recommendation made last year for the opening of a ledger had not been adopted. The receipts amounted to Rs. 5,367-1-4 and the expenditure to Rs. 4,441-5-6, including outlay on extra labor, viz., Rs. 1,285-11-9. There appear to be some bad debts in connection with the institution. A careful professional annual audit is necessary to arrive at the correct balance in favor of the school at the close of each year. The Director would suggest that the Committee publish a quarterly statement in a local newspaper of the receipts and expenditure. This measure would tend to draw attention to an institution that well deserves public support, being calculated, if efficiently administered, to perform a most useful function in the educational system of the country.

Industrial school, Ramnad.

188. The Ramnad industrial school improved in numbers and made fair progress.

Nazareth industrial school.

189. The strength of this institution rose from 49 to 61. The following extracts from the Inspector's annual report testify to the progress of the school:—

I examined the orphans, who are taught two hours a day, in the first, second and third standards in reading, writing, spelling and arithmetic, and I am glad to say that they all acquitted themselves very fairly at my inspection.

Ten of the carpenter boys have been in the school for some time and 10 have recently joined. Since last inspection the following work has been turned out:—

Altars	2	Ordinary chairs	6
Litany desk	1	Glastonbury chairs	2
Set of altar rails	1	Despatch boxes	2

In addition to the above articles made, the boys have assisted in making the roofs of 6 different buildings, and they are being taught to make wheels for country bandies, spinning wheels and ploughs. Three boys have a fair knowledge of blacksmith's work and they can make knives for planes, chisels and nails. It is very desirable to develop this trade and to build a smithy, in connection with which copper-smith's work might perhaps also be carried on.

The tailor boys can (most of them) work the lock-stitch sewing machine. Some of them have recently commenced a little embroidery work in gold and silk thread. I saw them cutting out and stitching ordinary articles of dress, such as short coats, &c., and am glad to say that they worked very neatly.

A new loom has been built for the weaver boys, and there are now 5 looms at work. There is a good demand and ready sale for the cloths woven here. Cloths of different patterns are being made in this department, some of them are very nice indeed. A machine for winding the yarn has recently been made and is now in use.

Fourteen of the girls learning to make pillow lace are orphans. I learn that specimens of the lace turned out by these girls have been sent to the needlework exhibition held in Madras in connection with the National Indian Association.

The carpenter's shop and weaving establishment are both too cramped and inadequate. A building is much required for the lace-workers, who at present work in the verandah of the missionary's bungalow not properly protected from wind and dust.

The Rev. A. Margoschis' zeal and perseverance in ably conducting the several departments of the industrial schools are worthy of notice.

Erukatancheri E.L.M. industrial school.

190. The unaided Evangelical Lutheran Mission industrial school at Erukatancheri improved in attendance and appears to be progressing.

Pennington's industrial school.

191. A private industrial school under the marginal designation was opened at Tanjore and it contained 13 pupils. No information is available of the industries taught in the school.

(g) *School of Agriculture.*

School of Agriculture, Saidápet.

192. The following extracts from my review of the report on this institution show the progress of the school :—

Number on Roll.—There were 96 students on the roll when work began and 95 when it closed. According to nationality, there were 15 Europeans, Eurasians and Native Christians, 12 Muhammadans, 46 Brahmans, and 22 Sudras and others. The majority of the students were matriculates. Four probationers of the Cattle Disease Inspection department had also attended lectures.

Changes in Staff.—There were only two changes—one owing to the death of Surgeon-Major Rogers and the other to the appointment of an Assistant Professor of Agriculture.

WINTER SESSION.

A fresh class was formed of 33 students. Full details as to nationality, &c., are given in regard to these students, and the Director is glad to find that no less than 22 of them have come from families possessed of land. Thirteen only of the students are not stipendiaries. But there is improvement, as the percentage is 89, or the highest figure obtained. Six of the students have been sent by Native States and Local Fund Boards, which is a satisfactory feature. It is also satisfactory to find that, judging by examinations passed, the educational attainments of the students are higher than in previous classes. The only student who had not passed any examination was the one admitted to study practical veterinary surgery. Taking the students according to districts from which they have come, Godávari, Anantapur, Bellary, Cuddapah, Trichinopoly, Coimbatore and Madras are not represented in this class, but students have come from Bombay, Rajputana, Coorg, Travancore and Bengal.

Marks.—The report gives for the three classes in the institution three statements showing the marks gained by each student in each subject. The third or most advanced class gains marks ranging from 891 to 2,675 out of a maximum of 3,367. The student just above the one who gets 891, scores 1,405, and only 8 are below the half of 3,367. The marks of class II range from 1,666 to 2,391 out of a maximum of 3,161, or more than half throughout. The marks of class I range from 734 to 2,448. Only 4 have failed to secure half marks. Assuming that the marks are an accurate index of the progress of the students, the results are very satisfactory. The percentage of marks gained by class III ranges between 57 and 66, that of class II between 57 and 70, and that of class I between 47 and 68. These percentages are lower than those of the previous session and are explained.

Certificates.—Of class III containing 33 students, 22 obtained first-class and 10 second-class certificates. Of class II consisting of 30 students, 21 obtained first-class and 9 second-class certificates. Of class I consisting of 32 students, 21 obtained first-class and 10 second-

SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

class certificates. Making allowance for the mode of examination, these results are highly creditable.

Prizes.—The selection of subjects for the award of prizes was judicious.

Lectures, Classes and Examinations.—The statement in the report is satisfactory.

Lecturers' Reports.—From these reports there is evidence of careful teaching, and, with one exception, the conduct of the students was satisfactory. One Muhammadan student of class I, it is stated, had to be expelled for fraudulent practices at examinations.

SUMMER SESSION.

No fresh class was formed, and there was no change in the number of students.

Marks.—The marks of class III ranged from 1,253 to 2,289 in a total maximum of 2,811, 5 students only falling below half marks. The marks of class II ranged from 1,616 to 2,394 in a total maximum of 2,814, showing more than half marks in every case. The marks of class I ranged from 901 to 2,213 in a total maximum of 2,624, 3 students only falling below half marks, one of them by one mark only. These results are apparently satisfactory. The percentage of marks gained by class III ranged from 51 to 75, that of class II from 58 to 77, and that of class I from 54 to 78. The percentages are much higher than those of the winter session, and Mr. Robertson considers that they prove that short sessions tend to more efficient work. The Director does not share the opinion.

Certificates.—Of class III, 22 students obtained first-class and 9 second-class certificates, while 2 more having failed in one subject, are entitled to a special examination. Of class II, 22 students obtained first-class and 7 second-class certificates. Two of the students who gained first-class certificates did so by passing the special examination granted for failure in the first session, special sanction for holding the examination having been granted. Of class I, 20 obtained first-class and 9 second-class certificates. These results, allowing for the system pursued, are very satisfactory.

Prizes.—The subjects chosen for prize-giving seem to embrace the most important subjects.

Lectures, Classes and Examinations.—The amount of work done, as shown in the statement in the report, is satisfactory.

Lecturers' Reports.—From these reports also there is evidence of careful teaching, and the conduct of the students has been good.

Requirements of Lecturers.—During the winter session the lecturer on steam-engine held a voluntary class of the students at the South Indian Railway Workshops, Egmore, and he points out that a small engine is needed, and that it could be usefully employed. The Director awaits a special report from the Principal on the subject. Dr. Mills points out that there is a great want of simple text-books, and he states that he is trying to supply the want. The lecturer in chemistry mentions various requirements. The water-supply for the laboratory has been provided for. The question of a lecture-theatre must be postponed for the present, but an indent should be sent in for the apparatus required. The lecturer also complains that some of the students do not possess a sufficient knowledge of English, and he suggests that tuitional aid by assistants should be provided. The matter will be dealt with when the school is reorganized. The lecturer on surveying thinks it desirable that survey classes should be held on land differing in surface from farm land. The suggestion is a valuable one, and Mr. Robertson should see if it can be carried out.

Physical Training.—This was satisfactorily conducted during the year, and the students are well spoken of. It is noted that class I obtained the highest marks in both the winter and summer sessions. If this is due to the attention paid in schools to physical training, the result is gratifying. All the classes show increase and decrease in weight and measurement, but on the whole increase is marked.

Athletic Club.—The Director is glad to find that the club is in thriving condition.

Library and Reading Room.—A considerable addition was made to the library. It and the reading room seem to have been freely taken advantage of.

Veterinary Hospital.—This is under the Director of Revenue Settlement and Agriculture and is managed by the Inspector of Cattle Diseases, who is also veterinary lecturer. The hospital afforded much advantage in the teaching of practical veterinary subjects.

Chemical Laboratory.—The requirements in connection with the laboratory have been dealt with above.

The Botanical Gardens.—The gardens seem to have been of great use to the students. The transfer of the experimental farm will afford better opportunities for holding practical farm classes.

Museum.—A number of additions were made to the museum, and the institution is under obligation, respectively, to Messrs. Mills and Western, the present and former lecturers, for anatomical specimens and a fine collection of mounted physiological subjects for the microscope.

College Buildings.—The buildings have been kept in good repair; the completing of the upper story was, however, postponed under orders.

Agricultural Students' Association.—The association seems to serve a good purpose and to benefit the students. The association has also started a very useful journal, which enjoys wide circulation. SCHOLARSHIPS.

Employment of ex-Students.—The Director is glad to find that the majority of the ex-students had obtained suitable employment.

Anniversary.—The anniversary meeting was held on the 31st January 1885, with the Hon'ble Sir Charles Turner in the chair.

Finance.—The expenditure amounted to Rs. 39,242-5-0 and the receipts from fees, &c., to Rs. 622-14-2. The disproportion is very great, though considerable allowance must be made for a technical institution which cannot but be costly, specially during its early days and until its certificates are of assured value in the competition for remunerative employment. When this condition is secured, it cannot be doubted that fees may be levied at rates which will suffice to cover a large portion of the cost.

VII.—SCHOLARSHIPS.

Government scholarships awarded on the results of the University examinations.

193. The Government scholarships awardable on the results of the University examinations were all assigned during the year. I referred, in my last report, to the smallness of the provision for scholarships and remarked that, on receipt of the final orders of Government on the Education Commission Report, the question of revising the scheme of scholarships would be taken up. The question was considered by the committee appointed to revise the Grant-in-aid Code and in Chapter VII are embodied their views on the subject. Their recommendations have been sanctioned by Government, and with the encouragement now afforded to private effort and liberality, I think it probable that in a few years the Presidency will be well provided with this essential for the higher education of intellectually promising poor lads.

Scholarships in girls' schools.

194. The number of girls that received scholarships connected with Government schools during the year rose from 52 to 59, in consequence of the improvement in the standard of certain girls' schools and of the establishment of new schools. The sanction accorded by Government, in their Order, dated 28th July 1884, No. 423, Educational, permitted the splitting up of scholarships where necessary. The Local Fund and Municipal Boards also awarded scholarships amounting to Rs. 241. Hitherto Government scholarships for girls have practically been confined to Government schools, but in Chapter VI of the new Code, liberal provision has been made for the grant of scholarships in private institutions.

Expenditure on scholarships

195. The following statement shows the expenditure on scholarships from all sources. The total outlay on colleges and schools for general education was Rs. 14,197 against Rs. 11,388, and on special schools, other than normal schools, Rs. 13,119. The aggregate amount, excluding normal scholarships, was Rs. 29,436 against Rs. 14,203, the increase being mainly due to the inclusion of stipends drawn in the School of Agriculture.

VIII.—EMPLOYMENT OF STUDENTS IN THE PUBLIC SERVICE.

General remarks.

196. To all intents and purposes none but students are employed in the public service now, except as regards village offices and the menial posts in public offices. During the past year the impulse given to higher education by the higher general qualifications required for the higher revenue and subordinate offices, and also for admission to pleaderships, has given a considerable impulse to higher education. I hope in course of time that the Government may give a similar special impulse to elementary education by requiring all new village officers to pass some elementary test in reading, writing, and arithmetic. I mentioned in my last report that Government had called on me to submit my views regarding the regulation of admissions into the public service in the form of a draft scheme, and all heads of departments under the Chief Secretary were directed in G.O., Educational, dated 4th October 1884, No. 624, to furnish me with copies of the existing rules or general orders relating to the subject. Replies have been received from the Inspectors-General of Police and Registration, the Commissary-General, and the Controller of Military Accounts only. The subject will be taken up as soon as complete information is obtained; but, I think, it would be well if the question were dealt with by a committee representing all departments. The adoption of a system of competition for first admission to all departments is, I believe, essential for the good government of this presidency and the contentment of the educated classes. The gradual improvement educationally of the chief sections of the population, including those which at first lagged behind in the race, will, I am inclined to think, soon ensure a fair distribution of State patronage, although at first it may be necessary to protect certain sections of the population by reserving to such a certain proportion of the appointments to be competed for.

IX.—BOOKS.

Registration of books.

197. The Registrar of Books has submitted the following report on the books registered in this Presidency during the year under report:—

The total number of works received for registration during the year was 875, or much the same as last year, and the subjoined entry compares the number of publications for the two years divided under the two heads of "Books" and "Periodicals."

——	1883-84.	1884-85.
Books, including pamphlets	817	793
Periodicals	59	82
Total ...	876	875

Thus it will be seen that a perceptible increase has occurred under the head of *Periodicals* by the issue of certain quarterly journals of veterinary science in India, and those intended for educational purposes, while a corresponding decrease is observable under the important head of *Books*. This result is mainly attributable to the sudden contraction of the printing operations of the Educational Department on account of the abolition of the Government Central Book Depôt in April 1884.

The following is the classification of the registered publications under the head of original works, translations and republications, compared with the corresponding entry in my last annual summary:—

——	1884-85.	1883-84.
Original works	310	245
Translations	81	34
Republications	484	597
Total ...	875	876

Books.

The diminished number of registrations appears chiefly under the head of republications, showing a falling off of 19 per cent. when compared with the figures for the previous year, but this loss seems to have been counterbalanced by an increase of 21 per cent. in the number of original works, and a considerable advance (of nearly 60 per cent.) in translations, indicating the growing desire for the wide circulation of the works of classical or special interest rendered in popular language.

The accompanying statement gives the localities at which the registered works were published and the numbers issued at each in English and vernacular languages :—

Stations.	English.	Vernacular.	Total.
1. Madras	180	491	671
2. Mangalore	9	64	73
3. Calicut	..	33	33
4. Tinnevelly	5	22	27
5. Vizagapatam	2	14	16
6. Tellicherry	..	10	10
7. Conjeeveram	...	10	10
8. Tranquebar	1	8	9
9. Coimbatore	...	8	8
10. Nellore	...	7	7
11. Tanjore	...	3	3
12. Trichinopoly	...	3	3
13. Guntúr	...	2	2
14. Madura	1		1
15. Berhampore	...	1	1
16. Kalingapatam	.	1	1
Total ..	198	677	875

According to the quarterly catalogues, the publications turned out by the presses at Madras rose from 624 to 671, or by 11 per cent. when compared with the past year's figures. Calicut, Tinnevelly, Vizagapatam, Nellore, and Coimbatore made a greater advance than in the previous year, while Mangalore, Tellicherry, Tranquebar, Trichinopoly, and Berhampore showed a slight decline in literary publishing activity. In the place of Negapatam, Chicacole, and Masulipatam, which appeared in the catalogues for 1883-84, Conjeeveram, Tanjore, Guntúr, Madura, and Kalingapatam are found in this year's catalogues.

Arranged according to languages the publications stand thus :—

Languages.	No. of works.
1. English	161
2. Do. and Tamil in English ...	1
3. Do. and Tamil	10
4. Do. and Telugu	8
5. Do. and Malayalam ...	4
6. Do. and Canarese	3
7. Do. and Konkani	1
8. Do. and Hindustani ...	8
9. Do. and Persian	1
10. Do. Tamil and Telugu ...	4
11. Do. do. and Sanscrit ...	1
12. Latin and English	1
13. Tamil	234
14. Do. in Telugu	1
15. Do. in Arabic	6
16. Do. and English	3
17. Do. and Latin	1
18. Do. and Telugu	1
19. Telugu	190
20. Do. and English	1
21. Malayalam	54
22. Do. in Arabic	6
23. Canarese	55
24. Canarese and English	1
25. Do. and Telugu	1
26. Tulu	1
27. Konkani	5
28. Uriya	1
29. Hindustani	29
30. Do. and English .	1
31. Persian	4
32. Do. and Hindustani	1

34. Do. and Malayalam	1
35. Do. and Hindustani	1
36. Sanscrit	43
37. Do. in Canarese	1
38. Do. in Grandha	15
39. Do. and Tamil	6
40. Do. and do. in Telugu ...	1
41. Do. and Telugu	5
42. Do. and Canarese	1
43. Do. and do. in Canarese	3
Total ...	875

Compared with the figures recorded for last year, there was a steady increase in all the languages, except Tamil and Arabic, in which there was an unusual falling off.

The following reclassification shows the registered publications of the year arranged according to their subject-matter. Of these, religion headed the list as usual, and some of the works of this class were of a controversial character. Language occupied the second place, followed by poetry and miscellaneous works. About 25 per cent. of the works were designed for educational purposes, and the remaining 75 per cent. were non-educational works, partly religious in their aim :—

Subjects.	Books published in English and other (European) languages.	Books published in the vernacular languages spoken in the province.	Books published in the Indian classical languages.	Books published in more than one language.	Total.
1. Art	2	6	...	...	8
2. Biography	...	3	1	...	4
3. Drama	...	16	4	...	20
4. Fiction	.	15	1	...	16
5. History	7	2	...	...	9
6. Language	21	76	5	39	141
7. Law	9	11	...	...	20
8. Medicine	7	13	...	3	23
9. Miscellaneous	39	41	2	1	83
10. Poetry	4	71	4	4	83
11. Politics	2	...	...	...	2
12. Philosophy	...	1	1	...	2
13. Religion	46	305	49	15	415

Total ...	161	582	67	65	875

Among the most important of the publications registered during the year, the following perhaps deserve mention :—

English.—Outlines of Medical Jurisprudence for Indian Criminal Courts, by J. D. B. Gribble, Esquire.

The Indian Trusts Act, 1882, with a Commentary by E. B. Powell, Esquire, B.A., LL.B.

Regulations containing all the Unrepealed Regulations and Acts from 1802 to December 1884.

A Review of the Progress of Knowledge of Hindu Law and Custom made among our British Rulers during the past one hundred years regarding Marriage, by Dewan Bahadoor R. Raghunada Rau, Esquire.

A Revised Edition of Wyvern's "Sweet Dishes."

Treatment of Cattle Diseases, by J. Mills, Esquire, V.S.

The Quarterly Journal of Veterinary Science in India and Army Animal Management.

A Hand-book of Directions to the Ports in the Madras Presidency and Ceylon, by T. E. Marshall, Esquire.

Facts and Decisions from the "Field" Newspaper, by Lieutenant J. W. M. George.

Luker's Indian Press Guide and Eastern Advertiser's Hand-book (1885).

English Lessons: A Hand-book specially designed for the use of Candidates for the F. A. and B. A. Examinations, Part I.

Easy Latin Lessons, by Mr. Maddox.

Outlines of English History, by Mr. D. Sinclair.

An English Translation of the Tamil Fourth Reader, Part I, of the Madras Series.

Milton's Samson Agonistes, with Notes by John Bradshaw, Esquire.

Madras Civil Engineering College Papers, No. 4, on Estimating Plans of Building.

Public Works in India, their importance, with suggestions for their extension and improvement, by General Sir A. T. Cotton, R.E., K.C.S.I.

Mathematical Tables, compiled for the use of Students in the Civil Engineering College.

Euclid, Book I, with Notes and Exercises and Vernacular Glossary, by John Adam, Esq., M.A.

A Supplement to "Drury's Useful Plants of India."

Forestry in Southern India, by John Shortt, Esquire.

An English Translation of Brihat Samhita of Varaha Mihira, in serial parts.

Report of Observations on the Theosophical Society, by Dr. F. Hartmann.

A Report of an Examination into the Blavatsky Correspondence, by J. D. B. Gribble, Esq.

A Review of What is Theosophy.

Some Account of My Intercourse with Madame Blavatsky from 1872 to 1884.

The Decay of Christianity, an Address delivered before Colonel Olcott and Theosophists.

Tamil.—Dictionarium Tamulica Latinum, being a Supplement to Tamil-Latin Dictionary.

Kola Puttakam, or Ornamental Figures for Floor Decorations, for the use of Hindu Families and Girls' Schools.

Olichitra Nayanam or Practice of Photography.

Nandi Droog (a Drama).

Túkku Tukki or Satchel Bearer, a Folk Tale, being a Number of the Popular Series published by the Madras School Book and Vernacular Literature Society.

Prayaga Vivekam, with Commentary showing the connexion between the Tamil and Sanscrit Grammars.

Fourth Reader, Part I, of the Madras Series.

Srí Harichandran Charitram, by a Tamil Pundit of the Presidency College.

Books.

The Indian Stock Owners' Manual, a translation of the English work by J. Mills, Esq., V S., for the use of Cattle Owners of Southern India.

The Hindu Mother-in-law *versus* the Daughter-in-law. On the Unpleasant Relations between the Mother-in-law and Daughter-in-law in Hindu Households.

Telugu.—Gáyaka Lochanam or the Fourth Book of Lessons in Hindu Music.

Life of Dr. Arnold of Rugby.

The Life of the Reverend Robert Noble.

An Elementary Telugu Grammar for the use of Primary and Middle Class Schools.

Samása Chandrika : on the Grammatical Construction of Compound Words.

Zemindaries in the Madras Presidency, containing Rules and Regulations relating to Rents of the Zemindary Districts.

Rasikajana Manobhirámam. A Romance in Verse.

A Lecture on the Theory of Kalamanopapatti or Astronomy.

Malayalam.—Nivatha Vadham, a Standard Drama, by His Highness the Rajah of Kotayam.

Bakavadham Kadha, a Drama based on the Story of the First Exile of the Pandu Princes.

Mahishaka Márjára Swayamvaram, being a Funny Ballad on the Marriage of a Fly with a Cat.

Ratimanjari Charitram, a new Poem on the Story of a Princess noted for her rare beauty and other accomplishments.

Duncan's Geography of India, Part I, published by the Educational Department, Travancore.

Canarese.—Tables of Canarese Grammar.

Kannada Bálavidhya Bodhini.

Cook's Primer of Mensuration.

Hindustani.—A Translation of Mr. Robertson's Agricultural Class Book for the use of Muhammadan Schools.

Lukh Lukho, containing Recipes for manufacturing Otto of Roses.

Translation of Sinclair's Outlines of Indian History for the use of Muhammadan Schools.

Baharistan-i-ájan. Selections in Persian Poetry by the late Nawáb of the Carnatic.

Muhavarat-i-Fársi. A Collection of Idiomatical and Colloquial Sentences in Persian with English Equivalents, by Reverend E. Sell.

Sanscrit.—Maithilíyam, a Sanscrit Drama based on the story of Sita's life.

Strí Punarudwáha Khandana Málika on Widow Marriage.

Strí Játakam or Woman's Horoscope, with Commentary.

Brahma Sútram with Commentary, Parts III and IV.

Brahmapada Suktivádam : a Controversy, Vedic in kind, on the meaning of the term Brahma.

The total number of copyright registrations during the year was 147, including 5 works of the Educational Department registered free of charge. This is the largest number on record, and shows the growing appreciation on the part of printers and publishers of the value of this class of optional registration.

I beg to observe, in conclusion, that the general tone of the published literature of the year, excepting perhaps in the case of two or three poetical effusions in Telugu containing erotic verses after some primitive models, may be considered harmless as regards morality and loyalty.

The following is Dr. Duncan's review of the Report of the Registrar of Books embodying the annual analysis of publications registered during the calendar year 1884, prepared in conformity with the instructions contained in the resolution of the Government of India, dated 12th September 1882, No. 1-455.

It appears from the annexed statement that the number of original works and translations published during the year 1884 was about double the average number of the same works for the ten years ending 1883, and that the percentage of educational works was higher than the average.

—	Original works.	Translations.	Republications.	—	Number of works.	
					Educational	Other.
Average for the ten years ending 1883.	166·5	50·14	559·15	Average for seven years ..	20·6	79·39
Number for 1884	343	96	379	Number for 1884	23	77

This increase is an indication of literary activity awakened and sustained by the growing demand. It is to be observed that the number of republications for the year under report is much less than the average for the preceding ten years. But it must be remembered in this connection that the number of republications cannot by itself be regarded as an exponent of literary activity or stagnation, or of the extent to which books have been in circulation, for a large edition of a particular work may render unnecessary another edition of the same, during

the same or following year, while a small edition may necessitate another edition within a short interval. Books.

Most of the so-called original vernacular works are in reality abridgments of the two great Indian epics or some Puranas, or an elaborate treatise on some episode or incident therein related. These works do in fact present *old matter* in a *new form*. Translation of English books seems to have made fair progress, and, judging from the past, it may be inferred that translations and adaptations of English authors will grow more and more popular.

It is interesting to note, as a feature of the books printed during 1884, that 16 works, against 4 in 1883, were published specially for female readers. One of them, called "Patterns of Floor Decorations of Southern India," containing more than a hundred figures or patterns, might be used in girls' schools as supplying Kindergarten instruction adapted to Indian life.

The number of works on Indian Music, Astronomy, Astrology and Medicine for 1884, as nearly the same as the average for the ten years preceding, shows that a healthy competition has been created between those that have received English education on the one side, and the Pandits, Shastris and Vydiars on the other.

The increase in periodicals and of pamphlet literature bearing on social questions is a healthy sign.

The number of copyrights registered during 1884 was 122 against 109 during 1883. The Registrar observes that this was the largest number ever registered in this Presidency since the passing of Act XXV of 1867. The Acting Director concurs with the Registrar in thinking that this will increase when the revised Copyright Act comes into force.

The review for the year 1884 is not without several hopeful features; but, taken as a whole, it tends to deepen the painful impression which previous reports have made on the minds of many who were wont to look with hope on the intellectual future of the educated classes of the native community. The literary activity of last year's results is the usual tale of compilations or reproductions, or imitations in several of the walks of Literature, Science and Art. But the Acting Director has looked in vain for even one work by a native author which can be called a genuine original literary or scientific production.

Book Department.

198. The final order of Government (G.O., Educational, No. 317, dated 9th June 1884) in connection with the abolition of the Central Depôt having been received during the year under report, effect was given to it by the abolition of the depôt and the transfer of stock to the Madras School Book and Vernacular Literature Society and the Basel Mission Book and Tract Depository, Mangalore. A Book Branch was also created in my office, and Mr. Velu Pillai was appointed my Special Assistant.

The abstract of the stock account given below shows the value of the stock dealt with during the year by the two vending agencies.

School Book Society						Basel Mission Society.					
	RS.	A.	P.	RS.	A. P		RS.	A.	P.	RS.	A. P.

Balance on 1st April 1885.	..			99,513	7 3	Balance on 1st April 1885	...			2,701	8 0

Books.

From the above statement it will be seen that the value of special books, viz., Rs. 1,590-5-1, has been added to the stock of Government books. This was omitted from the previous year's accounts owing to the sale-proceeds of those books having been credited to Provincial funds apart from the Book Depôt Fund. As, however, the trading capital advanced by Government was repaid in full on the abolition of the depôt and all sums are now credited to Education, Provincial Funds, the system of separate payment of the sale-proceeds of special books has been discarded, and all monies realized by sale of books are remitted to the credit of Education, Government books. The value of the stock transferred on 1st April 1884 to the Basel Mission Society was Rs. 14,375-14-6. In acknowledging receipt of this stock the Superintendent, Basel Mission, reported that though it consisted largely of school books, there was also a number of books not used in schools, while some editions were too large, and that most of these books formed a dead stock. He therefore offered to buy the books wholesale for Rs. 4,826-8-0 exclusive of commission. As there were, however, two books the value offered for which did not meet with my approval, I suggested that the amount offered should be raised to Rs. 4,936-8-0. This the Superintendent agreed to do. The reason adduced by the Superintendent, Basel Mission, for the purchase of books wholesale was to avoid the submission of monthly accounts and returns. On the whole the offer made was, in my opinion, the best that could be expected in the circumstances of the case, and this opinion was also shared in by the late Curator of Government Books. The books were therefore sold for Rs. 4,936-8-0. A similar course was followed in the case of the Anglo-Malayalam Fourth Reader and Anglo-Malayalam and Anglo-Canarese Fifth Readers, which were printed at Madras and purchased wholesale by the Basel Mission. The actual stock with the two societies on the 1st April 1885 was therefore Rs. 1,02,214-15-3—Rs. 99,513-7-3 with the School Book Society and Rs. 2,701-8-0 with the Basel Mission. The latter represents the value of 144 copies of Konkani-English Dictionary and 87 copies of Dr. Gundert's Malayalam-English Dictionary.

Printing and publication of books.

199. A statement of books printed during the year is given below. The number of books printed and published was 40 against 23 in the preceding year. The number of copies of these books struck off was 394,402 against 270,587; their value to Government Rs. 57,533-3-0 against Rs. 39,773-5-8. The prime cost was Rs. 34,117-11-3 and the anticipated profit Rs. 23,415-7-9, or 68·6 per cent. against 66·4 per cent. in 1883-84. Of the books printed the Agricultural Class-book, Hindustani, Anglo-Malayalam Fifth Reader, and Tamil Fourth Reader, Part I, were new.

Purchase of books and maps.

200. Owing to the full scope given to the policy of free trade, no books or maps were purchased during the year; but the transactions of the Book Branch created in my office were confined to the careful supply of such of the Government books as had run short and the provision of new works necessary for school purposes.

Prize and Library books

201. In my last report I stated, for reasons therein set forth, that I purposed continuing the practice of obtaining such works through the agency of Messrs. Baker and Co. This course was followed in regard to all the more important institutions, but in regard to institutions about to be transferred to Local Boards I permitted purchases to be made from Messrs. Atmaram Sagoon and Co. and Messrs. Thacker, Spink and Co. of Bombay, Messrs. A. M. and J. Fergusson and Co. of Colombo, and the Madras School Book Society, the S.P.C.K. Press, and Messrs. Higginbotham and Co. The value of books purchased and supplied to the several Government institutions was Rs. 8,267-9-6.

Sales of books.

202. From the annual report forwarded by the Secretary, Madras School Book and Vernacular Literature Society, and the quarterly statements furnished by the Superintendent, Basel Mission Depository, Mangalore, it is gathered that the number and value of books sold during the year were as follows. The figures are compared with those of the preceding year. The Anglo-Vernacular Readers, English series, having been included in the preceding years under their respective vernaculars instead of under English, the figures of 1883-84 have been modified so as to stand comparison with those of the year under report.

Books.

The total sales compare rather unfavorably with those of the preceding year; but the increases in the sale of books in the Canarese and Malayalam languages are satisfactory. The fall in the sale of Tamil and Telugu books is to be regretted, more especially the latter, the sale-proceeds being only 38 per cent. of the preceding year's. The Secretary, Madras School Book Society, attributes the decrease to the absence of some and the small number of other books commanding good sales in the stock of books published by the department at the time of transfer, and to the non-replenishment as the stock ran out of English and local publications. He also states as causes for the decline the interval that elapsed before the delivery of reprints and the bad condition of a large number of non-departmental books, as well as the fact of many others in the stock of non-departmental books that had been in demand having been superseded by new and revised editions or by other books. Leaving out other considerations, the supersession of old books by new and revised editions or by other books goes a great way towards accounting for the decline in the sale of books, as the books thus superseded form a dead stock.

Though the number of books sold and the value realized do not compare favorably with those of the preceding year, taken as a whole, it is satisfactory to note that the value of books sold by the School Book Society at 10 per cent. discount is nearly four times that sold by retail. The Secretary, School Book Society, observes in his report that a large number of private depôts (12 in the mofussil and 6 in the Presidency town) have been established, and that the schools have not suffered in the supply of books from the abolition of the district depôts. This is an encouraging feature. As regards the circulation of Canarese and Malayalam books, the increased percentage, viz., 29 and 43 in the number and 33 and 32 in the value realized, is a sign that no apprehension need be felt in regard to the sale of books in those languages by the Basel Mission.

203. The purchases made by Local Fund Boards from the School Book Society amounted only to Rs. 2,105-6-0, and from the Basel Mission Society Rs. 1,212-9-9 against Rs. 12,271-5-6. Only ten Boards made purchases, and of these only three to such an extent as to be allowed a discount, which amounted to Rs. 94-1-1. The decrease in this respect may be due to the fact that four Boards, viz., Vizagapatam, Coimbatore, Chingleput, and Nellore, made large purchases in 1883-84, and also to the establishment of eleven private depôts (Bangalore excepted). As regards purchases made by the South Canara and Malabar District Boards no accurate information can be obtained, as the Superintendent, Basel Mission, who reported the purchases, adds that he is not sure whether they are all Government books, the Local Fund Boards buying sometimes Mission publications.

Printing paper

204. The value of the printing paper in the hands of the several printers on the 1st April 1884 was Rs. 3,289-2-9. Of this, paper worth Rs. 3,268-13-5 was expended during the year, leaving a balance of Rs. 20-5-4 worth of paper in the hands of the S.P.C.K. and Addison Presses. The practice of purchasing printing paper has been discontinued.

New series of text books.

206. The Agricultural Class-book, Hindustani, and the Anglo-Malayalam Fifth Reader were published during the year. The Fourth Reader, Tamil, Part 1, by Mr. V. Krishnama Chariar, was also published during the year. The works remaining to be done to give full effect to the recommendations of the Text-book Committee are—

(*a*) Sixth Reader, English.
(*b*) An English Grammar for the Third Class, written mainly in the vernacular and specially adapted for native boys
(*c*) A Grammar of English for the higher classes
(*d*) Three new Telugu Grammars properly graduated, to supersede those in use.
(*e*) A new and revised edition of Colenso's Arithmetic in Tamil and Telugu, adapting the improvements of modern text-books in arithmetic
(*f*) A School Dictionary in Telugu

Mr. Kuppusami Sastri, to whom the preparation of the Telugu Grammars was entrusted, has reported that they would be ready by the end of the current official year.

In lieu of the Sixth Reader, Selections for the Fifth Class are annually published by the department.

The preparation of the Advanced Grammar of English has not been taken in hand.

The Colenso's Arithmetic, Tamil, Part II, has been revised by Mr. Velu Pillai, adopting the improvements of modern text-books in arithmetic. Tamil Part I and Parts I and II of Telugu Arithmetic will be revised when they are reprinted. No arrangements have been made for the preparation of (*b*) and (*f*).

Revision of Malayalam and Canarese text books

207. Throughout the year under report Mr. Garthwaite having been in the Presidency division, he was unable to undertake the work of the revision of the Malayalam and Canarese text-books. Since joining his division he has signified his intention of resuming and completing as soon as possible the work of revision.

Library of Oriental Manuscripts

208. The working of the Library during the year may be gathered from Dr. Duncan's review on the Curator's annual report given below :—

During the whole of the year under report Dr. Oppert was in charge of the Library, and the permanent and travelling establishments continued to work satisfactorily. The temporary establishment connected with the Library is reported to have ceased to exist.

Books

As directed in paragraph 7 of Proceedings No. 5337-A, of the 7th August 1884, Dr. Oppert has given a statement of the financial transactions of the year, from which it appears that the budget allotment of Rs. 3,200 has been almost entirely spent. In some respects it is to be regretted that the expenditure on the purchase of manuscripts has been so small.

The tours made by the Curator during the year have already formed the subject of separate correspondence, and the reports on them were submitted to Government as noted in the margin. In their order of the 4th June 1885, No. 381, Government approved of the sketch of operations proposed by Dr. Oppert for the current official year, and the Acting Director trusts that the systematic search begun in the districts of Chingleput, North Arcot and Malabar, as well as in the province of Mysore, will ere long be completed.

G.O., Educational Department, No. 501, dated 21st August 1884.
G.O., Educational Department, No. 293, dated 4th February 1885.
G.O., Educational Department, No. 381, dated 4th June 1885.
G.O., Educational Department, No. 390, dated 12th June 1885.

The Acting Director is glad to note that during the year 22,000 Sanskrit manuscripts were catalogued against 12,000 in the year preceding, and that the second volume of the List of Sanskrit Manuscripts in the Private Libraries of Southern India was published. This latter fact has already been submitted to Government (G.O., Public, No. 1061, dated 4th May 1885).

The number of manuscripts transcribed from originals obtained from various districts is given as 44, and the manuscripts are stated to be rare and useful. Besides these, 259 manuscripts have been purchased and 27 books have been presented to the Library. Dr. Oppert has given the names, with some particulars, of 22 books deserving special notice, acquired during the year.

There were 820 visitors to the Library during the year against 643 in 1883-84. Of these, 453 were readers, 244 copyists, and 123 were visitors, against 420 readers, 102 copyists, and 121 visitors. The increase more especially in the number of copyists is satisfactory, and tends to show that the Library is appreciated by the public.

Dr. Oppert brings to notice that two pandits have sold their valuable collections of Sanskrit manuscripts to the Library, and that two other native gentlemen have presented Telugu and Sanskrit manuscripts. The Acting Director concurs in the remark made by Dr. Oppert that these gentlemen have set an example worthy of imitation by others who may possess rare, useful, and valuable manuscripts.

Dr. Oppert, in concluding his report, brings to notice the gratuitous service rendered him while engaged in searching for manuscripts in the Mysore province by M.R.Ry. S. Rangachariar, Inspector of the Sanskrit College, Mysore.

A list of printed books and publications presented to the Library has not been given.

The report, considered as a whole, is satisfactory, and shows that much useful work was done during the year.

The Madras School Book and Vernacular Literature Society.

209. No report of the operations of the Society was published during the year under report. The Society's transactions in connection with the vending of Government books may be gathered from my review given below of the Secretary's report :—

The stock of Government books, Malayalam and Canarese excepted, having been transferred to the Madras School Book and Vernacular Literature Society on the 1st April 1884, when the Government Central Depôt was abolished, the above report, which is the first of its kind, shows the transaction of the Society in connection with the vending of books during the year 1884-85.

The value of stock transferred on 1st April 1884 amounted to Rs. 89,222-4-4. Adding to this Rs. 1,590-5-1, the value of a greater portion of the special books transferred, the total stock with the Society on the above date stood at Rs. 90,812-9-5. The value of books printed during the year and handed over to the Society was Rs. 43,194-7-0. Books worth Rs. 17 were also taken into stock during the year; so that the total value of stock was Rs. 1,34,024-0-5. Deducting from this sum Rs. 34,607-6-11, the value of the books sold by the Society during the year and of books issued to this office for printing, &c., the balance of stock on 31st March 1885 should have been Rs. 99,416-9-6. But the stock examination made by Mr. P. Vijayarunga Mudaliyar in August 1884 showed that there was a surplus of 695 copies worth Rs. 353-7-0 and a deficiency of 1,002 copies worth Rs. 257-4-6. The recent stock examination which took place early in May last resulted in the dwindling of the surplus copies to 674 valued at Rs. 349-9-9 and the deficient copies to 752 valued at Rs. 252-12-0. The decrease is stated to be due to the adjustment of the deficiencies as far as possible from the sale proceeds of the excess stock. The Director regrets that such variations should have occurred in the delivery by the late Curator and the receipt by the Society of Government books. As, however, the balance of favor rests with Government so far as the value of the copies is concerned, the Director approves of the suggestion made by the Secretary that the surpluses should be added to and the deficiencies deducted from the accounts. The value of the stock of Government books with the Society on the 31st March 1885 was therefore Rs. 99,513-7-3.

Books.

The sales effected during the year at 10 per cent. discount amounted to Rs. 27,653-6-4 and by retail to Rs. 6,902-2-7. The total sales which aggregated Rs. 34,555-8-11 do not compare favorably with those of the preceding year (Rs. 55,414-14-1). The Director notes the reasons assigned by the Secretary for the decrease. Every effort is being made by the Book Branch for the delivery of reprints as quickly as possible and thus to keep the Society in working order. Time was taken for the revision of the Anglo-Telugu First and Second Readers and Colenso's Arithmetic, Part II, Tamil. Stringent orders have lately been issued to the presses concerned for the delivery of books with expedition, and a change for the better is perceptible. As regards the disposal of some of the non-departmental books which are stated to be in bad condition, separate orders will be passed on the late Secretary's letter, No. 25, of the 1st March 1885, the report of Mr. Vijayarunga Mudaliyar, who was specially requested to attend to them in his stock examination, having been received.

Though the number of books sold and the value realized do not compare favorably with those of the preceding year, it is satisfactory to note that the value of books sold at 10 per cent. discount was nearly four times that sold by retail The Director is glad to note the observation made by the Secretary that a large number of private depôts (12 in the Mofussil and 6 in the Presidency town) has been established and that this fact is a clear indication that schools have not suffered in the supply of books by the abolition of the district depôts.

The following statement compares the sales of the year under report with those of the preceding year :—

Languages	1883-84		1884-85.	
	Number of Copies.	Value.	Number of Copies	Value
		RS. A P.		RS. A P
English	66,775	21,540 3 4	43,187	13,756 5 0
Tamil	126,681	16,449 10 5	109,965	13,964 14 3
Telugu	145,303	16,952 14 4	61,152	6,480 14 9
Hindustani	2,062	310 2 0	1,351	167 7 4
Uriya	37	8 14 6	5	0 10 6
Sanskrit	210	153 1 6	152	97 14 6
Special books		...	16	87 6 7
Total ...	341,068	55,414 14 1	215,828	34,555 8 11

The above statement shows a decline under each head both in respect of numbers sold and value realized. Of the three languages in which large sales are realized, Telugu stands worst.

The purchases made by District Boards amounted only to Rs. 2,105-6-0. Only ten Boards made purchases, and of these only three to an extent to be allowed a discount which amounted to Rs. 94-1-1. The decrease in the purchase is satisfactorily accounted for by the Secretary.

The receipts and payments are correctly shown. The net sale proceeds excluding discount (Rs. 2,765-4-9) amounted to Rs. 31,790-4-2. Of this, a sum of Rs. 29,614-12-0 was paid into the Bank on behalf of Government. Of the balance, Rs. 17 represents the refund of the value of books taken into stock, Rs. 1,588-10-5 commisson to the Society at 5 per cent., and the balance, Rs. 569-13-9 remained unremitted to the Bank on the 31st March 1885, but subsequently paid.

I have the honor to be,
Sir,
Your most obedient servant,
H. B. GRIGG,
Director of Public Instruction.

OFFICE OF DIRECTOR OF
PUBLIC INSTRUCTION,
23*rd October* 1885.

GOVERNMENT OF MADRAS.

EDUCATIONAL DEPARTMENT.

READ—Report on Public Instruction in the Madras Presidency in 1884-85.

ORDER—dated 29th March 1886, No. 190, Educational.

Resolution, dated 23rd October 1884, No. 10—309.

With the above letter the Director of Public Instruction submits his report on education for 1884-85. The principal event of the year was the issue of the final orders * of the Government of India on the recommendations of the Education Commission. A large and representative committee was thereupon appointed to carry out the revision of the Grant-in-Aid Code, and most of the points to which special importance is attached by the Supreme Government have been considered by that committee and dealt with in their report received since the commencement of the current year. The preparation of a teacher's manual, the bifurcation of studies, and other points raised by the Government of India were engaging the attention of the Director, and a reference has been made to the leading educational authorities of the presidency on the question of organizing educational conferences; on this and on the other points above mentioned a report has been called for from the Director of Public Instruction which the Government hope to receive shortly.

2. The total number of institutions furnishing returns to the Educational department on the 31st March 1885 was 15,587 against 16,139 on the corresponding date of the previous year, showing a net decrease of 1,552, while the total number of scholars fell from 447,786 at the close of 1883-84 to 430,851 at the close of the year under review. These decreases appear mainly in lower secondary and primary schools for boys and 86 per cent. of the falling off occurred in unaided institutions. The Director observes that the diminution in the number of schools does not indicate any retrogression in education, as the schools which have disappeared are mostly petty schools; and he proceeds to remark that the funds available are more wisely spent in the improvement of existing schools than in increasing their number. With this opinion, regarding the disposal of educational funds, the Governor in Council agrees, but it does not appear certain that the Director's preceding remark as to the inference to be drawn from the diminution in the number of schools is wholly borne out by the facts. It is observed that the percentage of decrease in scholars is slightly larger than that in schools, and that the average strength of primary schools for boys has decreased and not remained stationary as the Director thinks. In several districts, especially in the 6th division, an increased number of schools is accompanied by a decreased total attendance, and the heavy falling off in scholars in Tanjore, Tinnevelly, and Malabar is evidently not to be accounted for by the closing of petty and struggling schools. The Government are therefore of opinion that some of the decrease must be ascribed to other causes, of which the most important was that suggested by the Director, viz., the distress caused by the failure of the south-west monsoon in some districts and by the heavy floods of the north-east monsoon in others; more detailed notice of the causes of falling off, in which great differences among neighbouring districts are observed, should have been given in the report.

3. The diminution in the total number of schools and scholars noticed in the preceding paragraph is confined to schools of boys; in female education the year

shows a satisfactory advance. The total number of girls under instruction rose from 47,550 on the 31st March 1884 to 50,919 on the same date in the year under review, and the percentage of girls under instruction to the female population of school-going age from 2 per cent. to 2·2 per cent.; 17 out of the 22 districts show an advance, but the Government observe with regret that in female education, as in that of boys, a marked falling off appeared in Malabar during the year.

4. The figures, showing the relative educational condition of the great classes of the population, present but few changes in the year under review, the decrease in boys having been pretty evenly distributed among all classes except Europeans and Eurasians, while in female education each section of the population, except the Muhammadans, has advanced. The steady progress which the numbers of European and Eurasian children of both sexes under instruction have shown for several years past was maintained, and the percentage of pupils to population of school-going age in those classes reached 129 in the case of boys and 141 in that of girls. It is hoped that the important revision of the Grant-in-Aid Code as affecting European and Eurasian schools which was sanctioned during the year, and the attempts made to develop industrial education, will result in continued and increased improvement.

5. The falling off in Muhammadan education, both of girls and boys, is the least satisfactory feature of the year. The falling off is especially marked in Malabar, North Arcot, and Madras, and shows on how unstable a basis the results at present attained rest. In Malabar the decrease amounted to 16 per cent. of the total number of pupils, and is ascribed to the fluctuating policy of the District Board, which has in some years reduced and in others restored the full grants to Muhammadan pupils. The attention of the Board will be drawn to the remarks of Mr. Garthwaite regarding Mopla education quoted in a later part of the report. The progress of education among this race is a matter to which the Government attach very great importance, and no effort should be spared to promote it. In other parts of the presidency the condition of Muhammadan education though backward shows some signs of progress, and the increase in the number of Muhammadan pupils receiving collegiate education is satisfactory.

6. The statistics of the languages studied by the pupils show the following features:—Among boys, a small increase in the number learning English, large increase in the number learning Sanskrit, and a decrease of between 5 and 6 per cent., respectively, in the several vernaculars. To this decrease the exceptions are Uriya and Hindustani, which have both increased. The falling off in the numbers of the pupils studying Arabic is apparently to be attributed to the same check in Muhammadan education which has been noticed above and is therefore to be regretted. In comparing the number of pupils studying each vernacular with the population using it as its mother tongue, Tamil heads the list with 1·7 of such pupils to each hundred of the population, Malayalam comes next with 1·6 per cent., and Hindustani last with 1 per cent. only.

7. On the 31st March 1885 there were in the schools furnishing returns to the Education department 52,258 boys and 3,926 girls who remained unprotected by vaccination, as compared with 63,795 boys and 9,219 girls on the same date in the preceding year. The percentage of unprotected boys thus fell from 16 to 14, and that of girls from 19 to 8 during the year. The Government consider these results satisfactory, and are not prepared at present to agree to any such extension of the measures in force for the furtherance of vaccination as Mr. Fortey suggests in the remarks quoted by the Director. The question of the education of girls in this country is too delicate for any additional restriction to be advisable. The Government desire, however, to be informed in what number of Local Fund Circles and Municipalities the Boards have declared protection to be a condition of aid under Grant-in-Aid Code, Chapter III, Art. 30.

8. The following table shows the number of schools and scholars in Municipalities and Local Fund Circles, respectively, in the year under review and in its predecessor:—

	Schools.		Scholars	
	1883-84.	1884-85.	1883-84.	1884-85.
Municipalities	1,785	1,849	105,801	105,604
Local Fund Circles	14,351	13,738	341,985	325,247

The average number of pupils in schools in municipalities is 57, considerably more than double the number, 24, in schools within Local Fund circles. In explanation of this fact, the Director points out that the rural villages in the neighbourhood of a town which possesses a good school send many of their children into the town to be educated. A point of some interest, as bearing on the causes of the decrease in the total figures of education during the year, is that in municipalities the number of schools rose by 74, while the attendance showed an almost imperceptible falling off; in rural tracts, on the other hand, both schools and pupils decreased considerably, leaving the average attendance almost unaltered. It is also noticeable that, while of male pupils 22 per cent. only of the total belonged to schools in municipalities, as many as 43 per cent. of the total number of girls were in these schools—a fact illustrating how the progress of education radiates from towns through the surrounding country.

9. The next subject of which the report treats is that of school-fees, to which special interest attaches from the fact that in 1884-85 the enhanced rates of fees were for the first time fully in force. The total fee income realized during the year amounted to Rs. 12,83,140—an increase of Rs. 1,25,512, or of 10 per cent. on the figures of the preceding year, and of Rs. 2,39,528, or nearly 23 per cent. on those of 1882-83, the last in which the old rates of fees prevailed unchanged. The fluctuations in the average fee per pupil have been as follow:—

	RS.	A.	P.
1879-80	2	9	0
1882-83	2	6	0
1883-84	2	9	0
1884-85	2	15	0

The effect of the enhanced fee on the several classes of institutions is shown in the following figures:—

—	Government institutions.		Local Fund, &c.		Private.		Total.	
	Attendance.	Fees.	Attendance.	Fees.	Attendance.	Fees.	Attendance.	Fees.
		RS.		RS.		RS.		RS
1875-76 to 1878-79 } Average of four years .	10,922	1,25,240	29,102	32,645	226,497	5,12,086	266,518	6,70,022
1879-80 to 1882-83. } Average of four years ..	11,762	1,46,298	42,851	46,274	304,435	6,82,972	359,048	8,76,039
1883-84	10,297	1,77,040	48,225	86,826	389,264	8,93,762	447,786	11,57,628
1884-85	8,598	1,50,001	48,792	1,33,065	373,461	10,00,074	430,851	12,83,140

These figures show beyond dispute that in Government institutions, in which the increased scale of fees was heaviest, its result has been a distinct falling off in numbers and receipts. The Director states that the decrease, which occurs mainly in upper and lower secondary schools for boys, is accounted for by the transfer of certain departments to local bodies; but if the attendances of Government institutions and of institutions supported by Local Funds are added together, the total was 57,390 in the year under review against 58,522 in the previous year, showing a net decrease of 1,132 or of 11 per cent. on the total attendance of Government schools. This falling off in numbers must have caused a reduction in the fee revenue, although the gross amount of the latter has increased. The Director's statement, therefore, as to the decrease in income being only nominal is not completely justified by the facts. The largest increase in receipts occurred under the head of Aided schools, in which the total amounted to Rs. 7,96,092, or Rs. 1,15,000 above the figures of the previous year. In unaided and private institutions, the receipts fell from Rs. 2,11,975 in 1883-84 to Rs. 2,03,975, but this falling off occurred entirely under unaided primary schools which were unaffected by the notification, and with the exception of the decrease above noticed in Government schools, the enhanced rates of fees do not appear to have exercised any retarding influence on the statistics of instruction, while a very much larger revenue has been made available and a further step taken in the direction of rendering education self-supporting.

10. Although the aggregate amount of fees rose, the percentage of fees to total cost in Government colleges fell in each of the first-grade colleges and in five out

of the seven second-grade colleges. This is explained by the Director to be due partly to enhanced cost of the colleges, partly to the abolition in second-grade colleges of the middle departments, which were mostly self-supporting, and partly to the fact that the fee revenue of the previous year was abnormally large. The average cost per pupil advanced from Rs. 89-7-5 in the preceding year to Rs. 111-4-8. The fall in the percentage of total cost recovered from fees in Government institutions is in contrast with a large and general rise in the percentage in aided institutions. Much the same results are observed in high schools. With one exception (that of Cannanore), the Government institutions show a decline in the percentage of fee revenue to total cost, while out of sixty aided schools, in nine only did the surplus of cost above the fee revenue increase. The Director refers to the decrease in Government schools as being nominal, but his meaning is not understood. The transfer of schools to Local Boards does not affect those which remain under Government, and the effect of the collection in 1883-84 of the first-term fees of the year under review would probably not have been confined to Government institutions.

11. The total amount paid in grants-in-aid during the year was Rs. 7,44,416, which is the highest figure recorded; each head with one exception shows an increase. The advance in the total amount earned as results grants during the year is satisfactory, as affording evidence of improving instruction in the schools aided, and shows the necessity of husbanding the resources of the department.

12. The opening balance of the University was Rs. 11,180; the receipts during the year amounted to Rs. 1,12,857, and the expenditure to Rs. 1,00,810, showing a surplus for the year of Rs. 12,047, which raised the closing balance to Rs. 23,227. This result is satisfactory, and, as remarked by the Director, gives reason to hope that the University will in time accumulate a small endowment. The total numbers, both of candidates and passes, in the University examinations, showed a falling off, the examinees numbering 6,737 against 6,848, and the passes 2,226 against 2,460, or 33·05 per cent. against 35·9. The remark of the Director that the decrease in the number of candidates is due to the unusual rush in the previous year, owing to the examinations then held being the last under the old curricula, appears to be incorrect, for the decrease in the numbers of candidates for the F.A. examination alone was nearly equal to the total decrease, and no change in the curricula of that examination is known to have been made. The decrease in the number of passes is noticed in detail below.

13. Both M.A. and B.A. examinations present an improvement. That in the M.A. is especially satisfactory, and will, it is hoped, be maintained, and in the B.A. examination the number of candidates and of passes was higher than in any previous year. The Government have noted with satisfaction the continued advance of the number of students taking up Natural Science, and hope that the newly-accorded permission to take up more than one optional subject will encourage students to combine Natural Science with Mathematics. Hitherto, this has been impossible—a fact which sufficiently explains the stationary condition of Mathematics referred to by the Director.

14. The number of examinees and passes in the F.A. examination fell from 1,110 and 501 to 1,011 and 368, or by 9 and 27 per cent., respectively. The Director points out that the fall in the number of passes is a further illustration of the rule, to which he has drawn attention in earlier reports, that a year of low percentage of success follows and alternates with a year of high success. He has before expressed his opinion that this feature is explainable by the fact that the standard of the entrance examination is too low in relation to that of the F.A. examination, so that only matriculates of exceptional ability are able to complete the course for the F.A. examination in two years. This explanation does not recommend itself to the Government, who are inclined to attribute the result to variations of the standard of examination, which Mr. Grigg has himself shown to be, in the B.A. examination, very considerable. The alternation of years of low and high success has been, however, regular, and the subject requires further examination.

15. The falling off in the percentage of passes in the Matriculation examination is due to the introduction of a raised standard; the number of examinees falling from 5,290 to 5,215, and that of passes from 1,739 to 1,603. It is noted that the standard of success attained was highest in departmental institutions; those supported from local funds coming next.

16. The figures of the classes of the community represented at the Matriculation examination show some interesting results. In 1879, 64 per cent. of the passes were obtained by Brahmans, while in the year under review, this percentage had fallen to 58. This evidence of the progress of education among the non-Brahmanical classes of the community must be regarded with satisfaction, and is further illustrated by the fact that, while the number of passes secured by Brahman candidates has risen since 1879-80 by 33 per cent., the number of successful candidates belonging to other Hindu castes has advanced by 67 per cent., that of Muhammadans by 173 per cent., and that of Native Christians and East Indians by 80 and 41 per cent., respectively.

17. High schools numbered 115 at the close of the year against 110 at its beginning, while the strength of the schools was 23,755 against 24,179. The Director anticipates that the revision of the school-fees recently sanctioned by Government will have the effect of checking the existing tendency to raise a school to the status of a high school by opening a small fifth class without adequate means of support.

18. In the Middle School examination, a considerable improvement in the proportion of passes occurred, the percentage of success being 58 against 49 in the previous year. This is satisfactory. The Government observe that, in this examination, the great masses of the population can hardly be said to have begun to send up female candidates. Brahmans were represented by a single candidate, other Hindus by three, while no Muhammadan female candidate appeared. The female candidates were almost wholly drawn from the European, East Indian and Native Christian population.

19. Middle schools decreased both in numbers and strength, the decrease being the heaviest in vernacular schools. English middle schools fell from 494 to 434, and their attendance from 10,900 to 10,280. Vernacular schools numbered 463 against 593, and their pupils 10,431 against 11,326. As the Director points out, the decrease in pupils is very much less than in schools, showing that many of the schools closed were weak.

20. As already observed, it is in primary education that the largest falling off is apparent. Primary schools were unaffected by the enhanced school-fee notification, and some other cause for the decrease must exist, the nature of which has been already discussed (*supra* para. 2). The number of primary schools for boys on the 31st March 1885 was 14,128 and of pupils 365,081, against 14,706 and 386,028 in the previous year. On the other hand, the schools for girls increased in number from 508 to 578, and in attendance from 27,262 to 30,243. The total number of primary schools of all classes was 14,706 and that of pupils 395,324, against 15,200 and 413,290, respectively, in the previous year. Under the first four standards, the results apparent are a considerable decrease in the number of boys presented and passed for the first standard, substantial advances under the other standards, and a general advance in the number of girls. The number of pupils taking up agriculture under the third and fourth standards remained quite insignificant, the figures being the same under both as in the previous year. The general retrogression in the number of candidates and passes and in the average of passes under the first standard is to be regretted; the Director does not assign any definite cause for these circumstances, which may probably be ascribed to the falling off in the attendance in primary schools.

21. Under the head of schools for special or technical training, there was, on the whole, a marked advance, the number of schools having increased from 63 to 74, and that of pupils from 2,049 to 2,328. Six normal schools for masters, four normal schools for mistresses and one industrial school were added during the year, while, with the exception of the medical schools and the ordnance artificers' schools, the attendance increased in all classes of institutions. The most marked advance occurred in normal schools, both for masters and mistresses, the increase in attendance amounting in the former to 10 per cent. and in the latter to 38 per cent. The Government attach much importance to the promotion of this form of instruction, and especially to the creation of a supply of qualified female teachers, whose existence cannot fail to be of the utmost service to the cause of female education.

22. The total expenditure on Education from all sources during the year amounted to Rs. 41,98,560, as compared with Rs. 39,54,205 in 1883-84, showing an increase of Rs. 2,44,355. The increase in the preceding year was Rs. 2,09,406, and in 1882-83 Rs. 2,83,290. The amount provided from Provincial funds was

Rs. 11,72,341; local rates and cesses produced Rs. 6,36,064; municipal funds Rs. 1,66,211; fees Rs. 13,76,433; while Rs. 8,47,511 were expended from other sources. The following table shows the proportions in which this expenditure was distributed:—

	RS.	
University education (Colleges)	4,26,363 or 10·09	per cent.
Secondary do.	14,39,374 or 34·45	„
Primary do.	13,15,409 or 31·52	„
Special do.	2,94,771 or 7·19	„
University of Madras	1,00,810 or 2·39	„
Direction and inspection	3,65,142 or 8·64	„
Buildings	1,46,816 or 3·48	„
Scholarships and miscellaneous	1,09,875 or 2·24	„

23. In conclusion, it may be observed that, though the year 1884-85 was not one of unvaried progress in education, yet the results show, for the most, a steady and satisfactory advance. In his report, the Director brings into prominence the rapid strides which education has made in the last five years, by giving in most cases the figures of 1879-80. Schools and scholars have increased by over 50 per cent., and female education has made even greater progress. These results are very satisfactory, and His Excellency in Council hopes that future years will see no check to the work of instruction.

(True Extract.)

E. F. WEBSTER,
Chief Secretary.
